

Analytics-Con-301 PDF Testsoftware - Analytics-Con-301 PDF

OVERZICHT SOFTWARE MODULES

OVER TRENDIC

TrendIC is opgericht in 2002 en levert software voor Test Automation, Service Level Management, Application Management en Performance & Capacity Management. TrendIC vertegenwoordigt in de Benelux onder meer de softwareoplossingen ICTAutomation, CitraTest, SeeTest, SightLine (Performance & Capacity Management) en iDashboards (online rapportage tool). Ook in de UK is er een TrendIC vestiging.

De unieke manier en stabiele manier van test automatisering - onder meer via image en OCR tekstherkenning - heeft geleid tot een snelle uitbreiding van het aantal gebruikers. Enkele gerenommeerde namen in de klantenlijst zijn Dienst Justitiële Inrichtingen (DJI), ProRail, Grontmij, CZ Zorgverzekeringen, DocData, Allshare, Provincie Noord-Brabant, Provincie Zuid-Holland, Brabant Water en FloraHolland.

ICTESTAUTOMATION SUITE

De ICTAutomation Suite wordt door TrendIC ontwikkeld. Juist in heterogene omgevingen en bij ketenintegratie- en regressietesten blijkt onze oplossing van grote waarde, omdat de gebruikersinterface als startpunt wordt genomen. Zo worden alle typen applicaties en infrastructuur op een uniforme manier geautomatiseerd getest. De ICTAutomation Suite test op zowel functionaliteit (acceptatietesten, regressietesten etc.) als op performance. Zonder te programmeren, ongeacht de onderliggende code of programmeertaal.

ICTAutomation kan alle tijdrovende manuele testhandelingen automatiseren, zodat software releases, security patches, hardware systemen of andere wijzigingen snel en veilig in gebruik kunnen worden genomen. Het resultaat: risicoreductie, tijdswinst, snellere doorlooptijd, minder incidenten, kortere time-to-market.

-  Het maken van tests kan nu nog sneller! Voer de test eenmalig uit en neem hierbij een filmpje op. De opgenomen testdefinitie past u vervolgens achteraf met een handige wizard aan.
-  Snelle testdefinitie- zonder te programmeren. Laat elke eindgebruiker/functioneel beheerder of tester testdefinities maken, met een bijzonder korte leercurve.
-  Met ongeveer 20 herkenbare commando's automatiseert u alle tests. Hierbij wordt gebruik gemaakt van images en geavanceerde tekstherkenning (OCR). Bovendien heeft u de optie om uw eigen applicatiespecifieke testfuncties toe te voegen.
-  Modulaire opzet, bewaar uw gekozen teststappen direct voor eenvoudig hergebruik. Combineer testcases in meerdere logische scenario's - en verifieer uw bedrijfsprocessen over meerdere applicaties.
-  Geavanceerde scheduling. Plan testuitvoering periodiek in, bijvoorbeeld 's nachts, elke ochtend en/of in het weekend.

Als eine zuverlässige Website versprechen wir Ihnen, Ihre persönliche Informationen nicht zu verraten und die Sicherheit Ihrer Bezahlung zu garantieren. Deshalb können Sie unsere Salesforce Analytics-Con-301 Prüfungssoftware ganz beruhigt kaufen. Wir haben eine große Menge IT-Prüfungsunterlagen. Wenn Sie neben Salesforce Analytics-Con-301 noch an anderen Prüfungen Interesse haben, können Sie auf unsere Website online konsultieren. Wir wünschen Ihnen viel Erfolg bei der Salesforce Analytics-Con-301 Prüfung!

Salesforce Analytics-Con-301 Prüfungsplan:

Thema	Einzelheiten
Thema 1	Business Analysis: This section of the exam measures skills of Tableau Consultants focusing on evaluating the current state of analytics within an organization. It covers mapping business needs to Tableau capabilities, translating analytical requirements to best practices in Tableau, and recommending appropriate deployment options like Tableau Server or Tableau Cloud. It also includes evaluating existing data structures for supporting business needs and identifying performance risks and opportunities.

