

300-540최고품질예상문제모음 & 300-540시험대비덤프 샘플다운

BONUS!!! Itexamdump 300-540 시험 문제집 전체 버전을 무료로 다운로드하세요: <https://drive.google.com/open?id=1-pJdsbZ6-qFBqDR0Db6tVOuy-zbt1TCV>

Cisco인증 300-540시험을 패스하여 자격증을 취득하시면 찬란한 미래가 찾아올것입니다. Cisco인증 300-540인증시험을 패스하여 취득한 자격증은 IT인사로서의 능력을 증명해주며 IT업계에 종사하는 일원으로서의 자존심입니다. Itexamdump 의 Cisco인증 300-540덤프는 시험패스에 초점을 맞추어 제일 간단한 방법으로 시험을 패스하도록 밀어주는 시험공부가이드입니다.구매전Cisco인증 300-540무료샘플을 다운받아 적성에 맞는지 확인하고 구매할지않할지 선택하시면 됩니다.

Cisco 300-540 시험요강:

주제	소개

주제 1	Virtualized Architecture: This section of the exam measures the skills of Cloud Network Engineers and covers the foundational concepts of virtualized infrastructures used in modern service provider and cloud environments. Candidates are expected to understand constraints in IaaS designs, determine appropriate cloud service models, and demonstrate awareness of container orchestration compared to traditional virtual machines. The exam also evaluates the ability to implement key virtualization functions such as NFV, VNF, NSO, and virtualized Cisco platforms. Learners must be able to deploy NFV with automation tools, manage VNF onboarding, work with NSO-driven orchestration, and use protocols like NETCONF, RESTCONF, REST APIs, and gNMI within automated cloud ecosystems. A general understanding of supporting platforms such as OpenStack also forms part of the required knowledge in this domain.
주제 2	Service Assurance and Optimization: This section of the exam measures the skills of Cloud Operations Engineers and covers assurance mechanisms used to maintain performance, stability, and visibility across NFVI environments. It includes network assurance concepts such as MANO frameworks, VNF workload monitoring, VIM control plane KPIs, and streaming telemetry with gRPC and gNMI. Candidates must understand cloud infrastructure performance monitoring tools, including SR-PM, NetFlow, IPFIX, syslog, SNMP traps, RMON, cloud agents, and automated fault management systems. The domain also touches on diagnosing NFVI-related errors and optimizing VNFs using techniques such as SR-IOV and software-accelerated virtual switching technologies like DPDK and VPP.
주제 3	- Cloud Interconnect: This section of the exam measures the skills of Service Provider Network Engineers and covers how large networks interconnect with cloud platforms and carrier-neutral facilities. Candidates are expected to understand various connectivity options to cloud providers, customer sites, and other neutral facilities, as well as evaluate WAN connectivity models such as direct connect, MPLS or segment routing, and IPsec VPN links. The domain also includes the ability to troubleshoot advanced data center interconnect solutions, including EVPN VXLAN, EVPN over SR - MPLS, ACI-based connectivity, and pseudowire architectures supporting cloud-to-cloud and cloud-to-edge communication.
주제 4	Security: This section of the exam measures the skills of Network Security Engineers and covers the implementation of infrastructure-level protection in cloud and NFVI ecosystems. It includes topics such as ACLs, uRPF, RTBH, router hardening, BGP flowspec, TACACS, and MACSEC. Candidates should understand DoS mitigation methods and apply security practices within NFVI, focusing on API protection, securing the control and management plane, and segmentation strategies in service provider cloud environments. The domain also evaluates basic knowledge of TLS, mTLS, and general cloud security solutions related to DNS protection, zero-day defenses, and malware detection.
주제 5	High Availability: This section of the exam measures the skills of Cloud Infrastructure Architects and covers the design and implementation of redundancy and resiliency mechanisms in virtualized network functions and distributed cloud platforms. It includes data plane redundancy for VNFs, high availability within a single VIM control plane, and resilient compute, vNIC, and top-of-rack switching. The exam requires an understanding of multi-homing, EVLAG configurations, virtual private cloud deployment, and ECMP strategies for NFVI integrations with physical routing protocols such as BGP, OSPF, and IS-IS. Candidates must also recommend suitable high-availability models involving DNS, routing, and load balancing.

