100% Pass 2026 Marvelous Juniper JN0-650 Mock Test

The wording is fully approved in our JN0-650 Exam Guide. They handpicked what the JN0-650 exam torrent usually tests in exam recent years and devoted their knowledge accumulated into these JN0-650 study tools. Besides, they keep the quality and content according to the trend of the JN0-650 practice exam. As approved JN0-650 exam guide from professional experts their quality is unquestionable. Our agreeable staffs are obliging to offer help 24/7 without self-seeking intention and present our after-seals services in a most favorable light. We have patient colleagues offering help and solve your problems and questions of our materials all the way.

With the increasing marketization, the product experience marketing has been praised by the consumer market and the industry. Attract users interested in product marketing to know just the first step, the most important is to be designed to allow the user to try before buying the JN0-650 study materials, so we provide free pre-sale experience to help users to better understand our products. The user only needs to submit his E-mail address and apply for free trial online, and our system will soon send free demonstration research materials of JN0-650 Study Materials to download.

Realistic Juniper JN0-650 Mock Test Are Leading Materials & Trusted JN0-650: Enterprise Routing and Switching, Professional (JNCIP-ENT)

We can say that the Juniper JN0-650 exam practice questions are real, valid, and updated Enterprise Routing and Switching, Professional (JNCIP-ENT) (JN0-650) exam questions that will provide you with everything that you need to learn to prepare and

pass the JN0-650 exam. The Juniper JN0-650 Exam Questions will not only assist you in Enterprise Routing and Switching, Professional (JNCIP-ENT) (JN0-650) exam preparation but also give you sight knowledge about the Enterprise Routing and Switching, Professional (JNCIP-ENT) (JN0-650) exam topics that will help you in your professional career.

Juniper Enterprise Routing and Switching, Professional (JNCIP-ENT) Sample Questions (Q33-Q38):

NEW QUESTION # 33
When configuring IS-IS, what is the purpose of the Level 1-2 router type?

- A. To interconnect areas and the backbone
- B. To segregate different areas within the network
- C. To route within a single area only
- D. To connect to the backbone area only

Answer: A

NEW QUESTION # 34
You are deploying new Juniper EX Series switches in a network that currently is using Cisco's Per- VLAN spanning tree plus (PVST+) and you must provide compatibility with this environment.
Which spanning tree protocol do you deploy in this scenario?

- A. RSTP
- B. STP
- C. MSTP
- D. VSTP

Answer: D

NEW QUESTION # 35
You are deploying IP phones in your Layer 2 network and are asked to ensure that the switch sends VLAN and CoS information to the IP phones automatically.
In this scenario, which protocol should be used?

- A. PoE+
- B. LLDP_MED
- C. LLDP
- D. PoE

Answer: B

NEW QUESTION # 36
Exhibit:
☐
You are configuring an EVPN overlay to allow VLANs to be stretched between two campus sites, but EVPN routes are not being exchanged. Referring to the exhibit, which configuration statement would solve this problem?

- A. Apply the set protocols bgp group EVPN family evpn signaling configuration on MX2.
- B. Apply the delete protocols bgp groupEVPN cluster 172.1.1.55 configuration on MX2.
- C. Apply the set protocols bgp group EVPN family inet-vpn any configuration on MX1 and MX2.
- D. Apply the delete protocols bgp group EVPN multipath multiple-as configuration on MX1 and MX2.

Answer: A

NEW QUESTION # 37
Which two statements are correct about multicast routing tables? (Choose two.)

- A. MBGP and IS-IS place routes in met. 1 directly.
- B. inet. 0 is used for RPF checks.
- C. inet. 2 is used when the multicast forwarding topology differs from unicast forwarding
- D. IS-IS and OSPFv3 place routes in met. 2 directly.

Answer: B,C

Explanation:
Junos OS uses specific routing tables for handling multicast traffic to ensure loop prevention through Reverse Path Forwarding (RPF) checks:
* Multicast RPF (Option C):Theinet.0table is the default unicast routing table. In most standard multicast deployments, Protocol Independent Multicast (PIM) performs itsRPF checksagainst this table to determine the upstream interface toward the multicast source.
* Topology Differences (Option A):Theinet.2table is specifically designed for multicast RPF lookups when themulticast forwarding topology differsfrom the unicast forwarding topology. This is common in environments using Multiprotocol BGP (MBGP) where you might want multicast traffic to follow a different path than standard data traffic.
* inet.1 Role (Option B):Theinet.1table is themulticast forwarding cache. It stores (S,G) and (*,G) entries for actual packet forwarding. Routing protocols like MBGP or IS-IS do not place routesdirectly into inet.1; instead, PIM uses information from inet.0 or inet.2 to populate inet.1.
* IS-IS and OSPFv3 (Option D):These protocols place their IPv4/IPv6 unicast routes into inet.0 or inet6.
0. They do not place routes into inet.2 "directly" unless specific RIB-group configurations or address families are enabled to share those routes for multicast RPF purposes.

NEW QUESTION # 38
