These professional knowledge will become a springboard for your career, help you get the favor of your boss, and make your career reach it is peak. What are you waiting for? Come and take Chrome-Enterprise-Administrator Preparation questions home.

## Google Professional Chrome Enterprise Administrator Certification Exam Sample Questions (Q34-Q39):

### NEW QUESTION # 34

An administrator wants users to have the ability to install extensions of their choosing. However, due to company security policies, the administrator cannot allow any extension to be installed that has the ability to read documents on the local drive. Which policy combination best meets the administrator's need?

- A. Chrome Webstore: Block all apps, admin manages allowlist; Block extensions by permission: Sync File System
- B. Chrome Webstore: Allow all apps, admin manages blocklist; Runtime Blocked Hosts: C:\\*
- C. Chrome Webstore: Allow all apps, admin manages blocklist; Runtime Blocked Hosts: file:///\*
- **D. Chrome Webstore: Allow all apps, admin manages blocklist; Block extensions by permission: File System**

**Answer: D**

Explanation:

To allow users to install extensions while blocking those with specific risky permissions, the administrator should "Allow all apps" from the Chrome Web Store and then use the "Block extensions by permission" policy to block extensions that request the "File System" permission. This prevents extensions from accessing local files. Option A is too restrictive by blocking all apps by default. Options B and D use "Runtime Blocked Hosts," which is for controlling access to specific websites, not for blocking extension permissions.

### NEW QUESTION # 35

An organization using Chrome browser on Windows has policies from group policy and Chrome Enterprise Core. In what order are the policies applied?

- **A. By the precedence hierarchy**
- B. Group policy takes precedence
- C. Cloud policy takes precedence
- D. From least restrictive to most restrictive

**Answer: A**

Explanation:

When both Group Policy (local machine policy) and Chrome Enterprise Core (cloud policy) are configured on a Windows device, the effective policy is determined by a defined order of precedence. Generally, cloud policies for managed browsers will override conflicting local policies. The specific precedence order is configurable, but it follows a hierarchical structure where certain policy sources take priority over others.

Options C and D present a simplified view that might not always be the case depending on the configuration.

Option B is a general principle of conflict resolution but doesn't describe the specific order in Chrome policy application.

### NEW QUESTION # 36

A small business wants to have all of their macOS devices enroll in Chrome Enterprise Core. They do not have a Mobile Device Management solution but do maintain a base image for their Mac computers. Where should they put the enrollment token\*?

- A. /etc/opt/chrome/policies/enrollment/CloudManagementEnrollmentToken
- B. /Library/Google/Chrome/Enrollment/DeviceManagementToken
- C. HKEY\_LOCAL\_MACHINE\SOFTWARE\Policies\Google\Chrome\CloudManagementEnrollmentToken
- **D. /Library/Google/Chrome/CloudManagementEnrollmentToken**

**Answer: D**

Explanation:

For macOS devices without MDM, the enrollment token can be embedded in the base image. The correct path for placing the cloud management enrollment token on macOS is `/Library/Google/Chrome/CloudManagementEnrollmentToken`. The other paths listed are for Windows Registry (A), a non-standard Linux path (C), and a potentially incorrect macOS path (D).

#### NEW QUESTION # 37

A browser administrator is looking to deploy Chrome Enterprise Core and build a configuration that supports both managed device browsers as well as managed profiles Company

- Employees
- Users
- Contractors

If this is the current organizational unit (OU) structure in the Google Admin console, which change should the administrator make to the structure to support the desired use case?

- A. Create a Managed Browsers OU nested under the Users OU
- B. Create a Managed Browsers OU nested under the Contractors OU
- **C. Create a Managed Browsers OU nested under the Company OU**
- D. Create a Managed Browsers OU nested under the Employees OU

**Answer: C**

Explanation:

To effectively manage both managed device browsers (which apply policies at the device level) and managed profiles (which apply policies at the user profile level), creating a separate OU at the top level (under

"Company") or directly under it, specifically for "Managed Browsers," is the recommended approach. This allows for distinct policies tailored to the browser instance, regardless of the user signed in. Nesting under specific user OUs (Employees, Users, Contractors) would complicate the management of shared devices or scenarios where different user types might use the same managed browser.

#### NEW QUESTION # 38

The security team has a request to approve two extensions with similar functionality. They only want to approve one extension for use in the environment to avoid redundancy What is an objective measurement that the security team can use to help determine which extension may be safer to use?

- A. Chrome Manifest Version
- B. Permission Count
- C. Chrome Web Store Ratings
- **D. 3rd Party Risk Score**

**Answer: D**

Explanation:

A "3rd Party Risk Score" provides an objective assessment of the extension's security and privacy risks, often based on automated analysis of its code, requested permissions, developer reputation, and other factors. This is a more data-driven approach to evaluating safety compared to simply counting permissions (which doesn't account for the sensitivity of each permission), the Manifest version (which indicates features but not necessarily safety), or Chrome Web Store ratings (which are subjective and can be manipulated).

#### NEW QUESTION # 39

.....

Nowadays, it is widely believed that getting a certificate is quite important for some jobs. Chrome-Enterprise-Administrator Exam Braindumps contain the main knowledge of the exam, and it will help you pass the exam. Chrome-Enterprise-Administrator exam dumps not only have the quality, but also have the quantity, and it's enough for you to practice.
