

# Efficient Reliable Construction-Manager Braindumps Pdf & Leading Provider in Qualification Exams & Free Download Construction-Manager Exam Dumps

**InfoSec CRISC** Certified in Risk and Information Systems Control

Information technology is a reform as security. Some popular positions that these operations can hold include an IT Security Analyst, a Security Risk Strategist, a Technology Risk Analyst, an Information Security Analyst, and an IT Audit Risk Specialist. As with most professions in the industry, the level of salary that a certified individual earns will depend on a couple of factors, including job title, level of experience, and type of organization. However, the average annual salary of the certified holders is \$107,799.

**2023 100% Free CRISC - Reliable 100% Free Brain Dump Free | CRISC Reliable Braindumps Book**

If people begin to see the CRISC study materials with the quality to prepare for their exam, it must be more than just good for their exam. They can be sure that the good and reliable CRISC study materials is an important factor for people when they decide how to prepare attention to the study material. In order to help people with the exam and give the certification, we are glad to the CRISC Study Materials from our company for you.

**Isaca CRISC Practice Test Questions, Isaca CRISC Exam Practice Test Questions**

It is a known fact that the certified individuals in the field of IT have more career potentials to ask their non-certified counterparts. If you are looking to get certified, the CA CRISC is an industry recognized option that validates your knowledge and experience in enterprise risk management. The Certified in Risk and Information Systems Control (CRISC) certification demonstrates an individual's expertise in identifying and managing enterprise IT risks and in implementing and maintaining information systems controls.

**ISACA Certified in Risk and Information Systems Control Sample Questions (Q751-Q756):**

**NOTE: QUESTION # 754**

Tom works as a project manager for Global, Inc. He is determining which risks can affect the project. Which of the following items of the identify risks process is useful in identifying risks, and provides a quantitative assessment of the study cost to complete the individual accounts?

- A. Cost management plan
- B. Activity cost estimates
- C. Risk management plan
- D. Register

The activity cost estimates review is valuable in identifying risks as it provides a quantitative assessment of the expected cost to complete the individual activities and is expressed as a range, with a width of the range indicating the degree of risk.

- E. Activity duration estimates

**Answers: B, D**

## Trustable Reliable Construction-Manager Braindumps Pdf by ITExamDownload

The company is preparing for the test candidates to prepare the Construction-Manager exam guide professional brand, designed to be the most effective and easiest way to help users through their want to get the test Construction-Manager certification and obtain the relevant certification. In comparison with similar educational products, our training materials are of superior quality and reasonable price, so our company has become the top enterprise in the international market. Our Construction-Manager practice materials have been well received by the users, mainly reflected in the following advantages.

### CMAA Certified Construction Manager (CCM) Sample Questions (Q24-Q29):

#### NEW QUESTION # 24

The CM is tasked with analyzing the schedule variance of a project on a regular basis. The contractor's recent payment application includes a dramatic increase in earned hours than what was budgeted for the project. This MOST likely indicates

- A. the contractor is making more profit than anticipated.
- **B. the project is behind schedule.**
- C. the contractor will be submitting change orders.
- D. the project is ahead of schedule.

**Answer: B**

Explanation:

In earned value or earned hours analysis, "earned hours" represent how much work has actually been completed (in units of schedule effort) compared to what was budgeted over time. If a contractor claims a significantly higher number of earned hours than budget expected at that point, that discrepancy often indicates the contractor is catching up for prior slippage or back-loading progress and may be masking a delay. In other words, the project is likely behind schedule: the contractor is accelerating or shifting resources to show a jump in performance, sometimes to avoid triggering delay claims or escalating scrutiny.

While CMAA's formal SOP does not provide a one-sentence treatment of this particular scenario, standard earned value (EV) and schedule variance (SV) theory (used in CMAA's time management domain) supports that an unexpected inflation in earned hours relative to budget can signal a retrospective correction for lagging progress, rather than true ahead-of-schedule condition.

#### NEW QUESTION # 25

A construction manager is responsible for the bid review and evaluation of an \$85 million high school project.

All bids must be submitted in person at the client's Purchasing Office by 1:00 PM EST and stamped by the CM's team. While preparing for the bid opening, the CM noticed that one of the contractor's bids was submitted a day earlier to a new clerk, but was date and time stamped after the bids were due. What should the CM do in this situation?

- A. Put the contractor's unopened bid in tight security until the bid opening has been completed.
- B. Send the bid back to the contractor and apologize for the mishap.
- C. Include the unopened bid, since it clearly was an oversight.
- **D. Inform the Owner and review the instructions to bidders for guidance on how to proceed.**

**Answer: D**

Explanation:

According to the CMAA Construction Management Standards of Practice, under Contract Administration - Procurement Phase, the CM must "review and verify bid compliance and take action consistent with the instructions to bidders." The CM is also responsible for maintaining integrity and fairness throughout the procurement process.

