## IAPP Certified Information Privacy Manager (CIPM) Sample Questions (Q194-Q199):

### NEW QUESTION # 194

Under the General Data Protection Regulation (GDPR), when would a data subject have the right to require the erasure of his or her data without undue delay?

- A. When the data is no longer necessary for its original purpose.
- B. When the erasure is in the public interest.
- C. When the processing is carried out by automated means.
- D. When the data subject is a public authority.

**Answer: A**

Explanation:

Explanation

This answer is one of the situations when a data subject would have the right to require the erasure of his or her data without undue delay under the General Data Protection Regulation (GDPR), which is also known as the right to be forgotten or the right to erasure. This right allows a data subject to request that a data controller deletes his or her personal data when one of the following grounds applies:

- \* The data is no longer necessary for its original purpose.
- \* The data subject withdraws his or her consent for processing.
- \* The data subject objects to processing based on legitimate interests or direct marketing.
- \* The processing is unlawful or violates other laws or regulations.
- \* The processing is related to online services offered to children.

### NEW QUESTION # 195

Under the General Data Protection Regulation (GDPR), what are the obligations of a processor that engages a sub-processor?

- A. The processor must give the controller prior written notice and perform a preliminary audit of the sub-processor.
- B. The processor must receive a written agreement that the sub-processor will be fully liable to the controller for the performance of its obligations in relation to the personal data concerned.
- C. The processor must Obtain the controllers specific written authorization and provide annual reports on the sub-processor's performance.
- D. The processor must obtain the consent of the controller and ensure the sub-processor complies with data processing obligations that are equivalent to those that apply to the processor.

**Answer: D**

Explanation:

Explanation

Under the General Data Protection Regulation (GDPR), the obligations of a processor that engages a sub-processor are to obtain the consent of the controller and ensure the sub-processor complies with data processing obligations that are equivalent to those that apply to the processor. The GDPR defines a processor as a natural or legal person, public authority, agency, or other body that processes personal data on behalf of the controller. A sub-processor is a third party that is engaged by the processor to carry out specific processing activities on behalf of the controller. The GDPR requires that the processor does not engage another processor without prior specific or general written authorization of the controller. In the case of general written authorization, the processor must inform the controller of any intended changes concerning the addition or replacement of other processors, thereby giving the controller the opportunity to object to such changes. The processor must also ensure that the same data protection obligations as set out in the contract or other legal act between the controller and the processor are imposed on that other processor by way of a contract or other legal act under Union or Member State law, . ### NEW QUESTION # 196

Which is TRUE about the scope and authority of data protection oversight authorities?

- A. No one agency officially oversees the enforcement of privacy regulations in the United States
- B. The Office of the Privacy Commissioner (OPC) of Canada has the right to impose financial sanctions on violators

- C. All authority in the European Union rests with the Data Protection Commission (DPC)
- D. The Asia-Pacific Economic Cooperation (APEC) Privacy Frameworks require all member nations to designate a national data protection authority

**Answer: B**

### NEW QUESTION # 197

#### SCENARIO

Please use the following to answer the next QUESTION:

Manasa is a product manager at Omnipresent Omnimedia, where she is responsible for leading the development of the company's flagship product, the Handy Helper. The Handy Helper is an application that can be used in the home to manage family calendars, do online shopping, and schedule doctor appointments.

After having had a successful launch in the United States, the Handy Helper is about to be made available for purchase worldwide. The packaging and user guide for the Handy Helper indicate that it is a "privacy friendly" product suitable for the whole family, including children, but does not provide any further detail or privacy notice. In order to use the application, a family creates a single account, and the primary user has access to all information about the other users. Upon start up, the primary user must check a box consenting to receive marketing emails from Omnipresent Omnimedia and selected marketing partners in order to be able to use the application.

Sanjay, the head of privacy at Omnipresent Omnimedia, was working on an agreement with a European distributor of Handy Helper when he fielded many Questions about the product from the distributor. Sanjay needed to look more closely at the product in order to be able to answer the Questions as he was not involved in the product development process.

In speaking with the product team, he learned that the Handy Helper collected and stored all of a user's sensitive medical information for the medical appointment scheduler. In fact, all of the user's information is stored by Handy Helper for the additional purpose of creating additional products and to analyze usage of the product. This data is all stored in the cloud and is encrypted both during transmission and at rest.

Consistent with the CEO's philosophy that great new product ideas can come from anyone, all Omnipresent Omnimedia employees have access to user data under a program called Eureka. Omnipresent Omnimedia is hoping that at some point in the future, the data will reveal insights that could be used to create a fully automated application that runs on artificial intelligence, but as of yet, Eureka is not well-defined and is considered a long-term goal.

What step in the system development process did Manasa skip?

- A. Work with Sanjay to review any necessary privacy requirements to be built into the product.
- B. Build the artificial intelligence feature so that users would not have to input sensitive information into the Handy Helper.
- C. Obtain express written consent from users of the Handy Helper regarding marketing.
- **D. Certify that the Handy Helper meets the requirements of the EU-US Privacy Shield Framework.**

**Answer: D**

### NEW QUESTION # 198

How do privacy audits differ from privacy assessments?

- A. They are conducted by external parties.
- B. They are evidence-based.
- **C. They are based on standards.**
- D. They are non-binding.

**Answer: C**

### NEW QUESTION # 199

.....

The trick to the success is simply to be organized, efficient, and to stay positive about it.
