Google Workspace is a suite of cloud-based productivity and collaboration tools that have become ubiquitous in today's digital workplace. With millions of users worldwide, Google Workspace has transformed the way organizations communicate and work together. To ensure that administrators are equipped with the skills to manage and optimize Google Workspace for their organizations, Google has developed a certification exam - the Google-Workspace-Administrator (Google Cloud Certified - Professional Google Workspace Administrator) Certification Exam.

Google Cloud Certified - Professional Google Workspace Administrator Sample Questions (Q76-Q81):

NEW QUESTION # 76

An employee at your company does not need access to their Workspace account while they are on leave for a year. When they return, you need to ensure they have access to their account and that all their data and current emails remain intact. Also, their shared documents must be available to other users. You must accomplish this goal in the most cost-effective way. What should you do?

- A. Delete the user after copying their emails and reassigning their documents to their manager.
- B. Remove the user license in the Admin console.
- C. Suspend their account in the Admin console.
- D. Assign an Archive User license.

Answer: C

Explanation:

Access the Admin Console: Sign in to your Google Admin console.

Navigate to Users: Click on "Directory" and then "Users."

Find the User Account: Locate the user who is going on leave.

Suspend Account: Click on the user's name to open their account details, then click "Suspend user." Confirm Suspension: Confirm the suspension, which retains all data and settings while disabling access to the account.

Shared Documents: Ensure that their shared documents remain accessible to other users without any interruptions.

Google Workspace Admin Help: Suspend a user

NEW QUESTION # 77

The legal department at your organization is working on a time-critical merger and acquisition (M&A) deal.

They urgently require access to specific email communications from an employee who is currently on leave.

The organization's current retention policy is set to indefinite. You need to retrieve the required emails for the legal department in a manner that ensures data privacy. What should you do?

- A. Temporarily grant the legal department access to the employee's email account with a restricted scope that is limited to the M&A-related emails.
- B. Use Google Vault to create a matter specific to the M&A deal. Search for relevant emails within the employee's mailbox. Export and share relevant emails with your legal department.
- C. Ask a colleague with delegate access to the employee's mailbox to identify and forward the relevant emails to the legal department.
- D. Instruct the IT department to directly access and forward the relevant emails to the legal department.

Answer: B

Explanation:

Using Google Vault to create a matter specific to the M&A deal allows for legal, secure, and privacy- compliant retrieval of emails. You can search for the specific emails related to the merger and acquisition, export them, and share them with the legal department without granting direct access to the employee's mailbox. This approach ensures both data privacy and compliance with organizational policies.

NEW QUESTION # 78

An employee has left your organization, and their Drive data must be retained for three years.

The retention rule has been set for three years. You must ensure the employee's data is visible in Vault and accessible to the Vault Administrator in the most cost-effective way. What should you do?

- A. Export the user's Drive data from Vault, then delete the user.
- B. Change ownership of the Drive data to the user's Manager, then delete the user.
- C. Assign an Archive User (AU) license to the user.
- D. Suspend the user until the end of the three-year period.

Answer: C

NEW QUESTION # 79

Your organization is implementing a new customer support process that uses Gmail. You need to create a cost-effective solution that allows external customers to send support request emails to the customer support team. The requests must be evenly distributed among the customer support agents. What should you do?

- A. Create a Google Group, add the support agents to the group, and set the posting permissions to "Public."
- B. Use delegated access for a specific email address that represents the customer support group, and add the customer support team as delegates for that email address.
- C. Set up an inbox for the customer support team. Provide the login credentials to the customer support team.
- D. Create a Google Group, enable collaborative inbox settings, set posting permissions to "Anyone on the web", and add the customer support agents as group members.

Answer: D

Explanation:

A Google Group with collaborative inbox settings allows you to evenly distribute support request emails among the team. By setting the posting permissions to "Anyone on the web," external customers can send emails directly to the group, and the emails will be distributed to the support agents as tasks. This is a cost-effective solution that also provides an organized way to manage and track customer support requests.

NEW QUESTION # 80

Your client is a 5,000-employee company with a high turn-over rate that requires them to add and suspend user accounts. When new employees are onboarded, a user object is created in Active Directory. They have determined that manually creating the users in Google Workspace Admin Panel is time-consuming and prone to error. You need to work with the client to identify a method of creating new users that will reduce time and error.

What should you do?

- A. Install Google Apps Manager to automate add-user scripts.
- B. Install Google Workspace Sync for Microsoft Outlook on all employees' computers.
- C. Install Google Cloud Directory Sync on all Domain Controllers.
- D. Install Google Cloud Directory Sync on a supported server.

Answer: D