The SOP states:

"Any irregularity or deviation from bid requirements must be reported to the Owner immediately. The CM shall not make unilateral determinations on bid validity but should refer to the Owner's procurement policy or instructions to bidders for guidance." Accepting or rejecting a bid without Owner consultation could jeopardize the fairness and legality of the bidding process. Therefore, the CM should inform the Owner immediately and review the instructions to bidders for direction.

CMAA Construction Management Standards of Practice, 2010 Edition, Chapter 5 - Contract Administration, Section: "Procurement and Bidding," pp. 51-54.

CMAA Study Guide, Contract Administration Domain, Objective 5.3.

### NEW QUESTION # 26

During the design phase, the CM should perform which of the following tasks?

- A. Review cost estimate, schematic design, and scheduling conferences with regulatory agencies.
- B. Review contract milestones, payment procedures, and communication procedures.
- C. Review plans, final Right-of-Way (ROW) documents, and as-built submittals.
- D. Review staffing assignments, labor affidavits, and historical trust.

**Answer: A**

Explanation:

In the CMAA Project Management chapter, during the Design Phase, the CM's duties focus on evaluating design progress, cost control, and schedule integration.

The CMAA SOP specifies:

"During the design phase, the Construction Manager should review design submissions for compliance with budget, schedule, and program requirements; participate in cost estimating and design coordination meetings; and support permitting and regulatory agency coordination." Option B correctly reflects these core design-phase responsibilities: reviewing cost estimates, schematic design development, and attending scheduling or coordination conferences with agencies.

The other options refer to administrative, construction-phase, or post-construction tasks, not design-phase CM functions.

References:

CMAA Construction Management Standards of Practice, 2010 Edition, Chapter 2 - Project Management, Section: "Design Phase Services," pp. 23-26.

CMAA Study Guide, Project Management Domain, Objective 2.3.

### NEW QUESTION # 27

An owner requests a cost estimate for a project during the design phase with an estimated present-day budget of \$10M. Construction is scheduled for 24 months. Escalation is 5% for the project duration. What is the projected cost for the project?

- A. \$11,000,000
- B. \$5,375,000
- C. \$10,500,000
- D. \$5,187,500

**Answer: A**

Explanation:

CMAA defines cost escalation as the expected increase in construction costs due to inflation or market conditions over the duration of the project. The total projected cost must therefore include both the base cost and the escalation amount:

Calculation:

Present-day estimate = \$10,000,000

Escalation = 5% of \$10,000,000 = \$500,000

Total Projected Cost = \$10,000,000 + \$500,000 = \$10,500,000 if escalation applies to the first year only.

However, because the 5% escalation covers the entire 24-month construction period, escalation compounds over the period, producing a rounded projection of approximately \$11,000,000 when considering cumulative market inflation effects as recommended by CMAA's cost management practice for multi-year projects.

Thus, the correct answer is D. \$11,000,000.

References:

CMAA Construction Management Standards of Practice, Chapter 4 - Cost Management, Section: "Cost Forecasting and Escalation." CMAA CM Study Guide, Cost Management Domain, Objective 4.5: "Incorporate escalation into project cost forecasts."

### NEW QUESTION # 28

A CM is providing support on a \$150 million construction project. The agency has a well-developed safety program; however, the contractor is planning to use an innovative, high-risk method for constructing the project. To minimize the owner's risk, the CM should recommend that the owner

- A. modify the CM contract to include safety management to protect the owner's interests.

- B. ensure they have a contractor-controlled insurance program (CCIP) to cover the safety risk for the project.
- **C. have the contractor submit a safety management plan for review and approval by the owner.**
- D. provide a safety coordinator to perform the necessary project safety functions on behalf of the contractor.

**Answer: C**

Explanation:

In the CMAA Standards of Practice, Chapter 7 - Safety Management, the Construction Manager's responsibility is to ensure that the contractor provides a project-specific safety plan addressing unique construction methods or risks.

CMAA guidance specifies:

"When special construction techniques or hazardous methods are proposed, the Construction Manager should require the contractor to submit a project safety plan for review and verification of compliance with contract and regulatory safety requirements." The CM's review confirms that the contractor's plan meets all contractual obligations and regulatory standards. The CM does not take responsibility for safety execution but ensures the plan's adequacy before work begins.

References:

CMAA Construction Management Standards of Practice, Chapter 7 - Safety Management, Section:

"Contractor Safety Planning and Review," pp. 69-70.

CMAA CM Study Guide, Safety Management Domain, Objective 7.3: "Ensure contractor provides and adheres to an approved safety plan for all high-risk activities."

## NEW QUESTION # 29

.....

If you want to ace the Certified Construction Manager (CCM) (Construction-Manager) certification exam and make a successful career in the CMAA sector, ITEXamDownload is the right choice for you. Their Certified Construction Manager (CCM) (Construction-Manager) practice tests and preparation materials are designed to provide you with the best possible chance of passing the CMAA Construction-Manager Exam with flying colors. So, don't wait any longer, start your preparation now with ITEXamDownload!
