NEW QUESTION # 19

(Which of the following is Effective AI built on? Note: There are 2 correct answers to this question.)

- A. Robust data foundation
- B. Open source LLMs
- C. Seamless integration
- D. Cutting-edge algorithms or real-time processing

Answer: A,C

Explanation:

Comprehensive and Detailed Explanation From Exact Extract: Effective AI in the context of SAP Business AI is built on a robust data foundation to ensure accurate and contextually relevant outcomes, and seamless integration to embed AI capabilities directly into business processes and applications for efficient deployment and scalability. This foundation enables customized AI solutions that leverage enterprise data securely while integrating with SAP and non-SAP systems.

Exact extracts supporting this:

"Effective AI is built on a robust data foundation and seamless integration, particularly when it involves customized AI solutions on the SAP ..."learning.sap.com From SAP Business AI principles: AI is "grounded in business data and embedded into every business function," emphasizing the data foundation and integration for effectiveness.sap.com

"Maximize the value of AI across your business with a single AI interface that seamlessly integrates data and workflows across your SAP and non-SAP applications."sap.com Other options are incorrect because:

Option A: While algorithms and processing are important, SAP emphasizes data and integration over cutting-edge algorithms alone for effective AI in business contexts.

Option C: SAP supports a range of LLMs, including proprietary ones, but does not position effective AI specifically on open-source models; focus is on secure, business-grounded AI.

Reference from Positioning SAP Business AI Solutions as part of SAP Business Suite documents or Study Guide: Derived from the SAP Learning Journey "Boosting Your Cloud Transformation Journey with SAP Business AI and Generative AI," specifically the unit "Building Custom SAP Business AI Solutions," which highlights effective AI's reliance on data foundations and integration. Supported by the SAP Business AI product page, aligning with C_BCBAI_2502 certification materials for positioning AI solutions.
