M2 Reliable Practice Materials | Review M2 Guide

According to the different demands from customers, the experts and professors designed three different versions of our M2 exam questions for all customers. According to your need, you can choose the most suitable version of our M2 guide torrent for yourself. The three different versions have different functions. If you decide to buy our M2 Test Guide, the online workers of our company will introduce the different function to you. You will have a deep understanding of the three versions of our M2 exam questions. We believe that you will like our M2 study guide.

International Code Council Commercial Mechanical Inspector Sample Questions (Q14-Q19):

NEW QUESTION # 14

For the installation of listed fuel-burning appliances, the required clearances should be found:

- A. in the mechanical code.
- B. on the approved plans and specifications for the building.
- C. by using a calculation based on the Btu/h output rating of the appliance.
- D. on the nameplate of the appliance.

Answer: D

Explanation:

The IMC requires fuel-burning units to be marked with the hourly rating, approved fuel type, and required clearances. That means the appliance marking/nameplate is the direct source for the required clearance information for listed fuel-burning appliances. This is why D is the correct answer.

NEW QUESTION # 15

Unless listed for a greater or smaller dimension, mechanical draft venting systems shall terminate a minimum of _____ feet below an operable window.

- A. 0
- B. 1
- C. 2
- D. 3

Answer: B

Explanation:

For mechanical draft venting systems, unless the appliance is listed for a different clearance, the vent terminal must be located not less than 4 feet below, 4 feet horizontally from, or 1 foot above any door, operable window, or gravity air inlet into a building. Therefore, the required minimum distance below an operable window is 4 feet, so Option B is correct.

NEW QUESTION # 16

Where the cooking surface has exposed flame and burners, the minimum distance between the lowest edge of a grease filter and the cooking or heating surface shall be _____ inches.

- A. 0
- B. 1
- C. 2
- D. 3

Answer: C

Explanation:

For cooking equipment with exposed flame and burners, the IMC table for grease-filter mounting position requires a minimum vertical separation of 24 inches between the lowest edge of the grease filter and the cooking surface. That makes C correct.

NEW QUESTION # 17

Infrared radiant heaters shall be installed:

- A. in accordance with UL 1240.
- B. with a 6-ft. clearance on all sides.
- C. with clearances from combustible material in accordance with the manufacturer's installation instructions.
- D. in accordance with UL 2158.

Answer: C

Explanation:

The ICC mechanical code provision for infrared radiant heaters states that the heaters must be installed with clearances from combustible material in accordance with the manufacturer's installation instructions .

That makes Option D the correct answer. The code does not establish a blanket 6-foot clearance on all sides in this section, and the exam expects the candidate to rely on the listed installation requirements for the appliance.

NEW QUESTION # 18

Natural, manufactured and liquefied petroleum, or a mixture of these, make up:

- A. fuel oil.
- B. liquefied petroleum gas.
- C. natural gas.
- **D. fuel gas.**

Answer: D

Explanation:

The IFGC definition of fuel gas is: natural gas, manufactured gas, liquefied petroleum gas or mixtures of these gases . That definition directly matches Option B .

NEW QUESTION # 19

.....

The purpose of your registration for M2 exam is definitely not to enjoy the exam process, but to pass the exam! The high passing rate of M2 study questions is absolutely what you need. Everyone wants to get more results in less time. After all, this society really needs us to be efficient.
