In this information-dominated society, boosting plenty stocks of knowledge and being competent in some certain area can establish yourself in society and help you get a high social status. Passing 2V0-17.25 certification can help you realize these goals and find a good job with high income. If you buy our 2V0-17.25 practice test you can pass the exam successfully and easily. The purchase procedures are safe and we protect our client's privacy. We provide 24-hours online customer service and free update within one year. If you fail in the exam, we will refund you immediately. All in all, there are many advantages of our 2V0-17.25 Training Materials.

We are equipped with excellent materials covering most of knowledge points of 2V0-17.25 pdf torrent. Our learning materials in PDF format are designed with 2V0-17.25 actual test and the current exam information. Questions and answers are available to download immediately after you purchased our 2V0-17.25 Dumps PDF. The free demo of pdf version can be downloaded in our exam page.

2V0-17.25 Cert Guide & 2V0-17.25 Reliable Test Vce

We become successful lies on the professional expert team we possess, who engage themselves in the research and development of our 2V0-17.25 learning guide for many years. So we can guarantee that our 2V0-17.25 exam materials are the best reviewing material. Concentrated all our energies on the study 2V0-17.25 learning guide we never change the goal of helping candidates pass the exam. Our 2V0-17.25 test questions' quality is guaranteed by our experts' hard work. So what are you waiting for? Just choose our 2V0-17.25 exam materials, and you won't be regret.

VMware Cloud Foundation 9.0 Administrator Sample Questions (Q71-Q76):

NEW QUESTION # 71

A customer would like to deploy Kubernetes-based workloads to a newly provisioned VMware Cloud Foundation (VCF) workload domain.

Which two prerequisites must be completed before an administrator can complete the creation of an Organization for All

Applications in VCF Automation? (Choose two.)

- A. A Region must be configured within the VCF Automation Provider Management Portal.
- B. The VMware Kubernetes Service (VKS) must be activated within the VCF Management workload domain.
- C. The vSphere Supervisor must be activated within the VCF workload domain.
- D. The vSphere Supervisor must be activated within the VCF Management workload domain.
- E. The VCF workload domain must be configured for VMware NSX Federation.

Answer: A,C

Explanation:

The vSphere Supervisor must be activated within the VCF workload domain, since Kubernetes clusters rely on Supervisor Services for running Tanzu-based workloads.

A Region must be configured in the VCF Automation Provider Management Portal, as Organizations are tied to regions for resource allocation and management.

NEW QUESTION # 72

An organization needs to perform maintenance on a specific host in a vSAN cluster. An administrator is required to put the host into maintenance mode whilst ensuring that all VMs in the cluster remain accessible.

Which three steps should the administrator take to correctly set a vSAN host into maintenance mode?
(Choose three.)

- A. Migrate all VMs manually from the host before enabling maintenance mode.
- B. Navigate to the vSAN cluster in the vSphere Client and select the host.
- C. Select the "No Data Migration" option to speed up the process.
- D. Choose the "Ensure Accessibility" option to maintain data accessibility.
- E. Right-click the host and select "Enter Maintenance Mode."

Answer: B,D,E

Explanation:

The "Ensure Accessibility" option ensures that all data remains accessible during maintenance while minimizing the impact on performance and data migration.

The administrator must navigate to the vSAN cluster in the vSphere Client to select the host for maintenance mode.

Right-clicking the host and selecting "Enter Maintenance Mode" is the standard action for placing a host into maintenance mode.

NEW QUESTION # 73

Following an update to the Information Security policy, an administrator has been reviewing the status SSL certificates within the VMware Cloud Foundation (VCF) solution.

The new Information Security Policy states:

- All SSL certificates must be generated and signed from the shared Microsoft Certificate Authority (CA).

The administrator has discovered the following:

- All Aria Suite Components already use CA-signed Subject Alternate Name (SAN) SSL certificates.

- All other VCF-based SSL certificates are either self-signed or generated using the VMware Certificate Authority (VMCA).

Which three steps must the administrator take to ensure the VCF solution remains compliant and managed by SDDC Manager?
(Choose three.)

- A. In SDDC Manager, replace the SSL certificates for vCenter, ESXi, NSX Manager, SDDC Manager and Aria Suite Lifecycle.
- B. Integrate the Microsoft CA into SDDC Manager.
- C. In VMware vCenter, replace the ESXi SSL certificates.
- D. In Aria Suite Lifecycle, replace the VMware Identity Manager, Aria Automation, Aria Operations and Aria Operations for Logs SSL certificates.
- E. Integrate the OpenSSL CA into SDDC Manager.
- F. In SDDC Manager, replace the SSL certificates for vCenter, NSX Manager, SDDC Manager and Aria Suite Lifecycle.

Answer: A,B,F

Explanation:

Comprehensive and Detailed Explanation From Exact Extract:

As per the VMware Cloud Foundation Administration Guide, the official and supported process for moving all solution certificates under a Microsoft Certificate Authority, while keeping management and lifecycle operations compliant with SDDC Manager, is as follows:

C). Integrate the Microsoft CA into SDDC Manager.

