

# Data-Cloud-Consultant學習指南, Data-Cloud-Consultant指南

順便提一下, 可以從雲存儲中下載TestpdfData-Cloud-Consultant考試題庫的完整版: <https://drive.google.com/open?id=111D9txHDIHy15zSt8ONnD7E0iUFRxHn->

雖然Data-Cloud-Consultant考古題學習資料非常受歡迎, 但是我們還是為客戶提供了免費的Salesforce Data-Cloud-Consultant試用DEMO, 供考生體驗, 我們也將不斷發布更多新版的題庫, 以滿足IT行業日益增長的需求。我們將為您提供最新的Salesforce Data-Cloud-Consultant題庫資料來準備考試, 所有的題庫都可以在這裡獲得, 使通過Data-Cloud-Consultant考試變得更加容易。Testpdf將是您獲得認證的最好選擇, 我們保證您100%可以通過Data-Cloud-Consultant認證考試。

如果你想在短時間內, 以最小的努力, 達到最有效果的結果Salesforce的Data-Cloud-Consultant考試準備, 你可以使用TestpdfSalesforce的Data-Cloud-Consultant考試培訓資料, Testpdf的培訓資料是通過實踐檢驗了的, 也是通過眾多考生證明了它確實可以百分百通過考試, 利用了它, 你將達到你的目的, 得到最佳的效果。

## Data-Cloud-Consultant指南 - Data-Cloud-Consultant題庫最新資訊

如果你的預算是有限的, 但需要完整的價值包, 不如嘗試一下我們TestpdfSalesforce的Data-Cloud-Consultant考試培訓資料。我們Testpdf可以為你的IT認證保駕護航, 是目前網路上最受歡迎的最可行的培訓資料網站, Data-Cloud-Consultant考試是你職業生涯中的一個里程碑, 在這種競爭激烈的世界裏, 它比以往任何時候都顯得比較重要, 我們保證讓你一次輕鬆的通過考試, 也讓你以後的工作及日常工作變得有滋有味。還可以幫你挖掘到許多新的途徑和機會。這實在對著起這個價錢, 它所創造的價值遠遠大於這個金錢。

### Salesforce Data-Cloud-Consultant 考試大綱:

主題	簡介
主題 1	<ul style="list-style-type: none"><li>Act on Data: This topic defines activations and their basic use cases, using attributes and related attributes, identifying and analyzing timing dependencies affecting the Data Cloud lifecycle. Additionally it focuses on troubleshooting common problems with activations, and using data actions, including their requirements and intended use cases.</li></ul>
主題 2	<ul style="list-style-type: none"><li>Data Cloud Setup and Administration: This topic includes applying Data Cloud permissions, permission sets, org-wide settings. It describes and configures data stream types, and data bundles. Moreover, it discusses use cases for data spaces, creating data spaces, managing and administering Data Cloud using reports, dashboards, flows, packaging, data kits, diagnosing and exploring data using Data Explorer, Profile Explorer, and APIs.</li></ul>
主題 3	<ul style="list-style-type: none"><li>Data Cloud Overview: This topic covers Data Cloud's function, key terminology, business value, typical use cases, the Data Cloud lifecycle, dependencies, and principles of data ethics. These sub-topics provide an overview of Data Cloud's capabilities and applications.</li></ul>

## 最新的 Salesforce Data Cloud Data-Cloud-Consultant 免費考試真題 (Q150-Q155):

### 問題 #150

Which data stream category should be assigned to use the data for time-based operations in segmentation and calculated insights?

- A. Individual
- B. Engagement
- **C. Transaction**
- D. Sales Order

答案: C

#### 解題說明:

Data streams are the sources of data that are ingested into Data Cloud and mapped to the data model. Data streams have different categories that determine how the data is processed and used in Data Cloud. Transaction data streams are used for time-based operations in segmentation and calculated insights, such as filtering by date range, aggregating by time period, or calculating time-to-event metrics. Transaction data streams are typically used for event data, such as purchases, clicks, or visits, that have a timestamp and a value associated with them. Reference: Data Streams, Data Stream Categories

### 問題 #151

The Salesforce CRM Connector is configured and the Case object data stream is set up. Subsequently, a new custom field named Business Priority is created on the Case object in Salesforce CRM. However, the new field is not available when trying to add it to the data stream.

Which statement addresses the cause of this issue?

