### CIPS L3M6 Prüfungsplan:

Thema	Einzelheiten
Thema 1	<ul style="list-style-type: none"><li>Understand the Concepts of Sustainability and Corporate Social Responsibility (CSR): This section of the exam measures the knowledge of Procurement Specialists and covers the foundational concepts of sustainability and CSR. It explains how sustainability involves meeting present needs without compromising future generations' ability to do the same. The focus extends beyond traditional economic criteria, incorporating environmental and social impacts into procurement decisions. CSR emphasizes extending corporate goals to include social responsibility, promoting good citizenship, and encouraging positive impacts on stakeholders, including social, economic, and cultural diversity.</li></ul>

Thema 2	<ul style="list-style-type: none"> <li>• Understand the Environmental Impact of Procurement and Supply: This section evaluates the skills of Supply Chain Analysts in understanding how procurement affects the environment. It explores global challenges such as balancing globalization with green logistics, public awareness, external pressures, and international regulations. The environmental impact of transportation and storage is covered, including air pollution, carbon footprint calculations, noise pollution, accidents, and land use. Additionally, it highlights the government's role in promoting sustainability through policies like greener transport modes, energy efficiency, and emission reduction.</li> </ul>
Thema 3	<ul style="list-style-type: none"> <li>• Understand the Environmental Impact of Warehousing and Distribution: This section targets Logistics Coordinators and examines how warehousing and distribution contribute to environmental challenges. Topics include air pollution, carbon footprint, noise pollution, accidents, land use, and visual intrusion. It also discusses the environmental costs associated with logistics activities such as greenhouse gas emissions and global warming and strategies to mitigate these impacts. The role of government policies in sustainable logistics is emphasized, including reducing freight intensity, improving utilization rates, promoting greener transport modes, enhancing energy efficiency, and cutting emissions.</li> </ul>
Thema 4	<ul style="list-style-type: none"> <li>• Understand Methods for the Storage and Movement of Inventory: This section assesses the expertise of Warehouse Managers in inventory storage and movement methods. It includes principles of warehouse design, focusing on location, layout factors such as flow and space utilization, and flexibility. It also explains various types of warehousing equipment like material handling systems, palletization techniques, packaging standards, and automation technologies that align with environmental standards.</li> </ul>

### CIPS Socially Responsible Warehousing and Distribution L3M6 Prüfungsfragen mit Lösungen (Q88-Q93):

#### 88. Frage

Not enough visual stimulation can lead to eye strain, distraction, and too much noise.

- A. TRUE
- B. FALSE

Antwort: B

Begründung:

Insufficient visual stimulation (e.g., bland environments) may cause boredom or fatigue, but not eye strain (from overexertion), distraction (from excess stimuli), or noise (an auditory issue). The CIPS L3M6 module clarifies visual pollution's effects in LO2-

excess, not lack, drives stress. The statement is false due to mismatched causation.

### 89. Frage

Monitoring CSR in the supply chain is done with the intention to create continuous improvements in their suppliers' performance, which has mutual benefits.

- A. TRUE
- B. FALSE

**Antwort: A**

Begründung:

Monitoring CSR in the supply chain aims to ensure suppliers adhere to ethical, social, and environmental standards, driving continuous improvement in their performance. This benefits suppliers by enhancing their practices and competitiveness, while the buying organization gains improved quality, reduced risks, and a stronger reputation. The CIPS L3M6 module emphasizes this collaborative approach as a cornerstone of sustainable procurement.

### 90. Frage

Directors are only expected to generate profits. They are not expected to promote ethics, fairness, transparency, and accountability in all their dealings, both internally and externally.

- A. TRUE
- B. FALSE

**Antwort: B**

Begründung:

Directors of organizations are not solely tasked with generating profits. According to the principles of Corporate Social Responsibility (CSR) and corporate governance outlined in the CIPS L3M6 framework, directors have a broader responsibility that includes promoting ethics, fairness, transparency, and accountability. These elements are integral to sustainable business practices and are expected in dealings with internal stakeholders (e.g., employees) and external stakeholders (e.g., suppliers, communities). The focus on profit alone neglects the social and environmental dimensions of sustainability, which are critical for long-term organizational success and reputation. This aligns with the modern view of corporate governance, where directors must balance economic objectives with ethical and sustainable practices.

### 91. Frage

Which of the following are challenges when introducing sustainable procurement practices?

- A. All the above
- B. The lack of training and reliable information regarding social, ethical, and environmental principles and processes
- C. The need to justify the principles to management
- D. The need to justify the implementation cost to management

**Antwort: A**

Begründung:

Challenges to sustainable procurement include:

\* Lack of training/information: Gaps in understanding ethical and environmental principles.

\* Justifying costs: Demonstrating financial viability to management.

\* Justifying principles: Convincing management of the strategic value of sustainability.

The CIPS L3M6 module identifies these as common barriers requiring education and strategic alignment to overcome.
