

New New FSCP Exam Practice 100% Pass | High Pass-Rate FSCP: Forescout Certified Professional Exam 100% Pass

P.S. Free & New FSCP dumps are available on Google Drive shared by Free4Dump: https://drive.google.com/open?id=17eS6TsD_FKv_4GOAunzdluktdNmKjsA3

Free4Dump serves as a most important source of IT certification information. You can find learning materials and study guides. If you are interested in our Free4Dump Forescout FSCP exam dumps, you can depend on our Free4Dump to make a sound choice. Free4Dump Forescout FSCP test packed so much with the latest information about the certification training. By using our Free4Dump Forescout FSCP practice test, you have made preparations for the exam.

Our FSCP test braindumps are carefully developed by experts in various fields, and the quality is trustworthy. What's more, after you purchase our products, we will update our FSCP exam questions according to the new changes and then send them to you in time to ensure the comprehensiveness of learning materials. We also have data to prove that 99% of those who use our FSCP Latest Exam torrent to prepare for the exam can successfully pass the exam and get Forescout certification. So if you are preparing to take the test, you can rely on our learning materials. You will also be the next beneficiary. After you get Forescout certification, you can get boosted and high salary to enjoy a good life.

Forescout FSCP Frequent Updates, Test FSCP Collection Pdf

To assimilate those useful knowledge better, many customers eager to have some kinds of FSCP practice materials worth practicing. All content is clear and easily understood in our FSCP practice materials. They are accessible with reasonable prices and various versions for your option. All content are in compliance with regulations of the FSCP Exam. As long as you are determined to succeed, our FSCP study guide will be your best reliance.

Forescout Certified Professional Exam Sample Questions (Q75-Q80):

NEW QUESTION # 75

Irresolvable hosts would match the condition. When configuring policies, which of the following statements is true regarding this image?

Select one:

- A. Modifies the irresolvable condition to TRUE
- B. Negates the criteria outside the property
- C. Generates a NOT condition in the sub-rule condition
- **D. Has no effect on irresolvable hosts**

Answer: D

Explanation:

Based on the image showing "Meets the following criteria" radio button selected (as opposed to "Does not meet the following criteria"), the correct statement is: "Has no effect on irresolvable hosts".

Understanding "Meets the following criteria":

According to the Forescout policy configuration documentation:

When "Meets the following criteria" is selected:

- * Normal Evaluation - The condition is evaluated as written
- * No Negation - There is NO inversion of logic
- * Irresolvable Handling - Separate setting; the "Meets" choice does NOT affect irresolvable handling Irresolvable Hosts -

Independent Setting:

According to the policy sub-rule advanced options documentation:

"The 'Meets the following criteria' radio button and the 'Evaluate irresolvable as' checkbox are independent settings."

- * "Meets the following criteria" - Controls normal/negated evaluation
- * "Evaluate irresolvable as" - Controls how unresolvable properties are treated The selection of "Meets the following criteria" has no specific effect on how irresolvable hosts are handled.

Why Other Options Are Incorrect:

- * B. Generates a NOT condition - "Meets" does NOT generate NOT; it's the normal condition
- * C. Negates the criteria outside - "Meets" does not negate anything; it's the affirmative option
- * D. Modifies irresolvable condition to TRUE - The "Evaluate irresolvable as" setting controls that, not "Meets"

Referenced Documentation:

- * Define policy scope
- * Forescout eyeSight policy sub-rule advanced options
- * Forescout Platform Policy Sub-Rule Advanced Options

NEW QUESTION # 76

Which of the following is the SMB protocol version required to manage Windows XP or Windows Vista endpoints?

- A. SMB V3.0
- B. SMB V2.0
- **C. SMB V1.0**
- D. SMB V3.1.1
- E. SMB is not required for XP or Vista

Answer: C

Explanation:

Comprehensive and Detailed Explanation From Exact Extract of Forescout Platform Administration and Deployment:

According to the Forescout HPS Inspection Engine Configuration Guide and Microsoft SMB Protocol documentation, the SMB protocol version required to manage Windows XP or Windows Vista endpoints is SMB V1.0.

