Salesforce Certified Field Service Consultant Sample Questions (Q156-Q161):

NEW QUESTION # 156

AW Computing technicians handle different kinds of jobs, many of which involve installing or replacing parts. Having the appropriate inventory is critical to completing the jobs on time.

How should field service be configured to ensure the parts required for a job are listed correctly on the work order?

- A. Ensure the product items are available in inventory.
- B. Include the required products in the work type.
- C. Add the product fields to the work order layout.
- D. Create a flow to add the products to the work order.

Answer: C

Explanation:

A quick action is used to create a record from another record with predefined field values. By defining a quick action to create a new service appointment from an existing one, the technician can easily create an additional visit to complete unfinished work.

References: https://help.salesforce.com/s/articleView?id=sf.fsl_quick_actions.htm&type=5 Work types are used to define the standard duration and skills required for a specific type of work. They can also include the required products that are needed for the work. By including the required products in the work type, the system can automatically add them to the work order when the work type is selected.

NEW QUESTION # 157

Universal Containers performs multi-staged jobs, where the second job can only begin after completion of the first job. How should a Consultant recommend implementing this process?

- A. Create two Service Appointments and schedule them to the same Resource.
- B. Create one Service Appointment and schedule it to two different Resources.
- C. Create one Service Appointment with the total duration of the two jobs and assign two Resources.
- **D. Create two Service Appointments, set the Related Service Appointment and Time Dependency.**

Answer: D

Explanation:

To perform multi-staged jobs, where the second job can only begin after completion of the first job, two service appointments can be created and linked by setting the Related Service Appointment field on the second service appointment to point to the first one, and setting the Time Dependency field to After Previous.

Creating one service appointment with the total duration of the two jobs and assigning two resources would not ensure that the second job starts after the first one. Creating two service appointments and scheduling them to the same resource or creating one service appointment and scheduling it to two different resources would not create a dependency between the jobs. NEW QUESTION # 158

Northern Trail Outfitters wants to report on its Assets and reflect their attributes including hierarchical relationships. How should the Consultant meet this requirement?

- A. Enable and customize the View Asset Hierarchy action.
- B. Create custom reports and reference the Parent Asset and Root Asset fields.
- C. Use the Assets without Products report.
- **D. Use standard reports and reference the Parent Asset and Root Asset fields.**

Answer: D

Explanation:

This option allows reporting on assets and their attributes, including hierarchical relationships, by using the standard asset reports and fields. References: https://help.salesforce.com/s/articleView?id=sf.fs_asset_hierarchy.htm&type=5

NEW QUESTION # 159

The service director at Ursa Major Solar would like to understand the effect that service objectives have on the assignment of service appointments to service resources.

Where can the director view service objective scores for potential appointment time slots?

- A. Bulk dispatch action
- **B. Book appointment action**
- C. Candidates action
- D. Dispatch console

Answer: B

Explanation:

The book appointment action is used to schedule a service appointment based on service objectives and resource availability.

The action displays a list of potential time slots with service objective scores for each slot. The higher the score, the better the slot meets the service objectives.

NEW QUESTION # 160

Universal Containers wants to identify which resources need more or fewer appointments. Which Gantt chart filter option should a Consultant recommend to provide this information?

- **A. Select Sort by Average Utilization on the Resources Tab.**
- B. Select Date Resolution on the Hours Tab.
- C. Select Hours, Absences and Overtime on the Utilization Tab.
- D. Select Travel Time and Breaks as skills on the Skills Tab.

Answer: A

Explanation:

Sort by Average Utilization is an option on the Resources Tab of the Gantt chart that allows sorting resources by their average utilization percentage[239]. Utilization is a metric that measures how much time a resource spends on service appointments compared to their total working hours[240]. Selecting Sort by Average Utilization on the Resources Tab would allow Universal Containers to identify which resources need more or fewer appointments by showing them how busy each resource is based on their utilization percentage[241].

Selecting Date Resolution on the Hours Tab would not allow Universal Containers to identify which resources need more or fewer appointments. Date Resolution is an option on the Hours Tab of the Gantt chart that allows changing how many hours are shown per column such as 1 hour, 2 hours, or 4 hours[242].

Selecting Travel Time and Breaks as skills on the Skills Tab would not allow Universal Containers to identify which resources need more or fewer appointments. Skills are records that define specific abilities or qualifications that resources have[243]. Travel Time and Breaks are not skills but fields on the Resource object that define how much time a resource spends traveling between service appointments and how much time they take for breaks[244]. Selecting Hours, Absences and Overtime on

NEW QUESTION # 161
