The Entry Certificate in Business Analysis (ECBA) is a certification offered by the International Institute of Business Analysis (IIBA) to individuals who are new to the field of business analysis. It is an entry-level certification that validates the candidate's knowledge and understanding of the fundamental concepts and techniques of business analysis. The ECBA Certification is globally recognized and demonstrates the candidate's commitment to professional development and continuous learning.

The International Institute of Business Analysis (IIBA) is a professional association that provides certification and training for business analysts. One of the certifications offered by IIBA is the Entry Certificate in Business Analysis (ECBA) certification exam. Entry Certificate in Business Analysis (ECBA) certification is designed for individuals who are beginning their career in business analysis or professionals who want to demonstrate their knowledge in the field.

IIBA Entry Certificate in Business Analysis (ECBA) Sample Questions (Q71-Q76):

NEW QUESTION # 71

Inputs to prepare for elicitation include:

- A. information management approach and solution scope.
- **B. needs and stakeholder engagement approach.**
- C. requirements and designs.
- D. future state description and risk analysis results.

Answer: B

Explanation:

The inputs required to prepare for elicitation are primarily focused on understanding the business needs and the stakeholder engagement approach. This involves recognizing the business requirements to define the scope and purpose of the elicitation activities and comprehending the stakeholders' collaboration and communication needs to plan the elicitation activity effectively.

References: The information is verified as per the Business Analysis Learning documents, specifically from the BABOK Guide and resources provided by IIBA12.

NEW QUESTION # 72

Which action would a business analyst (BA) propose to improve the operation of the business?

- A. Assist in the daily activities
- **B. Simplify the work people perform**
- C. Outsource the operation team
- D. Shadow the expert staff

Answer: B

Explanation:

A business analyst (BA) aims to improve the efficiency and effectiveness of business operations. Simplifying the work people perform can lead to streamlined processes, reduced errors, and increased productivity. This approach aligns with the core objectives of business analysis, which include understanding and defining requirements, analyzing business processes, and recommending solutions that deliver value to stakeholders. Simplification often involves removing unnecessary steps, automating tasks, and optimizing workflows, which are key activities in business process improvement. Reference: The BABOK Guide outlines the importance of simplifying processes as part of the requirements analysis and design definition. It emphasizes the role of the BA in identifying areas where complexity can be reduced to improve business operations. Additionally, the Business Analysis Learning documents highlight the significance of process simplification in achieving operational excellence and delivering business value.

NEW QUESTION # 73

Which criteria are necessary when the requirements express contractual obligations?

- A. Solution
- **B. Acceptance**
- C. Evaluation
- D. Approval

Answer: B

NEW QUESTION # 74

If inconsistencies arise between different elicitation results, the business analyst (BA) should:

- A. report them to the project manager.
- **B. resolve them through collaboration.**
- C. reconcile them through experience.
- D. escalate them to the business sponsor.

Answer: B

Explanation:

The BABOK Guide emphasizes the importance of collaboration when inconsistencies are found between elicitation results. It suggests that business analysts should work together with stakeholders to resolve variations identified in the results. This collaborative approach is essential for ensuring that the information is consistent and accurately represented, and it helps to uncover

any discrepancies or ambiguities early in the process, which can prevent costly errors or delays later on.

NEW QUESTION # 75

What is the purpose of brainstorming?

- A. To collaboratively choose a final design
- B. To improve stakeholder collaboration
- C. To receive feedback on a design or prototype
- D. To produce numerous new ideas

Answer: D

Explanation:

The purpose of brainstorming is to generate a large number of creative ideas in a short time, usually in a group setting. It is especially useful during early stages of analysis or design, where exploring multiple options is critical.

BABOK Reference - Technique: Brainstorming (Section 10.5):

"Brainstorming is used to produce numerous new ideas, and to derive from them themes for further analysis."

NEW QUESTION # 76
