HOT GH-100 Exam Sample - Microsoft GitHub Administration - Valid New GH-100 Dumps Ebook

If you want to make progress and mark your name in your circumstances, you should never boggle at difficulties. As far as we know, many customers are depressed by the exam ahead of them, afraid of they may fail it unexpectedly. Our GH-100 exam tool has three versions for you to choose, PDF, App, and software. If you have any question or hesitate, you can download our free Demo. The Demo will show you part of the content of our GH-100 Study Materials real exam materials. So you do not have to worry about the quality of our exam questions. Our GH-100 exam tool have been trusted and purchased by thousands of candidates. What are you waiting for?

Microsoft GH-100 Exam Syllabus Topics:

Topic	Details
Topic 1	<ul style="list-style-type: none">• Manage GitHub Packages: This section of the exam measures skills of GitHub Enterprise Administrators and focuses on managing GitHub Packages, their use in workflows, and how they differ from releases. It involves accessing, writing, and sharing packages across teams while ensuring integration into CI• CD pipelines.

Topic 2	<ul style="list-style-type: none"> • Enable secure software development and ensure compliance: This section of the exam measures skills of GitHub Enterprise Administrators and deals with applying GitHub's security and compliance capabilities. It covers policies, auditing, scrubbing sensitive data, secret scanning, code scanning with CodeQL, dependency management with Dependabot, and implementing security response plans. It also explores authentication tokens, app security policies, and enterprise managed users.
Topic 3	<ul style="list-style-type: none"> • Describe how GitHub is deployed, distributed, and licensed: This section of the exam measures skills of GitHub Enterprise Administrators and highlights the deployment models of GitHub Enterprise Server, Enterprise Cloud, and GitHub AE. It covers licensing structures, billing for seat licenses and metered services, support options, and monitoring license usage across users and machine accounts.
Topic 4	<ul style="list-style-type: none"> • Manage user identities and GitHub authentication: This section of the exam measures skills of DevOps Engineers and focuses on managing authentication and identity across organizations using SAML SSO, SCIM, and team synchronization. Candidates need to understand identity providers, user membership implications, authorization models, and enforcing security measures such as two-factor authentication.
Topic 5	<ul style="list-style-type: none"> • Manage access and permissions based on membership: This section of the exam measures skills of DevOps Engineers and reviews how to manage organizations, teams, and repository permissions. It includes default permission settings, team synchronization through AD, scripting across multiple organizations, and aligning enterprise policies with trust requirements. It also contrasts roles such as organization members, owners, collaborators, and billing managers.

Microsoft GitHub Administration Sample Questions (Q31-Q36):

NEW QUESTION # 31

When comparing a partner identity provider integration with a non-partner identity management solution for GitHub Enterprise Managed Users, which statement is Correct?

- A. The non-partner identity provider integrations require manual configuration of SAML 2.0 details.
- B. The non-partner identity provider integrations can utilize OIDC for authentication.
- C. The partner identity provider integrations support fewer GitHub-supported authentication methods.
- D. The partner identity provider integrations rely on the partner to support the application on the partner IdP.

Answer: A

Explanation:

Non-partner identity provider integrations require you to enter SAML2.0 configuration details by hand - such as the Sign-on URL, Issuer, and X.509 certificate - whereas partner IdPs supply a pre-configured application integration.

NEW QUESTION # 32

What is a key characteristic of GitHub Enterprise Server (GHES) compared to GitHub Enterprise Cloud (GHEC)?

- A. GHES users cannot integrate with external identity providers for authentication.
- B. GHES is hosted by GitHub and offers automatic scaling, while GHEC requires self-hosting.
- C. GHEC offers data residency options in regions that GHES does not support.
- D. GHES allows enterprises to have complete control over their hosting environment, including data storage and network security policies.

Answer: D

Explanation:

GitHub Enterprise Server is a self-hosted product you install and manage on your own infrastructure - giving you full control over data storage, network security policies, and the underlying environment.

NEW QUESTION # 33

Which of the following GitHub token types supports fine-grained repository permissions AND is recommended for CI/CD

automation?

- A. Device Tokens
- B. Personal Access Tokens (PATs)
- C. OAuth tokens
- **D. GitHub App Installation Access Tokens**

Answer: D

Explanation:

GitHub App Installation Access Tokens are privileged to the exact permissions you grant the App - down to individual repositories - and rotate automatically, making them the recommended choice for CI/CD automation workflows that demand least-privilege, fine-grained access.

NEW QUESTION # 34

Which of the following is true about outside collaborators in a GitHub organization?

- A. They have access to all private repositories by default.
- B. They appear in the organization's internal member list.
- C. They inherit organization-wide policies, such as SSO requirements.
- **D. They are granted explicit access to specific repositories.**

Answer: D

Explanation:

Outside collaborators aren't organization members; instead, they're granted explicit access - at read, write, or admin level - to only the repositories you choose.

NEW QUESTION # 35

Which of the following is a key benefit of setting default read permissions across organizations?

- A. Improves collaboration by allowing users to modify content directly.
- **B. Enhances security by minimizing unintended modifications.**
- C. Suits environments where all users need write access.
- D. Increases efficiency in content creation and updates.

Answer: B

Explanation:

Enforcing a default of Read for organization members ensures they can view content without the ability to push changes, reducing the risk of accidental or unauthorized modifications.

NEW QUESTION # 36

.....

There are three formats of PrepAwayETE practice material. Anyone can try a free demo to assess the quality of our Microsoft product before buying. The GitHub Administration (GH-100) PDF file of actual questions, web-based GitHub Administration practice exam, and desktop practice test are three formats of PrepAwayETE.
