

Die seit kurzem aktuellsten Certified Information Privacy Technologist (CIPT) Prüfungsunterlagen, 100% Garantie für Ihren Erfolg in der IAPP CIPT Prüfungen!

Certified Information Privacy Technologist (CIPT)

Außerdem sind jetzt einige Teile dieser Fast2test CIPT Prüfungsfragen kostenlos erhältlich: https://drive.google.com/open?id=1r_a37yT3Fiy5EDjZe8jBihejfilDk1A

Ich kann mein Leben und Arbeit jetzt nicht ertragen. Ich hoffe auf eine andere bessere Arbeit. Sind Sie der ähnlichen Meinung? Aber, wie kann ich bessere Arbeit bekommen? Lieben Sie IT? Wollen Sie durch IT-Zertifizierungsprüfungen Ihre Fähigkeit beweisen? Wenn ja, nehmen Sie vielleicht an den IT-Zertifizierungsprüfungen teil. Es ist sehr wichtig, CIPT Zertifizierung zu bekommen, wenn Sie großen Erfolg in diesem Bereich machen wollen. Damit können Sie neue Chancen für Ihre Karriere schaffen. Wissen Sie IAPP CIPT Prüfung? Die CIPT Zertifizierung kann es erleichtern, dass Sie einen Job finden wollen. Aber fühlen Sie es sehr schwierig, die CIPT Prüfung zu bestehen? Es macht nichts, weil Sie die CIPT Prüfungsmaterialien von Fast2test benutzen können.

Die IAPP CIPT (Certified Information Privacy Technologist) Prüfung ist eine professionelle Zertifizierungsprüfung, die das Wissen und die Expertise einer Person im Bereich der Informationssicherheitstechnologie misst. Die Prüfung ist für Fachleute konzipiert, die mit Technologie arbeiten und personenbezogene Daten verarbeiten, einschließlich IT-Fachleuten, Software-Entwicklern, Datenanalysten und Sicherheitsfachleuten. Die CIPT-Zertifizierung wird von der International Association of Privacy Professionals (IAPP) angeboten, einer führenden globalen Organisation, die sich der Förderung und Weiterentwicklung des Datenschutzberufs verschrieben hat.

Sie können so einfach wie möglich - CIPT bestehen!

Man soll stets Maßnahmen für Erfolg, sondern keine Ausreden für Misserfolg finden. Die Schulungsunterlagen zur IAPP CIPT Zertifizierungsprüfung von Fast2test enthalten Testaufgaben und Antworten, die von unseren erfahrenen IT-Experten durch ihre ständige Praxis und Erforschung entworfen sind. Sie verfügen über hohe Genauigkeit und große Reichweite. Sie werden Ihr bester Helfer sein, während Sie die IAPP CIPT Zertifizierungsprüfung vorbereiten.

Um für die IAPP CIPT-Zertifizierung berechtigt zu sein, müssen Kandidaten mindestens zwei Jahre Erfahrung in der Datenschutztechnologie oder einem verwandten Bereich haben. Sie müssen auch die CIPT-Prüfung bestehen, die aus 90 Multiple-Choice-Fragen besteht und zweieinhalb Stunden dauert. Die Prüfung ist in mehreren Sprachen verfügbar und Kandidaten können sie online oder in einem Testzentrum ablegen.

IAPP Certified Information Privacy Technologist (CIPT) CIPT Prüfungsfragen mit Lösungen (Q13-Q18):

13. Frage

SCENARIO

WebTracker Limited is a cloud-based online marketing service located in London. Last year, WebTracker migrated its IT

infrastructure to the cloud provider Amazon, which provides SQL Databases and Artificial Intelligence services to WebTracker. The roles and responsibilities between the two companies have been formalized in a standard contract, which includes allocating the role of data controller to WebTracker.

The CEO of WebTracker, Mr. Bond, would like to assess the effectiveness of Amazon's privacy controls, and he recently decided to hire you as an independent auditor. The scope of the engagement is limited only to the marketing services provided by WebTracker, you will not be evaluating any internal data processing activity, such as HR or Payroll.

This ad-hoc audit was triggered due to a future partnership between WebTracker and SmartHome - a partnership that will not require any data sharing. SmartHome is based in the USA, and most recently has dedicated substantial resources to developing smart refrigerators that can suggest the recommended daily caloric intake based on DNA information. This and other personal data is collected by WebTracker.

To get an idea of the scope of work involved, you have decided to start reviewing the company's documentation and interviewing key staff to understand potential privacy risks.

The results of this initial work include the following notes:

There are several typos in the current privacy notice of WebTracker, and you were not able to find the privacy notice for SmartHome.

You were unable to identify all the sub-processors working for SmartHome. No subcontractor is indicated in the cloud agreement with Amazon, which is responsible for the support and maintenance of the cloud infrastructure.

There are data flows representing personal data being collected from the internal employees of WebTracker, including an interface from the HR system.