300-540최고품질 예상문제모음 최신 인기 인증 시험덤프자료

우리Itexamdump에서는 여러분들한테 아주 편리하고 시간 절약함과 바꿀 수 있는 좋은 대책을 마련하였습니다. Itexamdump에서는Cisco 300-540인증시험관련가이드로 효과적으로Cisco 300-540시험을 패스하도록 도와드리겠습니다.만약 여러분이 다른 사이트에서도 관련덤프자료를 보셨을 경우 페이지 아래를 보시면 자료출처는 당연히 Itexamdump 일 것입니다. Itexamdump의 자료만의 제일 전면적이고 또 최신 업데이트일것입니다.

최신 CCNP Service Provider 300-540 무료샘플문제 (Q54-Q59):

질문 # 54

Refer to the exhibit. The indicated configuration was applied to a Cisco switch Switch_A located in the Los Angeles DC data center; however, Switch_A fails to establish OTV connectivity to Cisco switch Switch_C. Which overlay interface command must be run on Switch_A to resolve the issue?

- A. otv isis authentication-type md5
- B. otv isis authentication-check
- C. otv extend-vlan 101-111
- D. otv join-interface vlan 101-111

정답: C

설명:

Overlay Transport Virtualization (OTV) allows Layer 2 extension across Layer 3 infrastructures. To operate, OTV requires three fundamental components on the overlay interface:

Join interface - used to reach the OTV control plane over L3 (already configured: otv join-interface g1/0).

Control-group multicast address - for control-plane advertisement (already configured: otv control-group 224.1.1.1).

Extended VLAN list - specifies which VLANs will be transported through the OTV overlay.

The configuration shown in the exhibit includes the join-interface, control-group, and data-group, but it does NOT specify which VLANs should be extended. Without the otv extend-vlan command, OTV will form the overlay interface but will not forward any Layer 2 information, preventing adjacency and MAC distribution between sites.

In OTV, the command required to activate VLANs for transport is:

otv extend-vlan <vlan-range>

This enables the VLANs (such as 101-111) to be carried across the OTV overlay, completing the configuration and establishing connectivity.

Why the Other Options Are Incorrect

B). otv isis authentication-type md5

This is optional and only required if ISIS authentication is enabled on both edges. It does not resolve the absence of VLAN extension.

C). otv isis authentication-check

This command enforces authentication verification but does not fix connectivity when VLANs are not extended.

D). otv join-interface vlan 101-111

This is not a valid OTV command. The join-interface must be a routed interface, not a VLAN list.

질문 # 55

Implementing _____ from NFVI to physical infrastructure optimizes routing efficiency and redundancy.

- A. Direct connections
- **B. ECMP**
- C. Single-path
- D. Static routing

정답: B

질문 # 56

For infrastructure security, which of the following is NOT typically a focus area?

- A. Hardening routers to prevent unauthorized access
- B. Implementing ACLs for traffic filtering
- **C. Enhancing user interface designs**
- D. Encrypting data in transit with MACSEC

정답: C

질문 # 57

The primary function of DNS security is to:

- **A. Protect against domain name system attacks**
- B. Reduce the cost of internet services
- C. Store data more efficiently
- D. Increase website loading speeds

정답: A

질문 # 58

Secure NFVI control and management plane involves:

- **A. Authentication and encryption**
- B. Removing all passwords
- C. Public internet access
- D. Unrestricted API access

정답: A

질문 # 59

.....

Cisco인증300-540시험덤프의 문제와 답은 모두 우리의 엘리트들이 자신의 지식과 몇 년간의 경험으로 완벽하게 만들어낸 최고의 문제집입니다. 전문적으로Cisco인증300-540시험을 응시하는 분들을 위하여 만들었습니다. 여러분이 다른 사이트에서도Cisco인증300-540시험 관련덤프자료를 보셨을 것입니다 하지만 우리Itexamdump의 자료만의 최고의 전문가들이 만들어낸 제일 전면적이고 또 최신 업데이트일 것입니다.Cisco인증300-540시험을 응시하고 싶으시다면 Itexamdump자료만의 최고의 선택입니다.
