## Perfect Chrome-Enterprise-Administrator Test Question & Passing Chrome-Enterprise-Administrator Exam is No More a Challenging Task

Generally speaking, the clients will pass the test if they have finished learning all of our Chrome-Enterprise-Administrator Study Materials with no doubts. The odds to fail in the test are approximate to zero. But to guarantee that our clients won't suffer the loss we will refund the clients at once if they fail in the test unexpectedly. The Chrome-Enterprise-Administrator dump are very simple and the clients only need to send us their proofs to fail in the test and the screenshot or the scanning copies of the clients' failure scores. The clients can consult our online customer staff about how to refund, when will the money be returned backed to them and if they can get the full refund or they can send us mails to consult these issues.

## Google Professional Chrome Enterprise Administrator Certification Exam Sample Questions (Q35-Q40):

### NEW QUESTION # 35

An organization is deploying 50 new devices which will be managed by a Mobile Device Management solution Which method should be used to enroll the Chrome browser on those devices into Chrome Enterprise Core?

- A. Generate a single device enrollment token and email it to all users, instructing them to enroll their devices individually
- B. Use Google Admin console bulk enrollment feature to generate a set of unique tokens, and then distribute them via secure file sharing platform
- C. Use Google Admin to generate an enrollment token and distribute it using mobile device management software
- D. Use Google Admin to generate 50 individual device registration keys and distribute them using mobile device management

software

**Answer: C**

Explanation:

The study guide emphasizes using enrollment tokens generated in the Google Admin console for enrolling browsers. When using an MDM solution, the most efficient and recommended method is to generate a single enrollment token and then deploy it to the devices through the MDM software. This allows for automated and scalable enrollment. Bulk enrollment features in the Admin console are typically for direct enrollment, not through MDM. Individual tokens or keys would be inefficient for a large deployment.

#### NEW QUESTION # 36

Which option is a security event that Google Chrome captures?

- A. Password complexity
- **B. Malware detection**
- C. Unauthorized file downloads
- D. User inactivity

**Answer: B**

Explanation:

Chrome's Safe Browsing feature actively scans web pages, downloads, and extensions for known malware.

When malware is detected, it is reported as a security event. While unauthorized file downloads could be a consequence of a security issue, Chrome's direct detection focuses on the malware itself. Password complexity is a setting for password management, and user inactivity is a system or application-level event, not a direct security event captured by Chrome in the same way as malware detection.

#### NEW QUESTION # 37

An administrator identifies that the next major Chrome release, Chrome 130, has an issue with one of their critical business applications. The company's Chrome browsers are currently on version 129.0.6568.91. The administrator needs to prevent browsers from updating to Chrome 130, while allowing continued updates within the Chrome 129 major version.

Which target version prefix should the administrator use in the updates setting to achieve this?

- A. 129(
- **B. 129.**
- C. 129"
- D. 0

**Answer: B**

Explanation:

To target all updates within the 129 major version, the administrator should use the target version prefix `129.

` . This tells Chrome to stay within the 129 branch and accept minor updates (like 129.0.x.y to 129.1.x.y) but not to upgrade to the next major version (130). The other options are not the correct syntax for specifying a major version prefix for target updates.

#### NEW QUESTION # 38

What policy and value provides the most protection against malicious websites?

- A. Allow the user ability to bypass Safe Browsing warnings
- **B. Set the Safe Browsing policy to Enhanced mode**
- C. Enable site isolation for all websites
- D. Set the site isolation policy to be required for all websites

**Answer: B**

Explanation:

Setting the **\*\*Safe Browsing policy to Enhanced mode\*\*** provides the most direct and comprehensive protection against malicious websites by leveraging Google's real-time threat intelligence. Allowing users to bypass warnings (option A) defeats the purpose of

Safe Browsing. While site isolation (options C and D) protects against cross-site data leakage, it doesn't directly prevent users from accessing malicious sites in the first place. Enhanced Safe Browsing actively warns and blocks access to dangerous websites.

#### NEW QUESTION # 39

A systems engineer recently cloud enrolled Chrome browsers, which were previously managed via group policy, and deployed a policy through Chrome Enterprise Core. However, the policy is not applying. After validating the policy via `chrome://policy`, the status shows a warning conflict. What is the best way to resolve this issue?

- **A. Check and configure the precedence order**
- B. Restart the computer to apply the policy changes
- C. Adjust the policy merge list setting
- D. Re-enroll the Chrome browser to reset the policy

**Answer: A**

Explanation:

A "warning conflict" in `chrome://policy` indicates that multiple policy sources are trying to control the same setting. Since the browsers were previously managed by Group Policy, there's likely a conflict between the cloud policy and the local Group Policy. The best way to resolve this is to **check and configure the precedence order** of policy sources. Ensure that Cloud Policy is set to have the desired precedence over Group Policy if that's the intention. Restarting the computer might apply existing policies but won't resolve the conflict in precedence. Adjusting a "policy merge list setting" is not a standard term for resolving this type of conflict. Re-enrolling might give a fresh start but doesn't address the underlying conflict in policy sources.

#### NEW QUESTION # 40

.....

The (Chrome-Enterprise-Administrator exam offered by Google is regarded as one of the most promising certification exams in the field of. The Chrome-Enterprise-Administrator preparation products available here are provided in line with latest changes and updates in Chrome-Enterprise-Administrator syllabus.
