

350-601 Quiz Braindumps - 350-601 Pass-Sure torrent & 350-601 Exam Torrent

Associating a Service Profile with a Server or Server Pool

Follow this procedure if you did not associate the service profile with a blade server or server pool when you created it, or to change the blade server or server pool with which a service profile is associated.

Procedure

Step 1 In the Navigation pane, click the Servers tab.

Step 2 On the Servers tab, expand Servers > Service Profiles.

Step 3 Expand the node for the organization that contains the service profile that you want to associate with a new server or server pool.

If the system does not include multi-tenancy, expand the root node.

Step 4 Right-click the service profile you want to associate with a server and select Change Service Profile.

Step 5 In the Associate Service Profile dialog box, select one of the following options:

Option	Description
Server Pool	Select a server pool from the dropdown menu. The administrator assigns a server from this pool to the service profile. Continue with Step 7.
Server	Navigate to the desired available server in the navigation tree and select the server which will be assigned to the service profile. Continue with Step 7.
Custom Server	Specifies the chassis and slot that contains the server that will be assigned to the service profile. If the server is not in the slot or is otherwise unavailable, the service profile will be associated with the server when it becomes available. Continue with Step 6.

Step 6 If you chose Custom Server, do the following:

- a. In the Chassis ID field, enter the number of the chassis where the selected server is located.
- b. In the Server ID field, enter the number of the slot where the selected server is located.

For candidates who want to start learning immediately, choosing us will be your best choice. Because you can get the downloading link within ten minutes after purchasing, so that you can begin your study right now. What's more, 350-601 training materials of us are also high-quality, and they will help you pass the exam just one time. We are pass guaranteed and money back guaranteed for your failure. We also have a professional service staff to answer any your questions about 350-601 Exam Dumps.

The Cisco 350-601 exam tests the candidate's ability to implement and configure data center technologies, including network, compute, storage network, automation, security, and application optimization. It covers various technologies such as Cisco Nexus switches, Cisco ACI, Cisco UCS, Cisco HyperFlex, and Cisco Intersight. 350-601 exam also tests the candidate's knowledge of troubleshooting, scripting, and automation tools. To achieve success in the exam, the candidates need to have a deep understanding of data center technologies, industry best practices, and hands-on experience with Cisco products.

Cisco 350-601 Exam is an essential certification test for professionals who want to advance their careers in data center technologies. 350-601 exam validates an individual's skills and knowledge in implementing and managing data center technologies, and it opens up a wide range of career opportunities. Passing the exam requires dedication and hard work, but the rewards are well worth the effort.

New 350-601 Dumps Ebook - Sample 350-601 Exam

Our Test4Sure website try our best for the majority of examinees to provide the best and most convenient service. Under the joint efforts of everyone for many years, the passing rate of Test4Sure Cisco's 350-601 Certification Exam has reached as high as 100%. If you buy our 350-601 exam certification training materials, we will also provide one year free renewal service. Hurry up!

Cisco 350-601 exam is intended for IT professionals who are involved in designing, deploying, and managing data center technologies. This includes network engineers, system administrators, network architects, and IT managers. 350-601 exam is also suitable for individuals who wish to gain a deeper understanding of data center technologies and improve their skills in this area. Passing the Cisco 350-601 Exam is a testament to an individual's expertise in data center technologies, which can lead to better job opportunities and higher salaries in the IT industry.

Cisco Implementing Cisco Data Center Core Technologies (350-601 DCCOR) Sample Questions (Q34-Q39):

NEW QUESTION # 34

Refer to the exhibit. A network engineer must create an EEM script that saves a copy of the running configuration to bootflash and writes a message to syslog when a user saves the configuration to a Cisco Nexus 9000 Series Switch. Which command completes the configuration set?

```

event manager applet local-backup
  event cli match "copy running-config startup-config"
  action 1 cli copy  bootflash:/
  current_config.txt
  action 2 syslog msg Configuration saved and copied to
  bootflash
  action 3 event-default

```

- A. running-config
- B. syslog-config
- C. event-default
- D. policy-default

Answer: A

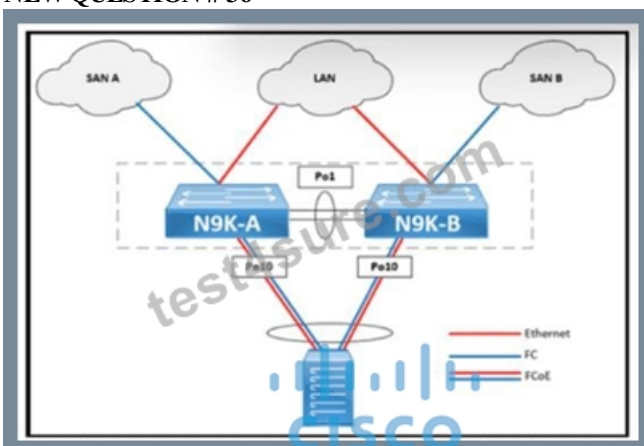

NEW QUESTION # 35

An engineer must configure a Cisco UCS domain for monitoring and management by the Cisco Intersight SaaS platform. After the setup is complete, administrators must have full control to configure the device through Cisco UCS Manager and Intersight. Which set of actions accomplishes this task?