Thema 2	IT Management: This domain measures skills related to managing Tableau environments. It includes planning server upgrades, recommending deployment solutions (on-premise or cloud), and ensuring alignment between technical and business requirements for analytics infrastructure. It also involves troubleshooting and optimizing system performance relevant to Tableau Server and Cloud deployments.
Thema 3	Business Consulting: For Tableau Consultants, this section involves designing and troubleshooting calculations and workbooks to meet advanced analytical use cases. It covers selecting appropriate chart types, applying Tableau's order of operations in calculations, building interactivity into dashboards, and optimizing workbook performance by resolving resource-intensive queries and other design-related issues.
Thema 4	Data Management: This part focuses on establishing governance and support for published content. Tableau Consultants are expected to manage data security, publish and maintain data sources and workbooks, and oversee content access. It includes applying governance best practices, using metadata APIs, and supporting administration functions to maintain data integrity and accessibility.
Thema 5	Data Analysis: This domain targets Tableau Consultants to plan and prepare data connections effectively. It includes recommending data transformation strategies, designing row-level security (RLS) data structures, and implementing advanced data connections such as Web Data Connectors and Tableau Bridge. Skills in specifying granularity and aggregation strategies for data sources across Tableau products are emphasized.

Analytics-Con-301 PDF - Analytics-Con-301 Zertifikatsdemo

Mit der Ankunft der Flut des Informationszeitalters im 21. Jahrhundert müssen die Menschen ihre Kenntnisse verbessern, um sich dem Zeitalter anzupassen. Aber das ist noch nicht genügend. In der IT-Branche ist Salesforce Analytics-Con-301 Zertifizierungsprüfung ganz notwendig. Aber diese Prüfung ist ganz schwierig. Sie können auch internationale Anerkennung und Akzeptanz erhalten, eine glänzende Zukunft haben und ein hohes Gehalt beziehen. It-Prüfung verfügt über die weltweit zuverlässigsten IT-Schulungsmaterialien und mit ihm können Sie Ihre wunderbare Pläne realisieren. We garantieren Ihnen 100%, die Prüfung zu bestehen. Bewerber, die an der Salesforce Analytics-Con-301 Zertifizierungsprüfung teilnehmen, warum zögern Sie noch. Schnell, bitte!

Salesforce Certified Tableau Consultant Analytics-Con-301 Prüfungsfragen mit Lösungen (Q70-Q75):

70. Frage

A client has many published data sources in Tableau Server. The data sources use the same databases and tables. The client notices different departments give different answers to the same business questions, and the departments cannot trust the data. The client wants to know what causes data sources to return different data.

Which tool should the client use to identify this issue?

- A. Tableau Catalog
- B. Tableau Prep Conductor
- C. Ask Data
- D. Tableau Resource Monitoring Tool

Antwort: A

Begründung:

The Tableau Catalog is part of the Tableau Data Management Add-on and is designed to help users understand the data they are using within Tableau. It provides a comprehensive view of all the data assets in Tableau Server or Tableau Online, including databases, tables, and fields. It can help identify issues such as data quality, data lineage, and impact analysis. In this case, where different departments are getting different answers to the same business questions, the Tableau Catalog can be used to track down inconsistencies and ensure that everyone is working from the same, reliable data source.

References: The recommendation for using Tableau Catalog is based on its features that support data discovery, quality, and governance, which are essential for resolving data inconsistencies across different departments¹².

When different departments report different answers to the same business questions using the same databases and tables, the issue

often lies in how data is being accessed and interpreted differently across departments. Tableau Catalog, a part of Tableau Data Management, can be used to solve this problem:

Visibility: Tableau Catalog gives visibility into the data used in Tableau, showing users where data comes from, where it's used, and who's using it.

Consistency and Trust: It helps ensure consistency and trust in data by providing detailed metadata management that can highlight discrepancies in data usage or interpretation.

Usage Metrics and Lineage: It offers tools for tracking usage metrics and understanding data lineage, which can help in identifying why different departments might see different results from the same underlying data.

References:

Tableau Catalog Usage: The Catalog is instrumental in providing a detailed view of the data environment, allowing organizations to audit, track, and understand data discrepancies across different users and departments.

71. Frage

A client has a large data set that contains more than 10 million rows.

A consultant wants to calculate a profitability threshold as efficiently as possible. The calculation must classify the profits by using the following specifications:

- . Classify profit margins above 50% as Highly Profitable.
- . Classify profit margins between 0% and 50% as Profitable.
- . Classify profit margins below 0% as Unprofitable.

Which calculation meets these requirements?

- A. IF [ProfitMargin]>0.50 Then 'Highly Profitable'
ELSEIF [ProfitMargin]>=0 Then 'Profitable'
ELSEIF [ProfitMargin] <0 Then 'Unprofitable'
END
- B. IF [ProfitMargin]>=0.50 Then 'Highly Profitable'
ELSEIF [ProfitMargin]>=0 Then 'Profitable'
ELSE 'Unprofitable'
END
- C. IF [ProfitMargin]>0.50 Then 'Highly Profitable'
ELSEIF [ProfitMargin]>=0 Then 'Profitable'
ELSE 'Unprofitable'
END
- D. IF([ProfitMargin]>=0.50,'Highly Profitable', 'Profitable')
ELSE 'Unprofitable'
END

Antwort: B

Begründung:

The correct calculation for classifying profit margins into categories based on specified thresholds involves the use of conditional statements that check ranges in a logical order:

Highly Profitable Classification: The first condition checks if the profit margin is 50% or more. This must use the ">=" operator to include exactly 50% as "Highly Profitable".

