C_CPI_2506 Test Lab Questions - C_CPI_2506 Popular Exams

Our C_CPI_2506 study materials are easy to be mastered and boost varied functions. We compile Our C_CPI_2506 preparation questions elaborately and provide the wonderful service to you thus you can get a good learning and preparation for the C_CPI_2506 exam. Now there are introduces on the web for you to know the characteristics and functions of our C_CPI_2506 Training Materials in detail. And we also have free demo on the web for you to have a try on our C_CPI_2506 exam questions. You will be touched by our great quality of C_CPI_2506 study guide.

SAP C_CPI_2506 Exam Syllabus Topics:

Topic	Details
Topic 1	<ul style="list-style-type: none">Implementing Cloud Integration: This section of the exam measures the skills of Integration Consultants and examines how cloud integration flows are designed and deployed. It emphasizes creating integration scenarios, handling connectivity, and applying best practices to build efficient, secure, and reliable integration processes in SAP's cloud environment.
Topic 2	<ul style="list-style-type: none">Managing APIs: This section of the exam measures the skills of Solution Architects and focuses on managing APIs within the SAP ecosystem. It covers topics such as API provisioning, lifecycle management, security policies, and monitoring, ensuring candidates can handle APIs effectively for enterprise integration needs.
Topic 3	<ul style="list-style-type: none">SAP Event Mesh: This section of the exam measures the skills of Solution Architects and centers on using SAP Event Mesh to support event-driven integration. It highlights the importance of asynchronous communication, event publishing, and subscription models, allowing organizations to build scalable and decoupled systems.
Topic 4	<ul style="list-style-type: none">SAP Integration Suite Overview: This section of the exam measures the skills of Integration Consultants and covers the foundational concepts of the SAP Integration Suite. It provides an understanding of the suite's capabilities, its role in connecting applications, and its relevance in modern cloud-based integration scenarios.

SAP Certified Associate - Integration Developer Sample Questions (Q33-Q38):

NEW QUESTION # 33

You want to access individual entities of an HTTP call over XPath. What must you do if no namespace mapping exists?

- A. Remove the XML prolog.
- **B. Remove the namespaces.**
- C. Convert the namespaces to XML
- D. Convert the namespaces to JSON.

Answer: B

Explanation:

If no namespace mapping exists, you must remove the namespaces to access individual entities of an HTTP call over XPath.

Namespaces are prefixes that identify the source or context of an XML element or attribute. If the namespaces are not mapped to a URI, they can cause errors or conflicts when using XPath expressions. Therefore, you must remove the namespaces before applying XPath queries.

Modernize Integration with SAP Integration Suite | openSAP

NEW QUESTION # 34

What are some aspects of "holistic integration" of the SAP Integration Suite? Note: 3 answers are correct.

- **A. Event Integration**
- **B. Data Integration**
- C. Domain Integration
- D. Cloud Integration

- E. Process Integration

Answer: A,B,E

Explanation:

Some aspects of "holistic integration" of the SAP Integration Suite are process integration, event integration, and data integration. Process integration refers to the orchestration and automation of business processes across different systems and applications. Event integration refers to the communication and coordination of events between different sources and consumers. Data integration refers to the extraction, transformation, and loading of data between different sources and targets. Reference: Integration Software | SAP Integration Suite, Modernize Integration with SAP Integration Suite | openSAP

NEW QUESTION # 35

Using the Test Connectivity function, you want to test a connection to a backend system. The connection is provided by a Cloud Connector. Which parameter is required for the connection test?

- A. Host
- B. Location ID
- C. Connector ID
- D. Subaccount ID

Answer: B

Explanation:

To test a connection to a backend system that is provided by a Cloud Connector, you must specify the location ID as a parameter for the connection test. The location ID is a unique identifier that represents a Cloud Connector instance in a specific network location. It is used to route requests from SAP Integration Suite to the correct Cloud Connector instance and then to the backend system. You can find the location ID in the Cloud Connector administration UI under Configuration Location ID. Reference: Cloud Connector Connectivity Tests | SAP Help Portal, Cloud Connector Configuration | SAP Help Portal

NEW QUESTION # 36

What is a characteristic of a product in the API Management capability within SAP Integration Suite?

- A. It encapsulates the API provider.
- B. It is deployed as a separate artifact on the API business hub enterprise
- C. It is a separate artifact and is required for basic authentication.

Answer: B

Explanation:

A product in the API Management capability within SAP Integration Suite is a bundle of one or more API proxies that are grouped together for a specific business scenario or use case. A product is a separate artifact that can be deployed to the API business hub enterprise, which is a centralized platform for discovering, consuming, and managing APIs. A product can have its own metadata, such as name, title, description, quota limits, and so on. A product can also have its own policies that apply to all the APIs included in it. Reference: Create a Product | SAP Help Portal, API Business Hub Enterprise | SAP Help Portal

NEW QUESTION # 37

You want to integrate a SOAP adapter into an integration process and enable the adapter to send messages to the integration flow. Which user role must you set up in the SOAP adapter?

- A. ESBMessaging send
- B. MessagingSend
- C. MessagingsendtoCI

Answer: A

Explanation:

To integrate a SOAP adapter into an integration process and enable the adapter to send messages to the integration flow, you must set up the ESBMessaging send user role in the SOAP adapter. The ESBMessaging send user role grants the permission to send

messages to the Enterprise Service Bus (ESB) of the Cloud Integration capability. The ESB is responsible for routing and delivering messages between different integration flows and adapters. Reference: Modernize Integration with SAP Integration Suite | openSAP

NEW QUESTION # 38

.....

Our C_CPI_2506 practice materials are classified as three versions up to now. All these versions are popular and priced cheap with high quality and accuracy rate. They achieved academic maturity so that their quality far beyond other practice materials in the market with high effectiveness and more than 98 percent of former candidates who chose our C_CPI_2506 practice materials win the exam with their dream certificate. Our C_CPI_2506 practice materials made them enlightened and motivated to pass the exam within one week, which is true that someone did it always. The number is real proving of our C_CPI_2506 practice materials rather than spurious made-up lies.