SMB Version Timeline:

According to the Microsoft documentation and Forescout requirements:

Windows Version

SMB Support

Windows XP

SMB 1.0 only

Windows Vista

SMB 1.0 and SMB 2.0

Windows 7

SMB 1.0, SMB 2.0, and SMB 2.1

Windows 8/Server 2012

SMB 2.0, SMB 2.1, and SMB 3.0

Windows 10

SMB 2.1 and SMB 3.x

Windows XP and Vista SMB Requirements:

According to Forescout documentation:

The documentation explicitly states:

"When you require SMB signing, Remote Inspection can no longer be used to manage endpoints that cannot work with SMB signing, for example: Old Windows XP/Server 2003 systems" This indicates that Windows XP requires SMB support, specifically SMB 1.0, which doesn't support modern SMB signing requirements.

SMB Version Negotiation:

According to the official documentation:

When a Forescout CounterACT appliance connects to an endpoint:

- * Version Negotiation - Both client and server advertise their supported SMB versions
- * Highest Common Version Selected - The highest version supported by BOTH is used
- * Fallback Behavior - If SMB 2.0 is available on Vista but not supported by CounterACT, it falls back to SMB 1.0 For Windows XP (SMB 1.0 only) and Windows Vista (SMB 1.0/2.0):
- * Minimum Required: SMB 1.0
- * Maximum Supported: SMB 2.0 (Vista only)

Port Requirements for SMB 1.0:

According to the Forescout documentation:

For Windows XP and Vista endpoints using SMB 1.0:

text

Port 139/TCP must be available

(Port 445/TCP is used for Windows 7 and above)

Historical Context:

According to the documentation:

- * SMB 1.0 was the original protocol used by Windows 2000, NT, and earlier versions
- * Windows Vista SP1 and Windows Server 2008 introduced SMB 2.0
- * SMB 1.0 is considered legacy and insecure (no encryption, subject to security vulnerabilities)
- * Microsoft recommends disabling SMB 1.0 in modern networks

However, for legacy Windows XP and early Vista systems, SMB 1.0 is the only option.

Why Other Options Are Incorrect:

- * A. SMB V3.1.1 - This is the latest version, introduced with Windows Server 2016 and Windows 10; not supported on XP or Vista
- * C. SMB is not required for XP or Vista - Incorrect; SMB is essential for Windows manageability and script execution
- * D. SMB V2.0 - While Vista supports SMB 2.0, Windows XP does NOT; only SMB 1.0 works on both
- * E. SMB V3.0 - This requires Windows 8/Server 2012 or later; not supported on XP or Vista Legacy Endpoint Management

Considerations:

According to the documentation:

For legacy endpoints requiring SMB 1.0:

- * Cannot require SMB signing (not supported in SMB 1.0)
- * Must allow unencrypted SMB communication
- * Should be isolated on network segments with security controls
- * Represents security risk due to SMB 1.0 vulnerabilities

Referenced Documentation:

- * Forescout HPS Inspection Engine - About SMB documentation
- * Operational Requirements - Port requirements
- * Microsoft - SMB Protocol Versions and Requirements

NEW QUESTION # 77

Which of the following User Directory server settings is necessary to enable guest approval by sponsors?

- A. Sponsor Group
- B. Guest password policy
- C. Policy to control
- D. Authentication Server

- E. Guest Tags

Answer: A

Explanation:

Comprehensive and Detailed Explanation From Exact Extract of Forescout Platform Administration and Deployment:

The Sponsor Group is the necessary User Directory server setting required to enable guest approval by sponsors. According to the Forescout User Directory Plugin Configuration Guide and Guest Management Portal documentation, Sponsor Groups must be created and configured to define the corporate employees (sponsors) who are authorized to approve or decline guest network access requests.

Sponsor Group Configuration:

In the Guest Management pane, the Sponsors tab is used to define the corporate employees who are authorized to log into the Guest Management Portal to approve network access requests from guests. These employees are assigned to specific Sponsor Groups, which control which sponsors can approve guest access requests.

How Sponsor Groups Enable Guest Approval:

- * Sponsor Definition - Corporate employees must be designated as sponsors and assigned to a Sponsor Group
- * Approval Authority - Sponsors in assigned groups can approve or decline guest network access requests
- * Authentication - When "Enable sponsor approval without authentication via emailed link" is selected, sponsors in the designated group can approve guests based on email link authorization
- * Guest Registration - Guest registration options connect Sponsor Groups to the guest approval workflow Why Other Options Are Incorrect:

- * A. Policy to control - While policies are used for guest control, they do not define which sponsors can approve guests

- * B. Guest Tags - Guest Tags are used to classify and organize guest accounts, not to enable sponsor approval

- * D. Guest password policy - This setting controls password requirements for guests, not sponsor approval authority

- * E. Authentication Server - Authentication servers verify credentials but do not establish sponsor approval groups Referenced

Documentation:

- * Forescout User Directory Plugin Configuration Guide - Create Sponsors section

- * Guest Management Portal - Sponsor Configuration documentation

- * "Create sponsors" - Forescout Administration Guide section

NEW QUESTION # 78

Which of the following is true regarding how CounterACT restores a quarantined endpoint to its original production VLAN after the "Assign to VLAN Action" is removed?

- A. This happens automatically as long as configuration changes to the switchport access VLAN of affected ports are not changed in the switch running config
- B. This happens automatically as long as no configuration changes to the switch are made to the running config
- **C. This happens automatically as long as configuration changes to the switchport access VLAN of affected ports are not saved in the startup config**
- D. This happens automatically because CounterACT compares the running and startup configs
- E. A policy is required to ensure this happens correctly.

Answer: C

Explanation:

Comprehensive and Detailed Explanation From Exact Extract of Forescout Platform Administration and Deployment:

According to the Forescout Switch Plugin Configuration Guide Version 8.12 and 8.14.2, CounterACT restores a quarantined endpoint to its original production VLAN automatically as long as configuration changes to the switchport access VLAN of affected ports are not saved in the startup config.

VLAN Restoration Mechanism:

According to the Switch Plugin documentation:

When the "Assign to VLAN" action is removed or expires, CounterACT can restore the original VLAN configuration by comparing the running configuration with the startup configuration on the switch.

The Key Requirement:

According to the documentation:

The restoration process works as follows:

- * Assign to VLAN Action Applied - Endpoint is moved to quarantine VLAN (switch running config is updated)

- * Assign to VLAN Action Removed - CounterACT wants to restore the original VLAN

- * Running vs. Startup Config Comparison - CounterACT compares running config to startup config

- * Restoration - The port is returned to its original VLAN as defined in the startup configuration Critical Condition:

According to the documentation:

"This happens automatically as long as configuration changes to the switchport access VLAN of affected ports are not saved in the startup config" This is critical because:

- * If manual changes are saved to the startup config, CounterACT cannot determine what the "original" VLAN should be
- * The startup config must remain unchanged for CounterACT to restore the correct VLAN
- * The running config changes are temporary and revert to startup config values Why Other Options Are Incorrect:
- * A. CounterACT compares the running and startup configs - While true that comparison occurs, the condition is about whether changes are saved to startup, not just comparing
- * B. Configuration changes...are not changed in the switch running config - Too broad; there can be other running config changes; the specific requirement is about VLAN configuration being saved to startup
- * C. No configuration changes to the switch are made to the running config - Too strict; other changes can be made; only VLAN switchport access configuration matters
- * E. A policy is required - Incorrect; this is automatic behavior, not policy-dependent Default VLAN Feature:

According to the Switch Plugin Configuration Guide:

The Default VLAN feature ensures that ports are automatically assigned to a default VLAN unless specifically configured otherwise. When the "Assign to VLAN" action is removed, the port returns to the default VLAN (as defined in the startup configuration).

Referenced Documentation:

- * Forescout CounterACT Switch Plugin Configuration Guide Version 8.12
- * Switch Plugin Configuration Guide v8.14.2
- * Global Configuration Options for the Switch Plugin

NEW QUESTION # 79

Which of the following is an example of a remediation action?

- A. Start Antivirus update
- B. Start SecureConnector
- C. HTTP login
- D. Switch port block
- E. Assign to VLAN

Answer: A

Explanation:

Comprehensive and Detailed Explanation From Exact Extract of Forescout Platform Administration and Deployment:

According to the Forescout Administration Guide - Remediate Actions, "Start Antivirus update" is an example of a remediation action.

Remediation Actions Definition:

According to the Remediate Actions documentation:

"Remediation actions are actions that address compliance issues by taking corrective measures on endpoints.

These actions fix, update, or improve the security posture of non-compliant endpoints." Examples of Remediation Actions:

According to the documentation:

Remediation actions include:

- * Start Antivirus Update - Updates antivirus definitions on the endpoint
- * Update Antivirus - Updates antivirus software
- * Start Windows Updates - Initiates Windows security patches
- * Enable Firewall - Activates Windows firewall
- * Disable USB - Restricts USB access

Why Other Options Are Incorrect:

- * A. Start SecureConnector - This is a deployment action, not remediation
- * C. Assign to VLAN - This is a containment/isolation action (Switch Remediate Action), not a remediation action
- * D. Switch port block - This is a containment/restrict action (Switch Restrict Action), not remediation
- * E. HTTP login - This is authentication, not a remediation action

Action Categories:

According to the documentation:

Category

Examples

Purpose

Remediate Actions

Start Antivirus, Windows Updates, Enable Firewall

Fix compliance issues

Restrict Actions
Switch Block, Port Block, ACL
Contain threats
Remediate Actions (Switch)
Assign to VLAN (quarantine)
Move to isolated VLAN
Deployment
Start SecureConnector
Deploy agents
Referenced Documentation:
* Remediate Actions
* Switch Remediate Actions
* Switch Restrict Actions

NEW QUESTION # 80

.....

Free4Dump has been devoted itself to provide all candidates who are preparing for IT certification exam with the best and the most trusted reference materials in years. With regards to the questions of IT certification test, Free4Dump has a wealth of experience. Free4Dump has helped numerous candidates and got their reliance and praise. So, don't doubt the quality of Free4Dump Forescout FSCP Dumps. It is high quality dumps helping you 100% pass FSCP certification test. Free4Dump promises 100% FULL REFUND, if you fail the exam. With this guarantee, you don't need to hesitate whether to buy the dumps or not. Missing it is your losses.

FSCP Frequent Updates: <https://www.free4dump.com/FSCP-braindumps-torrent.html>

Boost your Productivity with FSCP Exam Questions | Free4Dump: Free4Dump ensures productivity because we provide FSCP dumps pdf that is reliable and verified by Forescout exam professionals so that the clients can practice these and can clear their Forescout Certified Professional Exam exam easily, We sincerely suggest you to try these demos of our FSCP study guide and make a well-content choice, Once there are latest versions released, we will send the updated FSCP dumps pdf to your email immediately.

Software defines your networks, Again, these filters won't magically eliminate losses but will soften the blow, Boost your Productivity with FSCP Exam Questions | Free4Dump: Free4Dump ensures productivity because we provide FSCP dumps pdf that is reliable and verified by Forescout exam professionals so that the clients can practice these and can clear their Forescout Certified Professional Exam exam easily.

100% Pass Accurate Forescout - FSCP - New Forescout Certified Professional Exam Exam Practice

We sincerely suggest you to try these demos of our FSCP Study Guide and make a well-content choice, Once there are latest versions released, we will send the updated FSCP dumps pdf to your email immediately.

The language in our FSCP test guide is easy to understand that will make any learner without any learning disabilities, whether you are a student or a in-service staff, whether FSCP you are a novice or an experienced staff who has abundant experience for many years.

The second one of FSCP test braindumps is software versions which are usable to windows system only with simulation test system for you to practice in daily life.