Profitable Classification: The next condition checks if the profit margin is between 0% and 50%. Since any value falling at or above 50% is already classified, this condition only needs to check for values greater than or equal to 0%.

Unprofitable Classification: The final condition captures any remaining scenarios, which would only be values less than 0%.

References:

Logical Order in Conditional Statements: It is crucial in programming and data calculation to ensure that conditions in IF statements are structured in a logical and non-overlapping manner to accurately categorize all possible values.

72. Frage

A consultant is designing a dashboard that will be consumed on desktops, tablets, and phones. The consultant needs to implement a dashboard design that provides the best user experience across all the platforms.

Which approach should the consultant take to achieve these results?

- A. Build one dashboard for each type of device and fix the size of the layouts.
- B. Build one dashboard that has desktop, tablet, and phone layouts, and fix the size of the layouts.

- C. Build one dashboard and set the size to Automatic.
- D. Build one dashboard and fix the size of the dashboard.

Antwort: B

Begründung:

For a consultant designing a dashboard to be consumed across multiple device types, the best approach is:

* Multi-device Layout: Tableau provides the capability to design device-specific layouts within a single dashboard. This feature allows the dashboard to adapt its layout to best fit the screen size and orientation of desktops, tablets, and phones.

* Fixed Size Layouts: By fixing the size of each layout, the consultant can ensure that the dashboard appears consistent and maintains the intended design elements and user experience across devices.

Fixed sizes prevent components from resizing in ways that could disrupt the dashboard's readability or functionality.

* Implementation: In Tableau, you can create these layouts by selecting 'Device Preview' and adding custom layouts for each device type. Here, you define the dimensions and the positioning of sheets and controls tailored to each device's typical viewing mode.

References

This approach leverages Tableau's device designer capabilities, which are specifically designed to optimize dashboards for multiple viewing environments, ensuring a seamless user experience regardless of the device used. This functionality is well documented in Tableau's official guides on creating and managing device-specific dashboards.

73. Frage

A Tableau Server customer is interested in measuring content and platform usage. Which two features should the consultant use? Choose two.

- A. Admin Insights page
- B. Server Status page
- C. Tableau Server repository
- D. Tableau Pulse

Antwort: A,C

Begründung:

Comprehensive and Detailed Explanation From Exact Extract:

Two Tableau Server features provide usage and adoption insights:

Tableau Server Repository

* Stores all metadata about:

* Workbooks

* Data sources

* User activity

* View traffic

* Can be queried directly for content usage and platform metrics.

Admin Insights Page

* Built-in dashboards showing:

* User activity

* Content usage

* Data source usage

* Performance metrics

* Designed specifically for monitoring platform adoption.

These two together give complete content and usage visibility.

Why A and D are incorrect:

A). Tableau Pulse

* Available only in Tableau Cloud, not Tableau Server.

* Focuses on personalized metric insights, not platform reporting.

D). Server Status Page

* Shows node health and process status, not content usage or adoption analytics.

Thus, correct answers are B and C.

* Tableau Server auditing and usage documentation describing repository tables.

* Admin Insights documentation describing built-in content and user monitoring.

74. Frage

A client wants guidance for Creators to build efficient extracts from large data sources. What are three Tableau best practices that the Creators should use? Choose three.

- A. Use aggregate data for visible dimensions, whenever possible.
- B. Keep only the data required for analysis by using extract filters.
- C. Use only live connections as they are always faster than extracts.
- D. Include all the data from the original data source in the extract.
- E. Hide all unused fields.

Antwort: A,B,E

Begründung:

To build efficient extracts from large data sources, it is crucial to minimize the load and optimize the performance of the extracts:

A . Keep only the data required for analysis by using extract filters: This best practice involves using filters to reduce the volume of data extracted, thus focusing only on the data necessary for analysis.

B . Use aggregate data for visible dimensions, whenever possible: Aggregating data at the time of extraction reduces the granularity of the data, which can significantly improve performance and reduce the size of the extract.

E . Hide all unused fields: Removing fields that are not needed for analysis from the extract reduces the complexity and size of the data model, which in turn enhances performance and speeds up load times.

These practices are endorsed in Tableau's official documentation and training sessions as effective ways to enhance the performance of Tableau extracts and optimize dashboard responsiveness.

75. Frage
