完美的220-1102考古題更新和認證考試的領導者材料和完整的最新220-1102題庫

人生有太多的變數和未知的誘惑，所以我們趁年輕時要為自己打下堅實的基礎，你準備好了嗎？KaoGuTi CompTIA的220-1102考試培訓資料將是最好的培訓資料，它的效果將是你終生的伴侶，作為IT行業的你，你體會到緊迫感了嗎？選擇KaoGuTi，你將打開你的成功之門，裏面有最閃耀的光芒等得你去揮灑，加油！

證書在全球範圍內得到了認可，並且在IT行業中受到高度重視。它為個人提供了機會，在IT領域增強其知識和技能，並向潛在雇主展示其專業知識。證書的有效期為證書發放日期起三年，此后，候選人必須重新認證才能維持其有效性。

最新的 A+ 220-1102 免費考試真題 (Q323-Q328):

問題 #323

A technician is partitioning a hard disk. The five primary partitions should contain 4TB of free space. Which of the following partition styles should the technician use to partition the device?

- A. MBR
- B. EFS
- **C. GPT**
- D. FAT32

答案： C

解題說明：

GPT is the correct answer for this question. GPT stands for GUID Partition Table, and it is a partition style that supports up to 128 primary partitions and up to 18 exabytes of disk size per partition. GPT also uses a unique identifier for each partition and provides better data protection and recovery. GPT is suitable for partitioning a hard disk that has five primary partitions with 4TB of free space each. EFS, MBR, and FAT32 are not correct answers for this question. EFS stands for Encrypting File System, and it is a feature that allows encrypting files and folders on NTFS volumes. EFS is not a partition style, but rather a file system attribute. MBR stands for Master Boot Record, and it is an older partition style that supports up to four primary partitions and up to 2TB of disk size per partition. MBR cannot handle five primary partitions with 4TB of free space each. FAT32 stands for File Allocation Table 32, and it is a file system that supports up to 32GB of disk size per partition and up to 4GB of file size. FAT32 is not a partition style, but rather a file system type. References:

問題 #324

A change advisory board authorized a setting change so a technician is permitted to Implement the change. The technician successfully implemented the change. Which of the following should be done next?

- **A. Document the date and time of change**
- B. Document the findings of the sandbox test,
- C. Document the purpose of the change.
- D. Document the risk level.

答案： A

解題說明：

The correct answer is A. Document the date and time of change. After implementing a change, the technician should document the date and time of change in the change log or record. This helps to track the change history, monitor the change performance, and identify any issues or incidents related to the change. Documenting the date and time of change is also a good practice for auditing and compliance purposes.

Documenting the purpose of the change (B) and the risk level are steps that should be done before implementing the change, not after. These are important information that help to justify, prioritize, and plan the change. The purpose of the change should explain why the change is needed and what benefits it will bring to the organization. The risk level should assess the potential impact and probability of the change causing any problems or disruptions to the business.

Documenting the findings of the sandbox test (D) is also a step that should be done before implementing the change, not after. A sandbox test is a way of testing the change in an isolated environment that mimics the production environment. This helps to verify that the change works as expected and does not cause any errors or conflicts with other systems or processes. The findings of the sandbox test should be documented and reviewed by the change advisory board (CAB) before approving the change for implementation.

問題 #325

Which of the following is a package management utility for PCs that are running the Linux operating system?

- A. chmod
- B. man
- C. yum
- D. grep

答案: C

解題說明:

yum (Yellowdog Updater Modified) is a package management utility for PCs that are running the Linux operating system. It can be used to install, update and remove software packages from repositories. chmod (change mode) is a command that changes the permissions of files and directories in Linux. man (manual) is a command that displays the documentation of other commands in Linux. grep (global regular expression print) is a command that searches for patterns in text files in Linux. 問題 #326

A user receives a notification indicating the antivirus protection on a company laptop is out of date. A technician is able to ping the user's laptop. The technician checks the antivirus parent servers and sees the latest signatures have been installed. The technician then checks the user's laptop and finds the antivirus engine and definitions are current. Which of the following has MOST likely occurred?

- A. Missing system files
- B. Ransomware
- C. Adware
- D. Failed OS updates

答案: C

問題 #327

An organization is updating the monitors on kiosk machines. While performing the upgrade, the organization would like to remove physical input devices. Which of the following utilities in the Control Panel can be used to turn on the on-screen keyboard to replace the physical input devices?

* Devices and Printers

- A. Device Manager
- B. Programs and Features
- C. Ease of Access

答案: B

解題說明:

Ease of Access is a utility in the Control Panel that allows users to adjust various accessibility settings on Windows, such as the on-screen keyboard, magnifier, narrator, high contrast, etc. The on-screen keyboard can be turned on by going to Ease of Access > Keyboard and toggling the switch to On12. Alternatively, the on-screen keyboard can be opened by pressing Windows + Ctrl + O keys or by typing osk.exe in the Run dialog box3.
