## ECCouncil 312-85 Exam Cram - Certification 312-85 Torrent

We know that you have strong desire for success in your career, now, we recommend you to get the 312-85 exam certification. Test4Cram will help you and provide you with the high quality ECCouncil training material. 312-85 questions are selected and edited from the original questions pool and verified by the professional experts. Besides, the updated of 312-85 Pdf Torrent is checked every day by our experts and the new information can be added into the 312-85 exam dumps immediately.

## ECCouncil Certified Threat Intelligence Analyst Sample Questions (Q11-Q16):

### NEW QUESTION # 11

Alice, a threat intelligence analyst at HiTech Cyber Solutions, wants to gather information for identifying emerging threats to the organization and implement essential techniques to prevent their systems and networks from such attacks. Alice is searching for online sources to obtain information such as the method used to launch an attack, and techniques and tools used to perform an attack and the procedures followed for covering the tracks after an attack.

Which of the following online sources should Alice use to gather such information?

- A. Job sites
- **B. Hacking forums**
- C. Financial services
- D. Social network settings

**Answer: B**

Explanation:

Alice, looking to gather information on emerging threats including attack methods, tools, and post-attack techniques, should turn to hacking forums. These online platforms are frequented by cybercriminals and security researchers alike, where information on the latest exploits, malware, and hacking techniques is shared and discussed. Hacking forums can provide real-time insights into the tactics, techniques, and procedures (TTPs) used by threat actors, offering a valuable resource for threat intelligence analysts aiming to enhance their organization's defenses.

### NEW QUESTION # 12

Alison, an analyst in an XYZ organization, wants to retrieve information about a company's website from the time of its inception as well as the removed information from the target website.

What should Alison do to get the information he needs.

- A. Alison should recover cached pages of the website from the Google search engine cache to extract the required website information.
- B. Alison should run the Web Data Extractor tool to extract the required website information.
- C. Alison should use SmartWhois to extract the required website information.
- **D. Alison should use <https://archive.org> to extract the required website information.**

**Answer: D**

### NEW QUESTION # 13

An analyst is conducting threat intelligence analysis in a client organization, and during the information gathering process, he gathered information from the publicly available sources and analyzed to obtain a rich useful form of intelligence. The information source that he used is primarily used for national security, law enforcement, and for collecting intelligence required for business or strategic decision making.

Which of the following sources of intelligence did the analyst use to collect information?

- **A. OSINT**
- B. ISAC
- C. OPSEC
- D. SIGINT

**Answer: A**

### NEW QUESTION # 14

Michael, a threat analyst, works in an organization named TechTop, was asked to conduct a cyber-threat intelligence analysis. After obtaining information regarding threats, he has started analyzing the information and understanding the nature of the threats.

What stage of the cyber-threat intelligence is Michael currently in?

- **A. Known unknowns**
- B. Known knowns
- C. Unknown unknowns
- D. Unknowns unknown

**Answer: A**

Explanation:

The "known unknowns" stage in cyber-threat intelligence refers to the phase where an analyst has identified threats but the specific

details, implications, or full nature of these threats are not yet fully understood.

Michael, in this scenario, has obtained information on threats and is in the process of analyzing this information to understand the nature of the threats better. This stage involves analyzing the known data to uncover additional insights and fill in the gaps in understanding, thereby transitioning the "unknowns" into

"knowns." This phase is critical in threat intelligence as it helps in developing actionable intelligence by deepening the understanding of the threats faced.

### NEW QUESTION # 15

An attacker instructs bots to use camouflage mechanism to hide his phishing and malware delivery locations in the rapidly changing network of compromised bots. In this particular technique, a single domain name consists of multiple IP addresses.

Which of the following technique is used by the attacker?

- A. Dynamic DNS
- B. DNS zone transfer
- C. Fast-Flux DNS
- D. DNS interrogation

**Answer: C**

Explanation:

Fast-Flux DNS is a technique used by attackers to hide phishing and malware distribution sites behind an ever-changing network of compromised hosts acting as proxies. It involves rapidly changing the association of domain names with multiple IP addresses, making the detection and shutdown of malicious sites more difficult. This technique contrasts with DNS zone transfers, which involve the replication of DNS data across DNS servers, or Dynamic DNS, which typically involves the automatic updating of DNS records for dynamic IP addresses, but not necessarily for malicious purposes. DNS interrogation involves querying DNS servers to retrieve information about domain names, but it does not involve hiding malicious content. Fast-Flux DNS specifically refers to the rapid changes in DNS records to obfuscate the source of the malicious activity, aligning with the scenario described.