Exact Extract:

"To replace SSL certificates for VMware Cloud Foundation components using SDDC Manager, you must first integrate your Microsoft CA with SDDC Manager. This allows SDDC Manager to automate the certificate signing process using the organization's enterprise CA." F). In SDDC Manager, replace the SSL certificates for vCenter, ESXi, NSX Manager, SDDC Manager and Aria Suite Lifecycle.

Exact Extract:

"With Microsoft CA integration, you can use SDDC Manager to generate and replace SSL certificates for all key solution components, including vCenter, ESXi, NSX Manager, SDDC Manager, and Aria Suite Lifecycle. This process ensures full visibility and management through SDDC Manager." D). In SDDC Manager, replace the SSL certificates for vCenter, NSX Manager, SDDC Manager and Aria Suite Lifecycle.

Exact Extract:

"Certificate replacement workflows in SDDC Manager allow you to select which managed components have their certificates replaced with CA-signed certificates. You must select and update all components that are not already using compliant CA-signed certificates." Why Not the Other Options?

A: ESXi certificate replacement should be managed via SDDC Manager for compliance, not directly in vCenter.

B: OpenSSL CA is not part of the company's security policy or supported by the current workflow.

E: Aria Suite Lifecycle and its components already use CA-signed certificates, so this action is not needed.

Summary:

To ensure compliance with the updated security policy and maintain management with SDDC Manager, the administrator must:

Integrate the Microsoft CA into SDDC Manager (C),

Use SDDC Manager to replace all relevant solution SSL certificates for vCenter, ESXi, NSX Manager, SDDC Manager, and Aria Suite Lifecycle (F), And use SDDC Manager's certificate replacement workflow to update any components still requiring CA-signed certificates (D).

These steps are mandated and supported by VMware Cloud Foundation official documentation.

NEW QUESTION # 74

What are three prerequisites for deploying an NSX Edge cluster in a VMware Cloud Foundation (VCF) solution? (Choose three.)

- A. Create DNS entries for the NSX Edge nodes.
- B. Install Aria Operations and enable Edge Cluster monitoring.
- C. Verify that the NSX host overlay VLAN and NSX Edge overlay VLAN are routed to each other.
- D. Configure BGP as a dynamic routing protocol on the physical switches.
- E. Set up vSAN storage policies for the Edge VMs.
- F. Use separate VLAN IDs and subnets for the NSX host overlay and NSX Edge overlay networks.

Answer: A,C,F

Explanation:

The NSX host overlay VLAN and NSX Edge overlay VLAN must be routed to each other so Edge nodes can establish overlay tunnels with transport nodes.

DNS A records for each NSX Edge node are required for name resolution during deployment and operation.

NSX requires distinct VLAN IDs and subnets for the host overlay network (transport nodes) and the Edge overlay network to segregate traffic and avoid IP space conflicts.

<https://techdocs.broadcom.com/us/en/vmware-cis/vcf/vcf-5-2-and-earlier/5-2/map-for-administering-vcf-5-2/deploying-nsx-edge-clusters-admin/prerequisites-for-an-nsx-edge-cluster-admin.html>

NEW QUESTION # 75

Which cluster-level feature, when enabled, automatically redistributes VMs to balance CPU and memory across hosts?

- A. vMotion
- B. vSphere HA
- C. vSphere DRS
- D. vSAN Health Service

Answer: C

Explanation:

Distributed Resource Scheduler (DRS) balances CPU and memory resources by migrating VMs among hosts. HA addresses failover, vMotion handles live migration manually or by DRS, and vSAN Health Service monitors the status of the vSAN cluster.

NEW QUESTION # 76

.....

Our 2V0-17.25 exam materials allows you to have a 98% to 100% pass rate; allows you takes only 20 to 30 hours to practice before you take the exam; provide you with 24 free online customer service; provide professional personnel remote assistance; give you full refund if you fail to pass the 2V0-17.25 Exam. Our 2V0-17.25 real test serve you with the greatest sincerity. Face to such an excellent product which has so much advantages, do you fall in love with our 2V0-17.25 study materials now? If your answer is yes, then come and buy our 2V0-17.25 exam questions now.

2V0-17.25 Cert Guide: <https://www.verifeddumps.com/2V0-17.25-valid-exam-braindumps.html>

Why should you become VMware 2V0-17.25 Cert Guide certified, Many people think that passing the VMware 2V0-17.25 exam needs a lot of time to learn the relevant knowledge, Many candidates clear exams and obtain certifications with our 2V0-17.25 exam torrent, VMware Exam 2V0-17.25 Tutorial We believe that there is always a kind of method to best help your exam preparation, VMware Exam 2V0-17.25 Tutorial We always adhere to the promise to provide you with the best valid and high-quality exam dumps.

Either choose a location from the Where pop-up menu when you 2V0-17.25 are naming your desktop printer, or move its icon after you create it, Python program structure and execution model.

Why should you become VMware certified, Many people think that passing the VMware 2V0-17.25 Exam needs a lot of time to learn the relevant knowledge, Many candidates clear exams and obtain certifications with our 2V0-17.25 exam torrent.

Exam 2V0-17.25 Tutorial - 100% High Pass-Rate Questions Pool

We believe that there is always a kind of method to best help 2V0-17.25 Cert Guide your exam preparation, We always adhere to the promise to provide you with the best valid and high-quality exam dumps.
