# Pass Guaranteed 2026 The Best 300-745: Latest Designing Cisco Security Infrastructure Study Guide

Market is a dynamic place because a number of variables keep changing, so is the practice materials field of the 300-745 practice exam. Our 300-745 exam dumps are indispensable tool to pass it with high quality and low price. By focusing on how to help you effectively, we encourage exam candidates to buy our 300-745 practice test with high passing rate up to 98 to 100 percent all these years. Our Cisco exam dumps almost cover everything you need to know about the exam. As long as you practice our 300-745 Test Question, you can pass exam quickly and successfully. By using them, you can not only save your time and money, but also pass 300-745 practice exam without any stress.

Our passing rate is very high to reach 99% and our 300-745 exam torrent also boost high hit rate. Our 300-745 study questions are compiled by authorized experts and approved by professionals with years of experiences. They are compiled according to the latest development conditions in the theory and practice and the questions and answers are based on real exam. Our study materials can improves your confidence for real exam and will help you remember the exam questions and answers that you will take part in. You can choose the version which suits you mostly. Our Designing Cisco Security Infrastructure exam torrents simplify the important information and seize the focus to make you master the 300-745 Test Torrent in a short time.

## 2026 Latest 300-745 Study Guide | Professional 100% Free 300-745 Free Pdf Guide

To ensure your 100% satisfaction, 300-745 free demo are available for the certification exam you're going to take before you purchased. All our 300-745 dumps collection is quite effectively by millions of people that passed 300-745 Real Exam and become professionals in IT filed. You will never regret choosing our 300-745 test answers as your practice materials because we will show you the most authoritative study guide.

## Cisco Designing Cisco Security Infrastructure Sample Questions (Q43-Q48):

**NEW QUESTION # 43**
In preparation for an upcoming security audit, a metal production company decided to enhance the security of container-based services running in a Kubernetes environment. The company wants to ensure that all communications between applications and services are encrypted. The administrator plans to implement mTLS service between application and services to secure the data exchanges. Given the need to manage encryption at scale and maintain efficient communication across the cluster, which network transport technology must be employed?

- A. load balancing
- B. ingress controller
- C. Kubernetes network policies
- D. Service Mesh

**Answer: D**

Explanation:

A Service Mesh provides built-in support for mutual TLS (mTLS) between microservices, ensuring encrypted communication at scale in Kubernetes environments. It also centralizes management of certificates, keys, and security policies, making it the right choice for securing data exchanges across the cluster.

## NEW QUESTION # 44
Which two metrics are important for evaluating the performance of automated security response workflows? (Choose two.)

- A. Mean Time to Respond (MTTR)
- B. Mean Time to Detect (MTTD)
- C. VLAN propagation speed
- D. CPU temperature

**Answer: A,B**

Explanation:
MTTD measures how quickly incidents are detected, and MTTR measures how quickly they are resolved. Together, they indicate the effectiveness of automated security response workflows.

## NEW QUESTION # 45
A restaurant distribution center recently suffered a password spray attack targeting the Cisco Secure Firepower Threat Defense VPN headend. The attack attempts to gain unauthorized access by trying common passwords across many accounts. The attack poses a significant security threat to the organization's remote access infrastructure. To enhance the security of VPN setup and minimize the risk of similar attacks in the future, the IT security team must implement effective mitigation measures. Which technique effectively reduces the risk of this type of attack?

- A. Enable AAA authentication for the DefaultWEBVPN and DefaultRAGroup Connection Profiles.
- B. Disable group aliases in the connection profiles.
- C. Implement an access list to block addresses from the previous password spray attack.
- D. Change the AAA authentication method from RADIUS to TACACS+.

**Answer: A**

Explanation:
Enabling AAA authentication on the default connection profiles ensures that all VPN access attempts must go through strong authentication. This directly mitigates password spray attacks by enforcing centralized authentication controls, enabling account lockout, and supporting additional protections such as multifactor authentication.

## NEW QUESTION # 46
A developer is building new API functions for a cloud-based application. Before writing the code, the developer wants to ensure that destructive actions, including deleting and updating data, are properly protected by access control identifying sensitive fields such as those that contain passwords or personally identifiable information. Which approach must be used to score the risks proactively?

- A. SAST
- B. CSPM
- C. Open API Specification Analysis
- D. SBOM Generation

**Answer: C**

Explanation:
Open API Specification Analysis evaluates API definitions before code is written, identifying risky endpoints (such as delete or update functions) and sensitive fields (like PII or passwords). This allows developers to proactively score risks and apply proper access controls early in the design phase.

## NEW QUESTION # 47
An IT company operates an application in a SaaS model. The administrative tasks, such as customer onboarding, within the

application must be restricted to users who are on the corporate network where admins can access those functions via a web browser or a smartphone application. Which application technology must be used to provide granular control based on function?

- A. security group
- B. RBAC
- C. Service Mesh
- D. VPC

**Answer: B**

Explanation:
Role-Based Access Control (RBAC) restricts application functions (such as administrative tasks) to specific users or groups based on their roles. This ensures that only authorized users on the corporate network can perform sensitive operations, while others are limited to non-administrative functions.

**NEW QUESTION # 48**

......

Our experts have prepared Cisco Designing Cisco Security Infrastructure dumps questions that will eliminate your chances of failing the exam. We are conscious of the fact that most of the candidates have a tight schedule which makes it tough to prepare for the Designing Cisco Security Infrastructure exam preparation. DumpStillValid provides you 300-745 Exam Questions in 3 different formats to open up your study options and suit your preparation tempo.

**300-745 Free Pdf Guide**: https://www.dumpstillvalid.com/300-745-prep4sure-review.html

Cisco Latest 300-745 Study Guide If you choose us, you can just put your heart at rest, This quality CCNP Security 300-745 practice questions PDF polishes your skills and widens your horizons intellectually to ace challenges of a complex IT certification like Cisco CCNP Security, DumpStillValid is responsible for our 300-745 study materials, Our supporter of 300-745 DumpStillValid Pass Guide study guide has exceeded tens of thousands around the world, which directly reflects the quality of them.

We also provide timely and free update for you to get more 300-745 questions torrent and follow the latest trend, Data Source View, If you choose us, you can just put your heart at rest.

This quality CCNP Security 300-745 Practice Questions PDF polishes your skills and widens your horizons intellectually to ace challenges of a complex IT certification like Cisco CCNP Security.
