A manufacturing plant uses Lean processes. You plan to outsource a painting operation to a subcontracting vendor. You create a service item named SP-01 to represent the painting service.

You need to create a subcontracting activity for the painting service.

Solution:

- \* Create a purchase agreement for the subcontracting vendor that contains the pricing information for SP-01.
- \* Create a vendor resource and a work cell for outsourced painting, then add the resource to the work cell.
- \* Create a production flow process activity using the painting work cell and the service item as the picking activity.
- \* Create a service term on the activity to tie the purchase agreement to the activity.

Does the solution meet the goal?

- A. Yes
- B. No

**Answer: A**

Explanation:

The solution meets the goal. Here is the explanation:

To create a subcontracting activity for the painting service, you should use the following steps:

Create a purchase agreement for the subcontracting vendor that contains the pricing information for SP-01. This step is correct, because you need to create a purchase agreement that defines the terms and conditions for purchasing the subcontracting service from the vendor. You also need to add a purchase agreement line for SP-01 and specify the quantity and price of the service.

Create a vendor resource and a work cell for outsourced painting, then add the resource to the work cell. This step is correct, because you need to create a resource that is assigned to the vendor account and add it to a resource group that represents the subcontracting work cell. This way, you can assign the subcontracting activity to the vendor resource.

Create a production flow process activity using the painting work cell and the service item as the picking activity. This step is correct,

because you need to create a process activity that represents the subcontracting service in the production flow<sup>1</sup>. You also need to specify the painting work cell as the resource group and SP-01 as the product of the process activity. You also need to select the Generate license plate option on the mobile device menu item that is used for reporting as finished<sup>1</sup>.

Create a service term on the activity to tie the purchase agreement to the activity. This step is correct, because you need to create a service term that links the purchase agreement line to the production flow process activity<sup>1</sup>. A service term defines how a service item is consumed in production and how it is invoiced by the vendor.

1: Activity-based subcontracting

#### NEW QUESTION # 184

- E. Sales order line

**Answer: D**

#### NEW QUESTION # 185

An automobile manufacturer leases cars to companies for use as company cars.

A car leased to a company breaks down and requires repairs.

You must open a maintenance request and replace the car with an equivalent model until the original car is repaired and returned to the company. When the manufacture' receives and inspects the car, the replacement car can be released to the company.

You need to select the maintenance request components to use.

Which components should you use? To answer, drag the appropriate components to the correct assets. Each component may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.

Note: Each correct selection is worth one point.

□

**Answer:**

Explanation:

□

Explanation:

To select the maintenance request components to use, you should use the following:

\* The leased car that must be repaired: You should use the Inbound asset component. An inbound asset is an asset that is received from a customer or vendor for maintenance or repair<sup>1</sup>. You can use the Inbound assets page to create and manage inbound assets in Asset Management<sup>2</sup>. You can also create a maintenance request for an inbound asset and link it to a work order<sup>3</sup>.

\* The replacement car for the leased car: You should use the Outbound asset component. An outbound asset is an asset that is sent to a customer or vendor as a temporary replacement for an asset that is being maintained or repaired<sup>1</sup>. You can use the Outbound assets page to create and manage outbound assets in Asset Management. You can also link an outbound asset to an inbound asset or a work order.

1: Inbound and outbound assets 2: Inbound assets 3: Create a maintenance request for an inbound asset :

[Outbound assets]
