### Microsoft Endpoint Administrator Sample Questions (Q11-Q16):

#### NEW QUESTION # 11

You have 100 Windows 10 devices enrolled in Microsoft Intune.

You need to configure the devices to retrieve Windows updates from the internet and from other computers on a local network.

Which Delivery Optimization setting should you configure, and which type of Intune object should you create? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

#### Answer:

Explanation:

Explanation:

Delivery Optimization setting: B. Download mode Intune object: A configuration profile To configure the devices to retrieve

Windows updates from the internet and from other computers on a local network, you need to configure the Download mode setting in a Delivery Optimization device configuration profile. This setting specifies how the devices use Delivery Optimization to download updates. You can choose from several options, such as HTTP only, LAN only, or Group. For example, you can set the Download mode to Group and specify a group ID for the devices to share updates among themselves and with other devices that have the same group ID. You can also set the Download mode to Internet to allow the devices to download updates from Microsoft or other devices on the internet that use Delivery Optimization.

### NEW QUESTION # 12

You need a new conditional access policy that has an assignment for Office 365 Exchange Online.

You need to configure the policy to meet the technical requirements for Group4.

Which two settings should you configure in the policy? To answer, select the appropriate settings in the answer area.

NOTE: Each correct selection is worth one point.

#### Answer:

Explanation:

Explanation

The policy needs to be applied to Group4 so we need to configure Users and Groups.

The Access controls are set to Block access

A screenshot of a computer Description automatically generated

We therefore need to exclude compliant devices.

From the scenario:

Ensure that the users in a group named Group4 can only access Microsoft Exchange Online from devices that are enrolled in Intune.

Note: When a device enrolls in Intune, the device information is updated in Azure AD to include the device compliance status. This compliance status is used by conditional access policies to block or allow access to e-mail and other organization resources.

### NEW QUESTION # 13

You have a Microsoft 365 subscription.

You plan to enable Microsoft Intune enrollment for the following types of devices:

\* Existing Windows 11 devices managed by using Configuration Manager

\* Personal iOS devices

The solution must minimize user disruption.

Which enrollment method should you use for each device type? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

#### Answer:

Explanation:

Explanation:

### NEW QUESTION # 14

Your company purchases new computers that run Windows 10. The computers have cameras that support Windows Hello for Business.

You configure the Windows Hello for Business Group Policy settings as shown in the following exhibit.

What are two valid methods a user can use to sign in? Each correct answer presents part of the solution.

NOTE: Each correct selection is worth one point.

- A. A smartwatch that is Bluetooth-enabled
- B. A PIN
- C. A USB key

- **D. Facial recognition**

**Answer: B,D**

Explanation:

Facial recognition and pin are the only choices to be able to sign in. A smartwatch that is Bluetooth-enabled has to do with locking the Windows device.

#### NEW QUESTION # 15

You have computer that run Windows 10 and connect to an Azure Log Analytics workspace. The workspace is configured to collect all available events from Windows event logs.

The computers have the logged events shown in the following table.

Which events are collected in the Log Analytics workspace?

- A. 1 and 3 only
- B. 1 only
- C. 1, 2, and 4 on
- **D. 1, 2, 3, and 4**
- E. 2 and 3 only

**Answer: D**

Explanation:

Explanation

All events from Windows event logs are collected in the Log Analytics workspace, regardless of the event level or source.

Therefore, events 1, 2, 3, and 4 are all collected in the workspace. References:
