

# D-PVM-OE-01 Latest Exam Registration, Reliable D-PVM-OE-01 Test Dumps

P.S. Free & New D-PVM-OE-01 dumps are available on Google Drive shared by Actual4Cert: [https://drive.google.com/open?id=1EP\\_W4GZaQhiC4bYQSNYqBKC9-zGLg37x](https://drive.google.com/open?id=1EP_W4GZaQhiC4bYQSNYqBKC9-zGLg37x)

Some people prefer to read paper materials rather than learning on computers. Of course, your wish can be fulfilled in our company. We have PDF version D-PVM-OE-01 exam guides, which are printable format. You can print it on papers after you have downloaded it successfully. If you want to change the fonts, sizes or colors, you can transfer the D-PVM-OE-01 exam torrent into word format files before printing. There are many advantages of the PDF version. Firstly, there are no restrictions to your learning. You can review the D-PVM-OE-01 Test Answers everywhere. Your spare time can be made good use. Secondly, you can make notes on your materials, which will accelerate your understanding of the D-PVM-OE-01 exam guides. In a word, our company seriously promises that we do not cheat every customer.

## EMC D-PVM-OE-01 Exam Syllabus Topics:

Topic	Details
Topic 1	<ul style="list-style-type: none"><li>PowerMax Family Local and Remote Replication Concepts: This section of the exam measures the skills of Backup and Recovery Specialists and covers the features and functionalities of TimeFinder SnapVX. Candidates must differentiate between SnapVX snapshots and clones while understanding their role in data protection. One key skill assessed is comparing the use cases of snapshots and clones.</li></ul>
Topic 2	<ul style="list-style-type: none"><li>Solutions Enabler 10 Implementation: This section of the exam measures the skills of Infrastructure Engineers and focuses on the fundamentals of Solutions Enabler. Candidates must understand its installation, upgrade processes, gatekeeper management, and daemon functions across different platforms. One crucial skill tested is managing Solutions Enabler daemons.</li></ul>
Topic 3	<ul style="list-style-type: none"><li>PowerMaxOS 10 Data Mobility: This section of the exam measures the skills of Data Migration Specialists and covers data mobility and migration features in PowerMaxOS 10. Candidates must understand the benefits of non-disruptive migration and be able to perform migrations using Unisphere for PowerMax. One key skill assessed is executing non-disruptive data migrations.</li></ul>

Topic 4	<ul style="list-style-type: none"> <li>• Unisphere for PowerMax 10 Implementation and Administration: This section of the exam measures the skills of System Administrators and covers the implementation and management of Unisphere for PowerMax. Candidates must understand the installation process, post-installation tasks, and interface navigation to efficiently operate the platform. One key skill evaluated is setting up Unisphere for PowerMax.</li> </ul>
Topic 5	<ul style="list-style-type: none"> <li>• PowerMax Family Storage Provisioning: This section of the exam measures the skills of Storage Administrators and covers the architecture, configurations, and management of the PowerMax family. Candidates must understand system models, port and device management, and provisioning methods using Unisphere for PowerMax. They are expected to perform service level-based provisioning and allocate storage through auto-provisioning groups. One key skill assessed is configuring storage using Unisphere for PowerMax.</li> </ul>
Topic 6	<ul style="list-style-type: none"> <li>• PowerMax Family Business Continuity Administration: This section of the exam measures the skills of Disaster Recovery Engineers and focuses on replication technologies used for business continuity. Candidates must perform SnapVX and Clone operations using Unisphere for PowerMax and understand Symmetrix Remote Data Facility (SRDF) replication. They must also execute SRDF operations using Unisphere and SYMCLI.</li> </ul>
Topic 7	<ul style="list-style-type: none"> <li>• PowerMax Family Management in a Virtual Environment: This section of the exam measures the skills of Virtualization Engineers and evaluates the integration of PowerMax storage in virtualized environments. Candidates must understand VMware vSphere, the functionalities of Virtual Storage Integrator (VSI), and how to monitor virtualized workloads using Unisphere for PowerMax. One critical skill assessed is tracking virtual machine storage performance.</li> </ul>

## Reliable D-PVM-OE-01 Test Dumps, Latest Test D-PVM-OE-01 Simulations

To let the client be familiar with the atmosphere of the D-PVM-OE-01 exam we provide the function to stimulate the exam and the timing function of our study materials to adjust your speed to answer the questions. We provide the stimulation, the instances and the diagrams to explain the hard-to-understand contents of our D-PVM-OE-01 Study Materials. For these great merits we can promise to you that if you buy our D-PVM-OE-01 study materials you will pass the test with few difficulties.

## EMC Dell Technologies PowerMax Operate Sample Questions (Q105-Q110):

### NEW QUESTION # 105

The Reserved Capacity for a PowerMax Storage Resource Pool (SRP) has been set to 15%. A TimeFinder SnapVX snapshot has been created for a Storage Group containing 10 devices. An application is actively performing read and write I/Os to these devices. The snapshot is linked to the target in Copy mode. Allocation for the SRP reaches 85%.

What will happen to the copy process?

- A. Copy to target will fail
- B. Array increases compression to free up space
- C. Copy to target will halt
- D. Copy to target will continue and complete

**Answer: C**

### NEW QUESTION # 106

An RDF group on a VMAX3 array is being replicated in SRDF/A mode to a remote VMAX3 array. To accommodate application growth a new R1 device needs to be added to the RDF group. SRDF/A consistency of the existing devices in the RDF group should be maintained when the new device is added.

What is the correct sequence of steps for adding the new R1 device and making it available for application use?

**Answer:**

Explanation:

□

#### NEW QUESTION # 107

A systems administrator plans to use Non-Disruptive Migration (NDM) to migrate data from a VMAX array running Enginuity 5876 to a PowerMax running PowerMaxOS 5978. Which NDM mode will be used?

- A. Adaptive Copy
- B. Asynchronous
- C. Pass-through
- D. Metro-based

**Answer: C**

#### NEW QUESTION # 108

A PowerMax administrator modified a Storage Group to add more volumes. The administrator then decides to use the Suitability Check to ensure compliance is met. The Suitability check runs but does not provide any information. What is the likely cause for this issue?

- A. Steps were skipped in the Modify Storage Group setup before running the Suitability Check
- B. Array has not been registered for performance data collection
- C. Suitability Check was run before the Storage Group was configured
- D. Volumes were added to the Storage Group before using the Suitability report

**Answer: A**

#### NEW QUESTION # 109

A customer has a clone session for the storage group DATA that is no longer needed.

□ Using the simulator, terminate the clone session for the storage group.

**Answer:**

Explanation:

See the explanation for step by step solution.

Explanation:

We need to terminate a clone session for the storage group named "DATA" in the Unisphere for PowerMax simulator.

Here's a step-by-step guide on how to do this, based on typical Unisphere functionality and the context of the question:

Steps:

1. Launch the Simulator and Navigate to the TimeFinder/Clone Section

\* Open Unisphere for PowerMax in your web browser.

\* Log in to the simulator (you should already be logged in with the array SID 1762 selected, based on the provided image).

\* In the left-hand navigation pane, locate the section related to TimeFinder operations. This is usually found under:

\* Data Protection

\* Local Protection

\* TimeFinder

\* Expand the relevant sections and click on TimeFinder SnapVX or TimeFinder Clone (the exact wording might vary slightly in the simulator). The goal is to get to the view where you can manage clone sessions.

2. Locate the Clone Session for the "DATA" Storage Group

\* The TimeFinder/Clone view will display a list of existing clone sessions.

\* You need to find the session associated with the "DATA" storage group. Look for the following:

\* Storage Group Name: The "DATA" storage group should be listed as the source of the clone session.

\* Session Type/Mode: Verify that it's a Clone session (not a SnapVX snapshot or another type of session).

3. Select the Clone Session

\* Once you've found the correct clone session for the "DATA" storage group, select it.

\* You can usually do this by:

\* Clicking a checkbox next to the session.

\* Clicking on the session itself (if the interface allows it).

4. Terminate the Clone Session

- \* After selecting the clone session, look for an action button or menu option to terminate it. This might be labeled:
- \* "Terminate"
- \* "Delete"
- \* "Remove"
- \* "Fracture"(in some older versions)
- \* "Stop"
- \* Click the appropriate button to initiate the termination process.
- \* Confirmation: You will likely be prompted with a confirmation message to ensure you want to terminate the selected clone session. Verify that you have selected the correct session (the one for the "DATA" storage group) and confirm the termination.

## NEW QUESTION # 110

.....

As is known to all, before purchasing the D-PVM-OE-01 Study Guide, we need to know the features of it. We offer you free demo to have a try, so that you can know the characteristics of D-PVM-OE-01 exam dumps. Beside we have three versions, each version have its own advantages, and they can meet all of your demands. And we have free update for 365 days after buying, the latest version will send to you email box automatically.
