ServiceNow Certified Implementation Specialist - Discovery Sample Questions (Q104-Q109):

NEW QUESTION # 104

Based on the following image, which of the following choices is also true about London Linux Servers?

- A. It is a Datacenter Group in London.
- B. It is a CMDB Group with Dashboard Group type.
- C. It is a CMDB Group with Default Group type.
- D. It is a CMDB Group with Health Group type.

Answer: D

Explanation:
London Linux Servers is a CMDB Group with Health Group type. A CMDB Group is a collection of configuration items (CIs) that share common characteristics or are related in some way1. A Health Group is a type of CMDB Group that is used to monitor and measure the health of a specific set of CIs based on predefined rules and metrics2. The image shows that London Linux Servers is selected from the CMDB Health Group List, which is a dropdown menu that displays all the Health Groups defined in the system3. The image also shows the Group Health tab, which displays the health scores and indicators for the selected Health Group.

NEW QUESTION # 105

After navigating to an Automaton Error Messages list from Discovery > Home, how are the options on the right navigation pane categorized? (Choose two.)

- A. SELECT ONE
- B. ACTION ON ALL
- C. SELECT ALL
- D. ACTION ON SELECTED

Answer: C,D

Explanation:
The Automation Error Messages list displays the errors that occurred during the execution of Discovery automation scripts. From this list, you can view the details of each error, such as the script name, the error message, the device, and the time. You can also perform actions on the errors, such as retrying the script, ignoring the error, or creating an incident. To do so, you can use the options on the right navigation pane, which are categorized as follows1:
* SELECT ALL: This option allows you to select all the errors in the list.
* SELECT ONE: This option allows you to select one error in the list by clicking on the checkbox next to it.
* ACTION ON SELECTED: This option allows you to perform an action on the selected errors, such as Retry, Ignore, or Create Incident. You can also choose to perform the action on all the errors in the list by selecting the All option from the drop-down menu.
* ACTION ON ALL: This option allows you to perform an action on all the errors in the list, regardless of the selection. You can choose from the same actions as the ACTION ON SELECTED option.
References:
* Discovery error messages: This article explains the different types of error messages and warnings in Discovery, and how to access and manage them.

NEW QUESTION # 106

Among the following fields _____ , _____ and _____ are editable from a Merge Table pattern operation.
(Choose 3 answers)
Response:

- A. Second Table

- B. Target Table
- C. Primary Table
- D. First Table

Answer: A,B,D

NEW QUESTION # 107
You can enable debugging on a Pattern using the below steps?
Response:

- A. Enable a system property
- B. Clicking the debug mode in the pattern editor

Answer: B

NEW QUESTION # 108
Which operation is used to change from the default credentials to any other appropriate credentials in a horizontal pattern?

- A. Change user
- B. Alternate user
- C. Change credentials
- D. Alternate credentials

Answer: A

Explanation:
A horizontal pattern is a type of Discovery pattern that discovers configuration items (CIs) and their relationships by moving across the network from one device to another. A horizontal pattern can use the Change user operation to switch from the default credentials to any other appropriate credentials for a specific device or application. This operation allows the pattern to access different types of CIs with different authentication methods.
References:
* Discovery patterns
* Change user operation
