Many times getting a right method is important and more efficient than spending too much time and money in vain. Our ITExamSimulator team devote themselves to studying the best methods to help you pass JN0-452 exam certification. From the time when you decide whether to purchase our JN0-452 exam software or not, we have provided you with comprehensive guarantees, including free demo download before buying, payment guarantee in purchase process, one-year free update service after you purchased JN0-452 Exam software, and full refund guarantee of dump cost if you fail JN0-452 exam certification, which are all our promises to ensure customer interests.

It is a prevailing belief for many people that practice separated from theories are blindfold. Our JN0-452 learning quiz is a salutary guidance helping you achieve success. The numerous feedbacks from our clients praised and tested our strength on this career, thus our JN0-452 practice materials get the epithet of high quality and accuracy.

>> **JN0-452 Training Solutions** <<

Fantastic JN0-452 Training Solutions Covers the Entire Syllabus of JN0-452

The more you practice with our JN0-452 simulating exam, the more compelling you may feel. Even if you are lack of time, these JN0-452 practice materials can speed up your pace of review. Our JN0-452 guide questions are motivating materials especially suitable for those exam candidates who are eager to pass the exam with efficiency. And we can claim that with our JN0-452 study braindumps for 20 to 30 hours, you will be bound to pass the exam.

Juniper Mist AI Wireless, Specialist (JNCIS-MistAI-Wireless) Sample Questions (Q44-Q49):

NEW QUESTION # 44

Which two statements correctly describe the Wi-Fi location component of Juniper Mist's location-based services? (Choose two.)

- A. It tracks third-party BLE tags.
- B. It is enabled by default.
- C. It is included in the Wireless Assurance subscription.
- D. It requires the Asset Visibility subscription.

Answer: C,D

Explanation:
Juniper Mist separates its Location-Based Services (LBS) into distinct functional areas: User Engagement (vBLE-based) and Asset Visibility (tracking assets via Wi-Fi or BLE). Understanding the licensing and default behavior is crucial for a successful deployment. The Wi-Fi location component is designed to track devices that are connected to the Wi-Fi network or are simply probing (unconnected). While basic connectivity data is part of the standard management, the high- fidelity tracking of these devices on a map as "assets" or "clients" for location analytics is tied to specific licensing tiers.
First, Wireless Assurance (B) provides the foundational telemetry and data collection required for basic location visibility. However, to unlock the full "Asset Tracking" capabilities-where the system actively correlates coordinates and provides historical data for specific Wi-Fi devices-the Asset Visibility subscription (D) is required. This subscription is what enables the Mist Cloud to process and store the location data for tags and Wi-Fi clients beyond simple real-time display.
Regarding the other options: Statement A is incorrect because the Wi-Fi location component tracks Wi-Fi devices; tracking BLE tags (third-party or otherwise) falls under the BLE/vBLE location component.
Statement C is incorrect because location services are typically not enabled by default to protect user privacy and optimize performance. An administrator must manually upload a floor plan, scale it, and enable
"Wi-Fi Engagement" or "Asset Tracking" within the Site settings or individual Access Point configurations to begin collecting location data. Once enabled and properly licensed, the Mist AI engine uses RSSI data from multiple APs to provide location coordinates for any Wi-Fi-emitting device in the environment.

NEW QUESTION # 45

A dynamic packet capture (dPCAP) is automatically triggered by the Mist system.
What is the most likely reason for this?

- A. A major network anomaly, such as a persistent authorization failure for a client, was detected.
- B. The administrator manually requested a packet capture on an AP.
- C. The AP has been offline for more than 10 minutes.
- D. A new client device has connected to the network for the first time.

Answer: A

NEW QUESTION # 46

An administrator is deploying a floorplan for accurate vBLE location services. They have already uploaded the floorplan image and correctly placed and oriented all the APs. What is the critical next step they must perform to ensure the location engine can make accurate calculations?

- A. Add wayfinding paths.
- B. Set the scale of the floorplan using a known physical distance.
- C. Validate the AP firmware versions.
- D. Create location zones for all major areas.

Answer: B

NEW QUESTION # 47

A retail company is planning to deploy asset tags to track shopping carts. The goal is to get real- time location data with zonal accuracy (3-5 meters).
Which two Mist technologies are primarily used to determine the location of these BLE asset tags? (Choose 2.)

- A. The Received Signal Strength Indicator (RSSI) of the tag's signal as heard by multiple APs.
- B. The vBLE antenna array in the APs to determine the direction of the tag's signal.

- C. The client's mobile SDK, which must be installed on the asset tag.
- D. The GPS coordinates transmitted by the asset tag.
- E. The MAC address of the asset tag.

Answer: A,B

NEW QUESTION # 48

Which two are valid query types in the Marvis conversational interface? (Choose two.)

- A. RANK
- B. MODIFY
- C. LIST
- D. CONFIGURE

Answer: A,C

NEW QUESTION # 49

......

As long as what you are looking for is high quality and accuracy practice materials, then our JN0-452 training guide is your indispensable choices. We are sufficiently definite of the accuracy and authority of our JN0-452 practice materials. So lousy materials will lead you end up in failure. They cannot be trusted unlike our JN0-452 Study Materials. Come together and our materials will serve as a doable way to strengthen your ability to solve questions on your way to success.