- A. Configure Device Connector Access Mode as Allow Control in Cisco UCS Manager Claim the device on intersight as Intersight Managed Mode
- B. Option B
- C. Configure Device Connector Access Moao as Allow Control in Device Console. Claim the device on intersight as Intersight Managed Mode
- D. Configure Devce Connector Access Mode as Allow Control in Device Console Claim the device on Intersight as UCSM Managed Mode.
- E. Option C
- F. Configure Device Connector Access Mode as Allow Control in Cisco UCS Manager Claim the device on intersight as UCSM Managed Mode
- G. Option D
- H. Option A

Answer: C

NEW QUESTION # 36

Refer to the exhibit. An engineer implements an FCoE Unified Fabric where vPC exists between N9K-A and N9K-B. To avoid rate discards, bandwidth must be regulated to account for sent traffic that exceeds the access speed. Which set of commands completes the configuration?

fcoe fcf-priority 255 on N9K-A
police 50000
spanning-tree port type edge trunk on Po1

- A. **fcoe cost 0 on N9K-A**
shape min 0 gbps max 1 gbps
spanning-tree port type edge on Po1
- B.

fcoe cost 255 on N9K-A
random-detect min 10 max 20
spanning-tree port type edge on Po10

- C. **fcoe fcf-priority 0 on N9K-A**
hardware qos fc rate-shaper low
spanning-tree port type edge trunk on Po10
- D.

Answer: A

NEW QUESTION # 37

A DNS server with IP address 192.168.1.1 is deployed in a data center. A network engineer must configure a Cisco UCS Fabric Interconnect to use this DNS. Which configuration should be applied?

- A. **ficl-mgmt-A# scope system**
ficl-mgmt-A /system # create dns 192.168.1.1
ficl-mgmt-A /system* # commit-buffer
- B. **ficl-mgmt-A# scope fabric-interconnect a**
ficl-mgmt-A /fabric-interconnect # set name 192.168.1.1
ficl-mgmt-A /fabric-interconnect # scope system
ficl-mgmt-A /system # commit-buffer
- C. **ficl-mgmt-A# scope fabric-interconnect a**
ficl-mgmt-A /fabric-interconnect # set name 192.168.1.1
ficl-mgmt-A /fabric-interconnect* # commit-buffer
- D. **ficl-mgmt-A# scope system**
ficl-mgmt-A /system # scope services
ficl-mgmt-A /system/services # create dns 192.168.1.1
ficl-mgmt-A /system/services* # commit-buffer

- A. Option B
- B. Option C
- C. Option A
- D. Option D

Answer: D

NEW QUESTION # 38

Drag and drop the hyperflex characteristics from the left onto the appropriate. HyperFlex Node types on the right. Not all options are used.

Characteristics (left):

- uses only SSD drives for caching
- contains HDDs for the capacity layer
- uses SSD drives or NVMe storage for caching
- has SSD drives for the capacity layer
- recommended for repeatable and sustainable high performance, especially for scenarios with a larger working set of data
- recommended for capacity-sensitive solutions, lower budgets, and fewer performance-sensitive applications

Node Types (right):

- Hybrid Node
- All Flash Node

Answer:

Explanation:

Characteristics (left, highlighted):

- uses only SSD drives for caching
- contains HDDs for the capacity layer
- uses SSD drives or NVMe storage for caching
- has SSD drives for the capacity layer
- recommended for repeatable and sustainable high performance, especially for scenarios with a larger working set of data
- recommended for capacity-sensitive solutions, lower budgets, and fewer performance-sensitive applications

Node Types (right):

- Hybrid Node
 - uses only SSD drives for caching
 - contains HDDs for the capacity layer
 - recommended for repeatable and sustainable high performance, especially for scenarios with a larger working set of data
- All Flash Node
 - uses SSD drives or NVMe storage for caching
 - has SSD drives for the capacity layer
 - recommended for capacity-sensitive solutions, lower budgets, and fewer performance-sensitive applications
