It is very necessary for a lot of people to attach high importance to the HPE7-A06 exam. It is also known to us that passing the exam is not an easy thing for many people, so a good study method is very important for a lot of people, in addition, a suitable study tool is equally important, because the good and suitable HPE7-A06 reference guide can help people pass the exam in a relaxed state. We are glad to introduce the HPE7-A06 Certification Dumps from our company to you. We believe our study materials will be very useful and helpful for all people who are going to prepare for the HPE7-A06 exam. There are a lot of excellent experts and professors in our company. In the past years, these experts and professors have tried their best to design the HPE7-A06 exam questions for all customers.

Do you want to earn the HP HPE7-A06 certification to land a well-paying job or a promotion? Prepare with HPE7-A06 real exam questions to crack the test on the first try. We offer our HP Campus Access Switching Expert Written Exam (HPE7-A06) Dumps in the form of a real HPE7-A06 Questions PDF file, a web-based HP HPE7-A06 Practice Questions, and HPE7-A06 desktop practice test software. Now you can clear the HP Campus Access Switching Expert Written Exam test in a short time without wasting time and money with actual HPE7-A06 questions of TestInsides.

Customizable HPE7-A06 Exam Mode - Test HPE7-A06 Collection Pdf

You can free download part of practice questions and answers about HP certification HPE7-A06 exam to test our quality. TestInsides can help you 100% pass HP Certification HPE7-A06 Exam, and if you carelessly fail to pass HP certification HPE7-A06 exam, we will guarantee a full refund for you.

HPE Campus Access Switching Expert Written Exam Sample Questions (Q47-Q52):

NEW QUESTION # 47

An HPE Aruba NetworkingCX switch administrator wants to monitor all inter-switch connections and change their descriptions dynamically with Python script and NAE engine. The administrator has written the script template and uploaded it to the switch GUI. After the upload, not all data is stored as planned.

Which things should be checked first? (Select three.)

- A. flash memory usage
- B. processor usage
- C. monitor usage
- D. memory usage
- E. script usage
- F. Agent usage

Answer: C,E,F

Explanation:

An NAE (Network Analytics Engine) Python script designed to monitor links and update descriptions isn't storing data as planned. We need the first things to check (select three).

* NAE Components & Troubleshooting: NAE involves Agents running Scripts, often triggered by Monitors observing system state (like interface status or LLDP changes). Failures can occur in any component or due to resource issues.

* Initial Checks:

* Script (script usage - C): Check the script itself for syntax errors, logic flaws, status, and logs (show nae script <name> [status|log]). Ensure it's uploaded correctly and enabled.

* Agent (Agent usage - B): Check the agent configured to run the script. Is it running? Are its parameters correct? Are there errors associated with the agent? (show nae agent [status|detail]).

Check agent resource limits.

* Monitor (monitor usage - E): If the script relies on a monitor to trigger or gather data, check the monitor's status, configuration, and associated conditions (show nae monitor [status|detail]). Is the monitor detecting the intended events?

* Resources (Processor/Memory/Flash - D, F, A): General switch health is important. High CPU (D) or memory (F) usage could prevent the script/agent from running correctly. If the script is supposed to store data persistently (e.g., write to a file or NAE database), check flash memory usage (A) or NAE database limits.

* Conclusion: When troubleshooting NAE, the core components to check first are the Script itself (C), the Agent running it (B), and any Monitors it depends on (E). These cover the specific NAE elements involved. General system resources (D, F, A) are secondary checks if the core components appear configured correctly but still fail.

References: AOS-CX NAE Guide (Scripting, Agents, Monitors, Troubleshooting). This relates to "Troubleshooting" (10%) and potentially "Performance Optimization" (6%).

NEW QUESTION # 48

Applying the command "ip Igmp snooping blocked VLAN 6. 6*" on a port ...

- A. won't allow multicast on that port in VLAN 5 and 6 and disables the port.
- B. won't prune multicast on that port on VLAN 5 and 6
- C. won't allow multicast traffic between VLAN 5 and 6.
- D. won't accept multicast Igmp joins on that port or VLAN 5 and 6.

Answer: D

Explanation:

The question asks for the effect of applying the command ip igmp snooping blocked vlan 5,6 on a switch port.

* ip igmp snooping blocked vlan <vlan-list>: This interface configuration command instructs the IGMP snooping process on the switch to block (ignore/drop) any inbound IGMP control packets (specifically Membership Reports, i.e., "joins", and Leave messages) received on this port for the specified VLANs (5 and 6 in this case).

* Effect: By blocking IGMP join messages from hosts connected to this port, the switch will not learn about any multicast group memberships requested by those hosts in VLANs 5 and 6. Consequently, the switch will not forward multicast traffic for those groups out of this port for those VLANs (unless the port is designated as a multicast router port). It effectively prevents hosts on this port from receiving multicast streams in the specified VLANs via standard IGMP mechanisms.