- A. The Salesforce Data Loader application should be used to perform a bulk upload from a desktop.
- B. Custom fields on the Case object are not supported for ingesting into Data Cloud.
- **C. The Salesforce Integration User is missing Read permissions on the newly created field.**
- D. After 24 hours when the data stream refreshes it will automatically include any new fields that were added to the Salesforce CRM.

答案: C

#### 解題說明:

##### Explanation

The Salesforce CRM Connector uses the Salesforce Integration User to access the data from the Salesforce CRM org. The Integration User must have the Read permission on the fields that are included in the data stream. If the Integration User does not have the Read permission on the newly created field, the field will not be available for selection in the data stream configuration. To resolve this issue, the administrator should assign the Read permission on the new field to the Integration User profile or permission set. ### 問題 #152

Northern Trail Outfitters (NTO), an outdoor lifestyle clothing brand, recently started a new line of business. The new business specializes in gourmet camping food. For business reasons as well as security reasons, it's important to NTO to keep all Data Cloud data separated by brand.

Which capability best supports NTO's desire to separate its data by brand?

- A. Data model objects for each brand
- **B. Data spaces for each brand**
- C. Data sources for each brand
- D. Data streams for each brand

答案: B

#### 解題說明:

##### Explanation

Data spaces are logical containers that allow you to separate and organize your data by different criteria, such as brand, region,

product, or business unit<sup>1</sup>. Data spaces can help you manage data access, security, and governance, as well as enable cross-cloud data integration and activation<sup>2</sup>. For NTO, data spaces can support their desire to separate their data by brand, so that they can have different data models, rules, and insights for their outdoor lifestyle clothing and gourmet camping food businesses. Data spaces can also help NTO comply with any data privacy and security regulations that may apply to their different brands<sup>3</sup>. The other options are incorrect because they do not provide the same level of data separation and organization as data spaces. Data streams are used to ingest data from different sources into Data Cloud, but they do not separate the data by brand<sup>4</sup>. Data model objects are used to define the structure and attributes of the data, but they do not isolate the data by brand<sup>5</sup>. Data sources are used to identify the origin and type of the data, but they do not partition the data by brand. ### 問題 #153

A customer has a calculated insight about lifetime value. What does the consultant need to be aware of if the calculated insight needs to be modified?

- A. Existing measures can be removed.
- **B. New dimensions can be added.**
- C. Existing dimensions can be removed.
- D. New measures can be added.

答案： B

解題說明：

A calculated insight is a multidimensional metric that is defined and calculated from data using SQL expressions. A calculated insight can include dimensions and measures. Dimensions are the fields that are used to group or filter the data, such as customer ID, product category, or region. Measures are the fields that are used to perform calculations or aggregations, such as revenue, quantity, or average order value. A calculated insight can be modified by editing the SQL expression or changing the data space. However, the consultant needs to be aware of the following limitations and considerations when modifying a calculated insight<sup>12</sup>:

Existing dimensions cannot be removed. If a dimension is removed from the SQL expression, the calculated insight will fail to run and display an error message. This is because the dimension is used to create the primary key for the calculated insight object, and removing it will cause a conflict with the existing data.

Therefore, the correct answer is B.

New dimensions can be added. If a dimension is added to the SQL expression, the calculated insight will run and create a new field for the dimension in the calculated insight object. However, the consultant should be careful not to add too many dimensions, as this can affect the performance and usability of the calculated insight.

Existing measures can be removed. If a measure is removed from the SQL expression, the calculated insight will run and delete the field for the measure from the calculated insight object. However, the consultant should be aware that removing a measure can affect the existing segments or activations that use the calculated insight.

New measures can be added. If a measure is added to the SQL expression, the calculated insight will run and create a new field for the measure in the calculated insight object. However, the consultant should be careful not to add too many measures, as this can affect the performance and usability of the calculated insight. ### 問題 #154

A consultant is integrating an Amazon S3 activated campaign with the customer's destination system. In order for the destination system to find the metadata about the segment, which file on the S3 will contain this information for processing?

- A. The .zip file
- B. The .txt file
- C. The .csv file
- **D. The json file**

答案： D

解題說明：

The file on the Amazon S3 that will contain the metadata about the segment for processing is B. The json file.

The json file is a metadata file that is generated along with the csv file when a segment is activated to Amazon S3. The json file contains information such as the segment name, the segment ID, the segment size, the segment attributes, the segment filters, and the
