When you decide to choose our product, you have already found the shortcut to success in PSM-I Exam Certification.

Scrum Professional Scrum Master I Sample Questions (Q116-Q121):

NEW QUESTION # 116

When is the Sprint Backlog created?

- A. During the Sprint.
- B. At the beginning of the project.
- C. During the Sprint Planning meeting.
- D. Prior to the Sprint Planning meeting.

Answer: C

Explanation:

The correct answer is B, because the Sprint Backlog is created during the Sprint Planning meeting. The Scrum Guide states that "the Sprint Backlog is the set of Product Backlog items selected for the Sprint, plus a plan for delivering the product Increment and realizing the Sprint Goal."

NEW QUESTION # 117

What is included in the Sprint Backlog?

- A. Tasks.
- B. Tests.
- **C. Any of the above (or others) which are a decomposition of the selected Product Backlog items.**
- D. Use Cases.
- E. User Stories.

Answer: C

NEW QUESTION # 118

What is the time-box for the Sprint Review?

- A. As long as needed.
- **B. 4 hours for a monthly Sprint.**
- C. 4 hours and longer as needed.
- D. 2 hours for a monthly Sprint.
- E. 1 day

Answer: B

Explanation:

According to the Scrum Guide 1 , each event in Scrum is a formal opportunity to inspect and adapt something. These events are specifically designed to enable critical transparency and inspection. Failure to include any of these events results in reduced transparency and is a lost opportunity to inspect and adapt. All events are time-boxed events, such that every event has a maximum duration. Once a Sprint begins, its duration is fixed and cannot be shortened or lengthened. The remaining events may end whenever the purpose of the event is achieved, ensuring an appropriate amount of time is spent without allowing waste in the process. The time-box for the Sprint Review is four hours for a one-month Sprint.

NEW QUESTION # 119

Which are properties of the Daily Scrum? (Choose two.)

- **A. Its location and time remain constant.**
- B. It is free from and designed to promote conversation.
- C. It is facilitated by the team lead.
- D. It is held first thing in the morning.
- E. It consists of the Scrum Master asking the Team members the three questions.
- **F. It is fifteen minutes or less in duration.**

Answer: A,F

NEW QUESTION # 120

The Definition of Done serves which three purposes?

(choose the best three answers)

- A. Guide the Developers on how many Product Backlog items to select for the Sprint.
- **B. Increase transparency.**

- C. Create a shared understanding of when work is complete.
- D. Describe the work that must be mostly done before the Sprint is allowed to end.
- E. Describe the purpose, Objective, and timebox Of each Scrum event.

Answer: B,C,D

Explanation:

The Definition of Done serves the following three purposes:

A . Create a shared understanding of when work is complete.

The Definition of Done is a commitment to the quality of the product increment that is part of Scrum. It is a formal description of the state of the product backlog item or the increment when it meets the quality measures required for the product. The Scrum team must have a shared understanding of what 'done' means and use it to assess when work is complete and transparent¹.

C . Increase transparency.

The Definition of Done increases transparency by providing everyone a shared understanding of what work was completed and what standards were met as part of the increment. This ensures that the product increment is potentially releasable and that the stakeholders can inspect and provide feedback on it².

D . Describe the work that must be mostly done before the Sprint is allowed to end.

The Definition of Done describes the work that must be done before the Sprint is allowed to end. Work cannot be considered part of an increment unless it meets the Definition of Done. The Definition of Done is used to guide the Developers in creating a "Done", usable, and potentially releasable product increment every Sprint³.

B and E are not purposes of the Definition of Done.

B . Guide the Developers on how many Product Backlog items to select for the Sprint.

The Definition of Done does not guide the Developers on how many Product Backlog items to select for the Sprint. The Developers select how many Product Backlog items they can complete within a Sprint based on their capacity, skills, and experience. The Definition of Done helps them ensure that the selected items are completed to a high standard of quality⁴.

E . Describe the purpose, Objective, and timebox Of each Scrum event.

The Definition of Done does not describe the purpose, objective, and timebox of each Scrum event. The Scrum Guide describes these aspects for each Scrum event, such as Sprint Planning, Daily Scrum, Sprint Review, and Sprint Retrospective⁵. The Definition of Done is related to the product increment, not to the Scrum events.
