Latest TM3 Exam Registration & TM3 Reliable Test Testking

Document Type:	Document No.: DAP-03-06-012	
TEST PAPER	Issue No.:	Revision No.: 00
Document Title:	Effective Date: October 1, 2019	
FINAL EXAM	Page **1** of 1	

Name: _____ Date: _____ Permit No.: _____

TM3: CUSTOMS VALUATION SYSTEM

GENERAL INSTRUCTIONS: Read and analyze each item carefully. Answer the given items by providing the necessary information asked for. Use black ball point pen only. A blank paper is provided for your solution.

PART I: Provide the correct answer.

1. As an exporter you were asked by importer "A" to quote for an export order to be shipped by air. "A" said he will pick up the order from your warehouse and he will be responsible for export customs clearance. What is the term of purchase?

   Answer: **EXW**

2. It is a term of purchase where the seller pays for the freight and insurance and the responsibility of the seller is to deliver the goods to the plane's terminal at the country of exportation.

   Answer: **CIP**

3. What is the proper way of invoicing an import order where the exporter shall be responsible for the payment of freight and marine insurance and the manner of shipment is by sea only?

   Answer: **CIF**

4. You were asked by buyer "A" to quote for an export order to be shipped by air. "A" said he will pick up the order from your warehouse and will be responsible for export customs clearance. What is the term of purchase?

   Answer: **EXW**

5. What is the proper term where the seller delivers the ordered goods to a carrier and pays for the air freight?

   Answer: **CPT**

Part II. Read and analyze the problem. Encircle the correct answer.

1. Seller in Tacurong City delivered the goods to carrier's warehouse in Davao. Bill of lading shows freight charges as "FRT COLLECT" and will be paid by importer upon arrival of goods in Nagoya.

You may be busy in your jobs, learning or family lives and can't get around to preparing and takes the certificate exams but on the other side you urgently need some useful TM3 certificates to improve your abilities in some areas. So is there a solution which can kill two birds with one stone to both make you get the certificate and spend little time and energy to prepare for the exam? Our TM3 study materials provide a variety of functions to help the clients improve their learning. For example, the function to stimulate the exam helps the clients test their learning results of the TM3 study materials in an environment which is highly similar to the real exam.

BCS TM3 Exam Syllabus Topics:

Topic	Details

Topic 1	• Managing the Test Activities: This section focuses on the role of Test Managers and how testing is planned, monitored, controlled, and completed across different software development contexts. It covers the overall test process, including defining test plans, tracking progress, and ensuring proper closure. Candidates are expected to understand how testing fits within various lifecycle models, test levels, and types, while engaging stakeholders effectively. The syllabus emphasizes risk-based testing to identify quality risks, assess impacts, and select suitable mitigation activities. It also highlights formulating project-level test strategies, selecting appropriate test approaches, setting measurable objectives, and improving processes through models like IDEAL. Additionally, candidates should be able to evaluate and introduce test tools based on business needs, risks, and return on investment.
Topic 2	• Managing the Product: This section emphasizes understanding and managing the product under test, focusing on controlling and assessing testing activities. It covers test metrics, reporting, and defect management across sequential, Agile, and hybrid environments. Candidates should be able to select and apply appropriate test estimation techniques and establish defect workflows suited to the project context. The syllabus also includes preparing business cases for testing activities that justify costs, benefits, and the value of testing within the overall project.
Topic 3	• Managing the Team: This section addresses the role of Test Leads in analyzing team needs, identifying required skills, and coordinating efforts using a whole-team approach. Candidates are expected to understand how to align team capabilities with project goals and ensure effective collaboration. The syllabus highlights techniques for team management, resource allocation, and fostering continuous improvement through retrospectives and knowledge sharing to optimize testing performance.

TM3 Reliable Test Testking & TM3 Training Courses

We have three versions of TM3 learning materials available, including PDF, Software and APP online. The most popular one is PDF version of TM3 study guide can be printed into papers so that you are able to write some notes or highlight the emphasis. On the other hand, Software version of our TM3 Practice Questions is also welcomed by customers, especially for windows users. As for PPT online version, as long as you download the app into your computer. You can enjoy the nice service from us.

BCS ISTQB Certified Tester Advanced Level - Test Management v3.0 Sample Questions (Q19-Q24):

NEW QUESTION # 19
Factors that are important to take into account when performing test estimation include:
i. The quality of the test basis
ii. The availability of test automation
iii. The amount of rework required
iv. The distribution of testing across several locations
The various factors can be grouped by characteristic. Examples of characteristics include:

- A. A = ii, B = iii, C = iv, D = i
- B. Test results
- C. A = i, B = ii, C = iii, D = iv
- D. A = iv, B = iii, C = i, D = ii
- E. Development processWhich factor is related to which characteristic?
- F. Test context
- G. Product
- H. A = iv, B = iii, C = ii, D = i

Answer: B

Explanation:
Comprehensive and Detailed Explanation From Exact Extract of ISTQB Certified Tester Advanced Level - Test Manager v3.0 syllabus:

Product characteristic # quality of the test basis (C = i):The syllabus lists the quality and stability of the requirements/specifications (test basis) as a product-related estimation driver.

Test results characteristic # amount of rework (B = iii):Expected rework/defect-fix cycles and their impact on retesting and confirmation testing are identified through past results/defect patterns and directly affect estimates.

Test context characteristic # distribution across locations (A = iv):Organizational and logistical context (multiple sites, time zones, communication overhead) influences test effort.