* Analysis of Options:

- * A: It results in traffic effectively being pruned because memberships aren't learned, but the command itself blocks the IGMP control packets (joins).
 - * B: Correct. It stops the switch from accepting IGMP join messages on this port for VLANs 5 and 6.
 - * C: Incorrect. It doesn't control inter-VLAN traffic.
 - * D: Incorrect. It doesn't disable the entire port.
- * Conclusion: The command specifically blocks the reception and processing of IGMP join messages on the configured port for the listed VLANs.
- References: AOS-CX Multicast Guide (IGMP Snooping configuration commands). This relates to the "Switching" (19%) objective.

NEW QUESTION # 49

You see the output unknown the first time you run the command, but the next time you see the following information displayed.
 What are some things you could look at in the switch to troubleshoot the issue? (Choose two.)

- A. **diag cable 1/1/X**
- B. diag 1/1/X transceiver all
- C. diag interface 1/1/X transceiver all
- D. **diag cable-diagnostic 1/1/X**
- E. diag interface transceiver all

Answer: A,D

Explanation:

diag cable 1/1/X → Runs a diagnostic test on the cable connected to the port to check for faults.

diag cable-diagnostic 1/1/X → Performs a detailed cable diagnostic to identify impedance, shorts, or open circuits.

NEW QUESTION # 50

A customer has configured eBGP peering using local AS 65000 with two routers from a CX 6300 VSF stack to third-party routers with the following switch ports:

[ports connecting to router - 1 10.10.10.2]

[ports connecting to router - 2 ip 10.10.20.2]

The LAGs are connected to L2 switches, which are used as a transit network for the eBGP routers.

What needs to be enabled on the AOX-CX switch to support bidirectional layer-2 problem detection and faster converge times that the third-party router will support?

- A.
- B.
- C.
- D.

Answer: C,D

Explanation:

UDLD on the LAG interface - UDLD (Unidirectional Link Detection) should be enabled on the LAGs to support bidirectional Layer-2 fault detection, ensuring that one-way failures are caught.

BGP with fall-over bfd under address-family - Configuring BFD (Bidirectional Forwarding Detection) with BGP peers provides sub-second detection of link failures, improving convergence times.

NEW QUESTION # 51

With the configuration of two CX 8325 switches in the VSX cluster, how would you prepare a link-aggregation for a 7000 gateway for a zero-touch provision to support protocol-based port redundancy?

- A.
- B.
- C.
- D.

Answer: C

Explanation:

To support protocol-based port redundancy (zero-touch provisioning) with a 7000 gateway and two CX 8325 VSX switches, you must configure lacp mode active and lacp fallback on a multi- chassis LAG. This ensures the gateway can form an LACP port-channel with either switch even before LACP negotiation begins, providing redundancy and seamless provisioning.

NEW QUESTION # 52

.....

HPE7-A06 exam dumps provided by TestInsides are tested through practice, and are the most correct and the newest practical HPE7-A06 test dumps. Our TestInsides can provide accurate HPE7-A06 certification training questions based on extensive research and the experience of real world to make you pass HPE7-A06 Certification Exam in a short time. If you purchase our HPE7-A06 exam dumps, we will offer free update service within one year.

Customizable HPE7-A06 Exam Mode: <https://www.testinsides.top/HPE7-A06-dumps-review.html>

So you begin to choose the company who can provide the best valid and accurate HPE7-A06 braindumps, HP HPE7-A06 Exam Introduction Clearly, the pursuit of your satisfaction has always been our common ideal, To try this you sincerely need to pass the HP HPE7-A06 certification examination, HP HPE7-A06 Exam Introduction So please feel free to contact us if you have any questions.

Photos from a school holiday pageant, for example, could be tagged with the name Customizable HPE7-A06 Exam Mode of the school, the names of children in each photo, the grade level of each child, the holiday, and even the location if the event wasn't held at the school.

2026 HPE7-A06 Exam Introduction | Newest 100% Free Customizable HPE Campus Access Switching Expert Written Exam Exam Mode

Here we will give you some more details of three versions, and all of them were designed for your needs: Pdf version of HPE7-A06 Test Dumps - Legible to read and remember, support HPE7-A06 customers' printing request, and also can be shared with your friends or colleagues.

So you begin to choose the company who can provide the best valid and accurate HPE7-A06 braindumps, Clearly, the pursuit of your satisfaction has always been our common ideal.

To try this you sincerely need to pass the HP HPE7-A06 certification examination, So please feel free to contact us if you have any questions, With the help of our HPE7-A06 dumps collection, all level of candidates can grasp the key content of the real exam and solve the difficulty of HPE7-A06 real questions easily.
