

2026 AI-900–100% Free Practice Test Pdf | High-quality Exam AI-900 Study Guide

P.S. Free & New AI-900 dumps are available on Google Drive shared by It-Tests: <https://drive.google.com/open?id=1cb41OVALPFswFbC9CdEp5PWLrDXdEks>

We regard the customer as king so we put a high emphasis on the trust of every users, therefore our security system can protect you both in payment of AI-900 guide braindumps and promise that your computer will not be infected during the process of payment on our AI-900 Study Materials. Moreover, if you end up the cooperation between us, we have the responsibility to delete your personal information on AI-900 exam prep. In a word, We have data protection act for you to avoid information leakage!

As the saying goes, knowledge has no limits. You may be old but the spirit of endless learning won't be old. If you attend the test of AI-900 certification you will update your stocks of knowledge and improve your actual abilities, buying our AI-900 Study Materials can help you pass the test smoothly. You will acquire a lot of knowledge to make you more learned and enhance your working abilities in some certain area.

AI-900 exam preparation, real Microsoft test dumps for Microsoft Azure AI Fundamentals

By devoting in this area so many years, we are omnipotent to solve the problems about the AI-900 actual exam with stalwart confidence. If you fail the AI-900 exam by accident even if getting our AI-900 practice materials, you can provide your report card and get full refund as well as choose other version of AI-900 practice materials by your decision. We provide services 24/7 with patient and enthusiastic staff. All moves are responsible due to your benefits.

Microsoft Azure AI Fundamentals Sample Questions (Q195-Q200):

NEW QUESTION # 195

You need to develop a chatbot for a website. The chatbot must answer users questions based on the information in the following documents

- * A product troubleshooting guide in a Microsoft Word document
- * A frequently asked questions (FAQ) list on a webpage

Which service should you use to process the documents?

- A. QnA Maker
- B. Text Analytics
- C. Language Understanding
- D. Azure Bot Service

Answer: A

Explanation:

QnA Maker (now part of Azure AI Language Service - Custom Question Answering) enables bots to answer user queries by extracting questions and answers from structured sources like FAQs, webpages, and documents (e.g., Word, PDF). In this scenario, where data comes from a Microsoft Word troubleshooting guide and a FAQ webpage, QnA Maker automatically extracts knowledge and creates a searchable knowledge base.

Other options are incorrect:

- * A. Language Understanding (LUIS): Detects intents, not question-answer pairs.
- * B. Text Analytics: Extracts key phrases and sentiment but does not support conversational responses.
- * C. Azure Bot Service: Hosts bots, but it requires QnA Maker for knowledge sources.

NEW QUESTION # 196

Providing contextual information to improve the responses quality of a generative AI solution is an example of which prompt engineering technique?

- A. fine-tuning
- B. providing examples
- C. grounding data
- D. system messages

Answer: C

Explanation:

In Microsoft Azure OpenAI Service and the AI-900/AI-102 study materials, grounding data is the correct term used to describe the process of providing contextual or external information to improve the accuracy, relevance, and quality of responses generated by a generative AI model such as GPT-3.5 or GPT-4.

Grounding is a prompt engineering technique where the AI model is supplemented with relevant background data, such as company documents, knowledge bases, or user context, that helps the model generate factually correct and context-aware responses.

Microsoft Learn defines grounding as a way to connect the model's general knowledge to specific, real-world information. For example, if you ask a GPT-3.5 model about your organization's HR policies, the base model will not know them unless that policy information is provided (grounded) in the prompt. By embedding this contextual data, the AI becomes "grounded" in the facts it needs to respond reliably.

This technique differs from other prompt engineering concepts:

- * A. Providing examples (few-shot prompting) shows the model sample inputs and outputs to guide formatting or style, not factual context.
- * B. Fine-tuning involves retraining the model with labeled data to permanently adjust its behavior - it's not a prompt-based technique.
- * D. System messages define the model's role, tone, or style (for example, "You are a helpful assistant") but do not add factual context.

Therefore, when you provide contextual information (like product details, policy documents, or reference text) within a prompt to enhance the quality and factual reliability of the model's responses, you are applying the grounding data technique.

NEW QUESTION # 197

What is an example of a regression model in machine learning?

- A. dividing the student data in a dataset based on the age of the students and their educational achievements
- B. predicting the sale price of a house based on historical data, the size of the house, and the number of bedrooms in the house
- C. identifying subtypes of spam email by examining a large collection of emails that were flagged by users
- D. identifying population counts of endangered animals by analyzing images

Answer: B

NEW QUESTION # 198

To complete the sentence, select the appropriate option in the answer area.

□

Answer:

Explanation:

□

Reference:

<https://docs.microsoft.com/en-us/azure/machine-learning/algorithm-module-reference/linear-regression>

<https://docs.microsoft.com/en-us/azure/machine-learning/studio-module-reference/machine-learning-initialize-model-clustering>

Regression is a form of machine learning that is used to predict a numeric label based on an item's features.

<https://docs.microsoft.com/en-us/learn/modules/create-regression-model-azure-machine-learning-designer/introduction>

NEW QUESTION # 199

To complete the sentence, select the appropriate option in the answer area.

Computer vision capabilities can be Deployed to.....

Answer:

Explanation:

Integrate a facial recognition feature into an app.

NEW QUESTION # 200

.....

Due to continuous efforts of our experts, we have exactly targeted the content of the AI-900 exam. You will pass the AI-900 exam after 20 to 30 hours' learning with our AI-900 study material. If you fail to pass the exam, we will give you a refund. Many users have witnessed the effectiveness of our AI-900 Guide braindumps you surely will become one of them. Try it right now! And we will let you down.
