

CCDAK Clearer Explanation, Updated CCDAK Dumps

P.S. Free 2026 Confluent CCDAK dumps are available on Google Drive shared by TestsDumps: <https://drive.google.com/open?id=1W6EU-8zh-1ZkUaCNujEr1lisN7oNSmK>

We strongly recommend using our Confluent Certified Developer for Apache Kafka Certification Examination (CCDAK) exam dumps to prepare for the Confluent CCDAK certification. It is the best way to ensure success. With our Confluent Certified Developer for Apache Kafka Certification Examination (CCDAK) practice questions, you can get the most out of your studying and maximize your chances of passing your Confluent Certified Developer for Apache Kafka Certification Examination (CCDAK) exam.

The CCDAK certification exam is an online, proctored exam that consists of multiple-choice questions and hands-on exercises. CCDAK exam is designed to be challenging, but fair, and is intended to test the knowledge and skills of developers who have experience working with Kafka. CCDAK exam is available to anyone who meets the prerequisites, which include experience working with Kafka and a solid understanding of distributed systems and programming concepts. The CCDAK certification exam is an excellent way for developers to demonstrate their expertise in Kafka and differentiate themselves in a competitive job market.

Confluent CCDAK or Confluent Certified Developer for Apache Kafka Certification Examination is an extensive test that measures a candidate's knowledge and abilities to develop and manage Apache Kafka applications in a distributed environment using the Confluent platform. Confluent Certified Developer for Apache Kafka Certification Examination certification exam is meant for developers, architects, engineers, and data scientists, who are responsible for building real-time streaming applications using open-source Kafka.

Earning the CCDAK Certification is a great way to showcase your expertise in Kafka and gain recognition in the industry. Confluent Certified Developer for Apache Kafka Certification Examination certification is valid for two years, and to maintain it, you need to either retake the exam or earn a higher-level certification offered by Confluent.

2026 Confluent Useful CCDAK Clearer Explanation

Our CCDAK practice exam simulator mirrors the CCDAK exam experience, so you know what to anticipate on CCDAK exam day. Our Confluent CCDAK features various question styles and levels, so you can customize your CCDAK exam questions preparation to meet your needs.

Confluent Certified Developer for Apache Kafka Certification Examination Sample Questions (Q69-Q74):

NEW QUESTION # 69

Compaction is enabled for a topic in Kafka by setting `log.cleanup.policy=compact`. What is true about log compaction?

- A. After cleanup, only one message per key is retained with the first value
- B. Kafka automatically de-duplicates incoming messages based on key hashes
- **C. After cleanup, only one message per key is retained with the latest value**
- D. Each message stored in the topic is compressed

Answer: C

Explanation:

Compaction changes the offset of messages

Explanation:

Log compaction retains at least the last known value for each record key for a single topic partition. All compacted log offsets remain valid, even if record at offset has been compacted away as a consumer will get the next highest offset.

NEW QUESTION # 70

By default, which replica will be elected as a partition leader? (select two)

- A. Preferred leader broker if it is in-sync and `auto.leader.rebalance.enable=false`
- B. Preferred leader broker if it is in-sync and `auto.leader.rebalance.enable=true`
- **C. An in-sync replica**
- **D. Any of the replicas**

Answer: C,D

Explanation:

Preferred leader is a broker that was leader when topic was created. It is preferred because when partitions are first created, the leaders are balanced between brokers. Otherwise, any of the in-sync replicas (ISR) will be elected leader, as long as `unclean.leader.election=false` (by default)

NEW QUESTION # 71

What is the difference between exactly once semantics (EOS) and idempotence?

- A. Idempotence sends updates multiple times and stores the first value. EOS sends updates multiple times and stores the latest value.
- B. Idempotence sends an update multiple times and only keeps the latest update EOS requests get sent multiple times, but only the first request is accepted.
- **C. Idempotence Is any function that can be executed several times without changing the final result beyond its first iteration. EOS sends an update once and only one time.**
- D. Idempotence sends an update once and only one item. EOS is any function that can be executed several times without changing the final result beyond its first iteration

Answer: C

NEW QUESTION # 72

We would like to be in an at-most once consuming scenario. Which offset commit strategy would you recommend?

- A. Commit the offsets on disk, after processing the data
- B. Do not commit any offsets and read from beginning
- C. Commit the offsets in Kafka, after processing the data
- **D. Commit the offsets in Kafka, before processing the data**

Answer: D

Explanation:

Here, we must commit the offsets right after receiving a batch from a call to `.poll()`

NEW QUESTION # 73

How will you find out all the partitions where one or more of the replicas for the partition are not in-sync with the leader?

- A. kafka-topics.sh --broker-list localhost:9092 --describe --under-replicated-partitions
- B. kafka-topics.sh --zookeeper localhost:2181 --describe --under-replicated-partitions
- C. kafka-topics.sh --bootstrap-server localhost:9092 --describe --unavailable-partitions
- D. kafka-topics.sh --zookeeper localhost:2181 --describe --unavailable-partitions

Answer: B

NEW QUESTION # 74

.....

With CCDAK test training materials of TestsDumps, you will own the key to pass CCDAK exam, which will make you develop better in IT. All of this just need you trust us, trust in TestsDumps, and trust in CCDAK test training materials. Our training material of CCDAK exam is absolutely real and reliable. What's more, the passing rate of CCDAK test is as high as 100%.