Part of the DNA data collected by WebTracker was from employees, as this was a prototype approved by the CEO of WebTracker.

All the WebTracker and SmartHome customers are based in USA and Canada.

Based on the initial assessment and review of the available data flows, which of the following would be the most important privacy risk you should investigate first?

- A. Verify that WebTracker's HR and Payroll systems implement the current privacy notice (after the typos are fixed).
- **B. Confirm whether the data transfer from London to the USA has been fully approved by Amazon and the appropriate institutions in the USA and the European Union.**
- C. Evaluate and review the basis for processing employees' personal data in the context of the prototype created by WebTracker and approved by the CEO.
- D. Review the list of subcontractors employed by Amazon and ensure these are included in the formal agreement with WebTracker.

Antwort: B

Begründung:

Transferring personal data across borders can pose significant privacy risks if not done in compliance with applicable data protection laws and regulations. It is important for WebTracker to confirm that this data transfer has been fully approved by all relevant parties to ensure that it is being done in a compliant manner.

14. Frage

SCENARIO

You have just been hired by Ancillary.com, a seller of accessories for everything under the sun, including waterproof stickers for pool floats and decorative bands and cases for sunglasses. The company sells cell phone cases, e-cigarette cases, wine spouts, hanging air fresheners for homes and automobiles, book ends, kitchen implements, visors and shields for computer screens, passport holders, gardening tools and lawn ornaments, and catalogs full of health and beauty products. The list seems endless. As the CEO likes to say, Ancillary offers, without doubt, the widest assortment of low-price consumer products from a single company anywhere.

Ancillary's operations are similarly diverse. The company originated with a team of sales consultants selling home and beauty products at small parties in the homes of customers, and this base business is still thriving. However, the company now sells online through retail sites designated for industries and demographics, sites such as "My Cool Ride" for automobile-related products or "Zoomer" for gear aimed toward young adults. The company organization includes a plethora of divisions, units and outrigger operations, as Ancillary has been built along a decentered model rewarding individual initiative and flexibility, while also acquiring key assets. The retail sites seem to all function differently, and you wonder about their compliance with regulations and industry standards. Providing tech support to these sites is also a challenge, partly due to a variety of logins and authentication protocols.

You have been asked to lead three important new projects at Ancillary:

The first is the personal data management and security component of a multi-faceted initiative to unify the company's culture. For this project, you are considering using a series of third-party servers to provide company data and approved applications to employees. The second project involves providing point of sale technology for the home sales force, allowing them to move beyond paper checks and manual credit card imprinting.

Finally, you are charged with developing privacy protections for a single web store housing all the company's product lines as well as products from affiliates. This new omnibus site will be known, aptly, as "Under the Sun." The Director of Marketing wants the site not only to sell Ancillary's products, but to link to additional products from other retailers through paid advertisements. You need to brief the executive team of security concerns posed by this approach.

Which should be used to allow the home sales force to accept payments using smartphones?

- A. Field transfer protocol.
- B. Radio Frequency Identification
- **C. Near-field communication**
- D. Cross-current translation.

Antwort: C

Begründung:

The technology that should be used to allow the home sales force to accept payments using smartphones is C.

Near-field communication (NFC). NFC is a short-range wireless technology that allows devices to exchange data when they are brought close together. This technology is commonly used in contactless payment systems and can be used to enable smartphones to accept payments.

15. Frage

Which is likely to reduce the types of access controls needed within an organization?

- A. Decentralization of data.
- **B. Increased number of remote employees.**
- C. Regular data inventories.
- D. Standardization of technology.

Antwort: B

Begründung:

Step by Step Comprehensive Detailed Explanation with References:

* Option A: Risk transfer involves shifting the risk to another party, such as through insurance. Simply informing customers does not transfer the risk.

* Option B: Risk mitigation involves taking steps to reduce the severity or likelihood of the risk.

Informing and obtaining consent does not mitigate the risk but acknowledges it.

* Option C: Risk avoidance involves changing plans to entirely avoid the risk. Informing customers of the risk is not avoiding it but rather acknowledging it.

* Option D: Risk acceptance involves recognizing the risk and deciding to proceed with it. By informing customers and obtaining their consent, the organization acknowledges the risk and accepts it as part of their operations.

16. Frage

A privacy governance program consists of interdependent components. Which component sits at the top of the program and is considered key for its success?

- A. Data inventory and management
- B. Privacy controls
- **C. Law and policy**
- D. Standards

Antwort: C

Begründung:

CIPT emphasizes that the foundation and top driver of a privacy governance program is:

Law and policy (regulatory requirements + internal policies)

These define:

* The rules the organization must follow

- All other components - data inventories, standards, privacy controls - derive from policy and legal requirements. Thus, Law and Policy sit at the top of the privacy hierarchy and govern all other privacy activities.

17. Frage

- A. Decreases the speed of data transfers.
- B. Can have an adverse effect on data quality.
- C. Increases the chance that someone can be identified from data.
- **D. Can limit business opportunities.**

Begründung:
