## Valid Positive M2 Feedback - Authoritative Source of M2 Exam

After years of operation, our platform has accumulated a wide network of relationships, so that we were able to learn about the changes in the exam at the first time. This is a benefit that students who have not purchased M2 exam guide can't get. The team of experts hired by Commercial Mechanical Inspector study questions constantly updates and supplements the contents of study materials according to the latest syllabus and the latest industry research results. We also have dedicated staff to maintain M2 Exam Material every day, and you can be sure that compared to other test materials on the market, Commercial Mechanical Inspector study questions are the most advanced. With M2 exam guide, there will not be a situation like other students that you need to re-purchase guidance materials once the syllabus has changed. M2 exam material not only helps you to save a lot of money, but also let you know the new exam trends earlier than others.

## International Code Council Commercial Mechanical Inspector Sample Questions (Q35-Q40):

**NEW QUESTION # 35**

Given: a six-story, sprinklered, multifamily building with a continuously ventilated shaft extending vertically from the first floor to the roof and used for exhaust.

Which of the following requirements must also be met?

- A. kitchen exhaust that penetrates the shaft without a fire damper and extends vertically 22 inches.
- B. fire dampers are installed that are connected to an emergency generator rated for 1 hour.
- C. kitchen exhaust that penetrates the shaft without a fire damper and extends vertically 12 inches.
- D. have steel subducts with wall thickness of 0.0186 inch extending 22 inches horizontally into the shaft.

**Answer: A**

Explanation:

For this type of continuously ventilated exhaust shaft serving a multifamily building, the code requires the kitchen exhaust connection to penetrate the shaft and extend vertically not less than 22 inches without a fire damper. That matches Option D .

**NEW QUESTION # 36**

To test for tightness, a consumer's gas piping should never be filled with:

- A. oxygen.
- B. dry air.
- C. inert gas.
- D. air.

**Answer: A**

Explanation:

The IFGC section on test medium states that the test medium shall be air, nitrogen, carbon dioxide or an inert gas , and specifically states that oxygen shall not be used as a test medium . That makes C the correct answer.

**NEW QUESTION # 37**

Given: The listed clearance is 12 inches.

What would be the reduced clearance to combustibles, in inches, if the millboard is replaced with 24-gauge sheet metal?

- A. 0
- B. 1
- C. 2
- D. 3

**Answer: A**

Explanation:

For a clearance-reduction system using 24-gauge sheet metal with a ventilated 1-inch air space , the recognized reduction method brings a 12-inch listed clearance down to 4 inches . That matches Option B .

This is also consistent with the protection method shown in the exhibit.

**NEW QUESTION # 38**

Given: single-wall vent, which serves only one appliance, and has a height of 10 feet.

The maximum horizontal length permitted for a 5-inch diameter vent connector serving this vent is \_\_\_\_\_ feet.

- A. 0
- B. 1
- C. 7.5
- D. 2

**Answer: C**

Explanation:

For a single-wall vent connector serving one appliance, the maximum horizontal length is determined from the vent connector sizing and length rules. For a 5-inch diameter connector with a 10-foot vent height, the permitted maximum horizontal length is 7.5 feet. Therefore, Option B is correct.

### NEW QUESTION # 39

Pipe and duct insulation can be used within plenums except:

- A. where the flame spread index is not more than 25.
- B. where the assembly has been tested to UL 723.
- C. where the assembly has been tested to ASTM B84.
- D. where the assembly has been tested to ASTM E84.

**Answer: C**

Explanation:

For materials such as pipe and duct insulation within plenums, the IMC references ASTM E84 or UL 723 for surface-burning characteristics, along with the flame-spread and smoke-developed limits applicable to plenums. ASTM B84 is not the referenced plenum test standard here, so it is the incorrect condition and therefore the correct exam answer to the "except" question. This makes Option C correct.

### NEW QUESTION # 40

.....

Our International Code Council M2 practice exam software is the most impressive product to learn and practice. We have a team of professional software developers to ensure the software's productivity. After installation, International Code Council M2 Practice Exam software is used without an internet connection.
