In addition, UiAAAv1 Exam Dumps contain both questions and answers, and they also cover most of knowledge points for the exam, and you can improve your professional knowledge as well as pass the exam.

UiPath Agentic Automation Associate Sample Questions (Q41-Q46):

NEW QUESTION # 41

Which machine catalog supports the deployment of image updates using Citrix Studio?

- A. Manual provisioning
- B. Machine Creation Services
- C. Citrix Provisioning
- D. Remote PC Access

Answer: B

Explanation:

Machine Creation Services (MCS) integrates with Citrix Studio to manage and deploy image updates. When the master image is updated, MCS can roll out those changes to all machines in the catalog, making it the catalog type that supports image updates directly from Studio.

NEW QUESTION # 42

A Citrix Administrator is creating a Pooled/Random catalog using Machine Creation Services (MCS). Which service on the Citrix Delivery Controller will enable the communication to the Hypervisor?

- A. Citrix Environment Test Service
- **B. Citrix Host Service**
- C. Citrix Broker Service
- D. Citrix Hypervisor Service

Answer: B

Explanation:

The Citrix Host Service on the Delivery Controller manages communication with the hypervisor. It enables Machine Creation Services (MCS) to provision, power manage, and update virtual machines in pooled or random catalogs.

NEW QUESTION # 43

By default, what are the settings for browser content redirection and client drive mapping in Citrix Virtual Apps and Desktops?

- A. Browser content redirection: Allowed, Client drive mapping: Disabled
- **B. Browser content redirection: Disabled, Client drive mapping: Enabled**
- C. Browser content redirection: Allowed, Client drive mapping: Enabled
- D. Browser content redirection: Disabled, Client drive mapping: Disabled

Answer: B

Explanation:

In Citrix Virtual Apps and Desktops, browser content redirection is disabled by default and must be explicitly configured. Client drive mapping is enabled by default, allowing users to access local drives within their sessions unless restricted by policy.

NEW QUESTION # 44

After creating a new machine catalog using the Machine Creation Services (MCS) wizard in Citrix Studio, a Citrix Administrator determines that Windows activation fails for all new machines in that catalog.

Which two conditions can cause this to happen? (Choose two.)

- **A. The version of Windows installed uses Multiple Activation Key (MAK) licensing.**
- B. The version of Windows installed is Windows Server 2012 R2.
- C. The Microsoft License Server is unreachable.
- **D. The base image rearm count has been exceeded.**

Answer: A,D

Explanation:

Rearm count exceeded: If the base image has been sysprepped too many times, the rearm count may be exhausted, preventing Windows activation on cloned machines.

MAK licensing: MCS-provisioned machines are treated as newly deployed instances. MAK licensing is not suitable for this scenario because each clone would require its own activation, leading to failures.

NEW QUESTION # 45

Scenario: A Citrix Administrator created a machine catalog using Machine Creation Services. The Desktop Experience was set to 'Random'.

Where will the unique information for the virtual machines be stored?

- A. In the differencing disk of each virtual machine
- B. Only in the Site database
- **C. In the identity disk of each virtual machine**
- D. In the PERSONALITY.INI file at the root directory of each virtual machine

Answer: C

NEW QUESTION # 46

.....

In the 21 Century, the UiAAAv1 certification became more and more recognized in the society because it represented the certain ability of examinees.
