With this certification, you will get international recognition and acceptance. Then you no longer need to worry about being fired by your boss.

### Pegasystems Certified Pega System Architect 24 Sample Questions (Q209-Q214):

#### NEW QUESTION # 209

Which two components are required when configuring a PegaUnit test case? (Choose Two)

- A. Expected Output
- B. SLA Policy
- C. Work Queue
- D. Test Data

**Answer: A,D**

Explanation:

A PegaUnit test case requires test data (input values) and an expected output to compare against the actual result. This ensures that rules, decisions, and flows function correctly. Proper test configuration identifies defects early in development. This improves test accuracy and automation.

#### NEW QUESTION # 210

Which type of data source retrieves external data in real-time?

- A. Lookup Table
- B. Data Transform
- C. Connector
- D. Value List

**Answer: C**

Explanation:

A Connector integrates with external systems to retrieve real-time data when needed. It allows Pega to interact with web services, REST APIs, and databases. This ensures that applications use the most up- to-date information. Connectors improve system interoperability and data accuracy.

#### NEW QUESTION # 211

Which feature in Pega ensures that data entered in a form meets business requirements?

- A. Data Page
- B. Data Transform
- C. Validation Rule
- D. Decision Table

**Answer: C**

Explanation:

A Validation Rule ensures that user-entered data meets predefined conditions before processing. It helps prevent incorrect or incomplete data from being saved in a case. Validation rules can enforce formats, range limits, and required fields. They improve data accuracy and process reliability.

### NEW QUESTION # 212

Which Data Page scope ensures that a case always retrieves the latest version of sourced data?

- A. Thread
- B. Node
- C. Requestor
- **D. Case**

**Answer: D**

Explanation:

A Case-scoped Data Page ensures that each case maintains and updates its own version of sourced data. This is useful when case-specific information, such as approvals or customer details, needs to be refreshed per transaction. It prevents unintended data sharing between cases. This scope improves data isolation and accuracy.

### NEW QUESTION # 213

Which two types of Data Pages can be used in Pega? (Choose Two)

- **A. Editable Data Page**
- B. SLA-Based Data Page
- **C. Read-Only Data Page**
- D. Decision-Based Data Page

**Answer: A,C**

Explanation:

A Read-Only Data Page fetches and caches external or internal data but does not allow modifications.

An Editable Data Page enables updates to sourced data, which can later be saved back to a system of record. These Data Pages optimize performance and data retrieval. SLA-based and decision-based pages do not exist in Pega.

### NEW QUESTION # 214

.....

The web-based PEGACPSA24V1 practice test is accessible via any browser. This PEGACPSA24V1 mock exam simulates the actual Pegasystems PEGACPSA24V1 exam and does not require any software or plugins. Compatible with iOS, Mac, Android, and Windows operating systems, it provides all the features of the desktop-based PEGACPSA24V1 Practice Exam software.