Development process characteristic # availability of test automation (D = ii):Process/tooling capability (e.g., presence of automation frameworks) is treated as a development/process factor affecting test efficiency and thus estimation.The syllabus groups estimation drivers into characteristics such as product, development process, test results/history, and test/organizational context, and recommends mapping specific factors to these groups to structure estimation.

NEW QUESTION # 20

In multi-team environments with hybrid software development approaches, there are various challenges in the context of defect management, such as:

i. Alignment of defect attributes to be used

ii. Prioritisation of defects

iii. Alignment of the approach for defect fixes

Solutions to the above-mentioned challenges include:

- A. A = i, B = iii, C = ii
- B. A = i, B = ii, C = iii
- C. A = ii, B = i, C = iii
- D. Transparency of plans by sharing them between teams via dashboardsWhich solution is related to which challenge?
- E. The product owner should be involved in the defect management meetings
- F. Synchronisation between the defect management tools
- G. A = i, B = ii, C = i

Answer: D

Explanation:
Comprehensive and Detailed Explanation From Exact Extract of ISTQB Certified Tester Advanced Level - Test Manager v3.0 syllabus:

ii. Prioritisation of defects # A. Product owner involvement: The PO (or equivalent business authority) ensuresbusiness-value/risk-based prioritizationis consistent across teams.

i. Alignment of defect attributes # B. Tool synchronization: Toalign fields/attributes/statuses, teams synchronize or harmonize defect management tools and schemas.

iii. Alignment of approach for fixes # C. Transparent shared dashboards:Shared plans/dashboardssupport coordination onhow/whenfixes are implemented across teams, improving consistency and visibility.This mapping reflects the syllabus coverage oforganization-level test management, multi-team governance, tool alignment, and cross-team transparency practices in hybrid/Agile environments (CTAL-TM v3.0, Chapter 2:

Test Management in the Organization; Chapter 5: defect management coordination and reporting).

NEW QUESTION # 21

Which of the following statements about test management activities for an iterative development model is false?

- A. Reporting is done at project milestones.
- B. The test approach is embedded within iterations, with a focus on adaptability and feedback.
- C. With testware the focus is on acceptance criteria and definition of done. The level of documentation is minimal.
- D. Roles are integrated; facilitator or coach typically replace the traditional test manager.

Answer: A

Explanation:
Comprehensive and Detailed Explanation From Exact Extract of ISTQB Certified Tester Advanced Level - Test Manager v3.0 syllabus:

In iterative/Agile contexts (Chapter:Test Management in the Organization), the syllabus emphasizes:

A: Testware tends to be lean; focus is onacceptance criteriaand theDefinition of Done; documentation is oftenminimalbut sufficient.

B: Thetest approach is integrated within iterations, emphasizingadaptability,continuous feedback, and close collaboration.

D: Traditional, centralized "test manager" roles are oftenevolved or distributed; responsibilities may be shared across the team, with

afacilitator/coach (e.g., Scrum Master/Agile coach) supporting quality practices.

C is false because in iterative models reporting is continuous and occurs every iteration (e.g., sprint reviews, daily information radiators), not only at traditional project milestones typical of sequential models. (Reference:

CTAL-TM v3.0 Syllabus - Chapter "Test Management in the Organization", sections on Agile/iterative test management, roles, minimal documentation, and iterative reporting.)

NEW QUESTION # 22

You have been contracted to manage the user acceptance testing of a new reservation system for a travel agency. The reservation system is being developed by a third party. Detailed specifications are available, and an estimate of the total development effort exists. The system will be delivered in four agreed increments.

Which of the following estimation techniques would be most appropriate to use in this context?

- A. Estimation based on ratios
- B. Planning poker
- C. Wide-band Delphi
- D. Extrapolation

Answer: A

Explanation:

Comprehensive and Detailed Explanation From Exact Extract of ISTQB Certified Tester Advanced Level - Test Manager v3.0 syllabus:

The syllabus describes ratio-based estimation (e.g., estimating test effort as a proportion of known or estimated development effort) as appropriate when reliable development-effort data or estimates and clear scope are available. Here, detailed specifications exist, overall development effort is estimated, and increments are defined-conditions well-suited to ratio-based estimation.

Extrapolation requires comparable historical test data for this context.

Wide-band Delphi is useful when data is scarce and expert consensus is needed.

Planning poker is typically used by Agile development teams to size user stories, not for contracting UAT with a third party.

NEW QUESTION # 23

Which of the following factors influences the risk impact?

- A. Geographically distributed teams
- B. Complexity of technology being used
- C. Frequency of use of the affected feature
- D. Maturity of the development organisation

Answer: C

Explanation:

Comprehensive and Detailed Explanation From Exact Extract of ISTQB Certified Tester Advanced Level - Test Manager v3.0 syllabus:

In the syllabus, risk impact concerns the potential damage or loss if a failure occurs (business, user, financial, legal, or reputational). Frequency of use of the affected feature increases the exposure and thus the impact when defects occur, making option B correct. By contrast, complexity of technology, organizational maturity, and distributed teams primarily influence likelihood (the chance of defects entering/escaping), not the impact dimension (CTAL-TM v3.0 Syllabus, Risk-Based Testing section explaining factors of likelihood vs.

impact and examples of each).

NEW QUESTION # 24

......

After so many years' development, our TM3 exam torrent is absolutely the most excellent than other competitors, the content of it is more complete, the language of it is more simply. Once you use our TM3 latest dumps, you will save a lot of time. High effectiveness is our great advantage. After twenty to thirty hours' practice, you are ready to take the real TM3 Exam Torrent. The results will never let you down. You just need to wait for obtaining the certificate.
