Egal wie anziehend die Werbung ist, ist nicht so überzeugend wie Ihre eigene Erfahrung. Auf unserer Webseite können Sie die Demo der SAP C-TS470-2412 Prüfungssoftware kostenlos herunterladen. Wir glauben, solange Sie diese Software, die vielen Leuten bei der SAP C-TS470-2412 geholfen hat, probiert haben, werden Sie diese Software sofort mögen. Benutzen Sie unsere Produkte! Sie können auch ein IT-Spezialist mit SAP C-TS470-2412 Prüfungszeugnis werden!

## SAP Certified Associate - SAP S/4HANA Cloud Private Edition Service C-TS470-2412 Prüfungsfragen mit Lösungen (Q14-Q19):

### 14. Frage

Which functions are defined in the item category configuration? Note: There are 2 correct answers to this question.

- **A. Billing plan type**
- B. Product type
- **C. Billing relevance**
- D. Contract item filter by product list

**Antwort: A,C**

Begründung:

Item category configuration in SAP S/4HANA Service defines item behavior:

\* Billing plan type: Specifies if and how billing plans (e.g., periodic, milestone) are applied to the item.

\* Billing relevance: Determines whether the item is billable (e.g., A for order-related billing) and how it's processed in billing documents.

\* Contract item filter by product list: Not a standard function in item category configuration.

\* Product type: Defined in material/service master data, not item category. This is set in Customizing under Service # Transactions. "Item category configuration defines billing plan type and billing relevance for service items." (SAP Help Portal, Item Category Configuration).

### 15. Frage

Why would you maintain price agreements in a service contract?

- A. To define the yearly contract price
- B. To select the price agreements in the service order
- **C. To automatically adjust the service order prices**
- D. To define the monthly contract price

**Antwort: C**

Begründung:

In SAP S/4HANA Cloud Private Edition, Service, price agreements in a service contract define specific pricing conditions (e.g.,

discounts, fixed rates) for services or spare parts. The primary purpose is to automatically adjust the service order prices (Option D). When a service order is created and linked to a service contract, the system applies the price agreements from the contract to the order's items, ensuring consistent and contract-specific pricing without manual intervention. This automation enhances efficiency and accuracy in billing.

\* A and B: Defining yearly or monthly prices might be part of the contract's billing plan, not the purpose of price agreements specifically.

\* C: Price agreements are not "selected" in the service order; they are automatically applied based on the contract.

"Price agreements in a service contract are maintained to automatically adjust prices in associated service orders, ensuring that contract-specific conditions are consistently applied."

## 16. Frage

What are examples of customizing activities required for an in-house repair process? Note: There are 3 correct answers to this question.

- A. Enable Item-Based Accounting for Service Management
- B. Define Basic Settings for Transactions
- C. Define Derivation of Attendance Type, Activity Type, and Cost Element
- D. Define Number Ranges
- E. Define Partner Determination Procedure

**Antwort: A,B,D**

Begründung:

The in-house repair process (scope item 3XK) in SAP S/4HANA Cloud Private Edition requires specific customizing activities to set up the system:

\* Enable Item-Based Accounting for Service Management: This is critical for in-house repair to activate item-level cost and revenue tracking, ensuring accurate financial postings for repair orders.

\* Define Basic Settings for Transactions: This includes configuring transaction types (e.g., REPA for repair orders) and item categories, which are foundational for processing in-house repairs.

\* Define Number Ranges: Number ranges must be defined for repair orders and related documents to ensure unique identification and proper document flow.

\* Define Derivation of Attendance Type, Activity Type, and Cost Element: This is more relevant to time recording or project accounting, not a core requirement for in-house repair.

\* Define Partner Determination Procedure: While useful, it's not mandatory for the basic in-house repair process setup. These activities are outlined in the SAP Best Practices for in-house repair configuration. "Customizing for in-house repair includes enabling item-based accounting, defining transaction settings, and setting up number ranges." (SAP Signavio Process Navigator, In-House Repair).

## 17. Frage

You want to configure the organizational units for Service with Advanced Execution. Which of the following business objects can you assign to a planning plant?

- A. Maintenance planner group
- B. Maintenance work center
- C. Company code
- D. Location

**Antwort: A,B**

Begründung:

In Service with Advanced Execution, organizational units are configured to support complex service scenarios. The correct answers are maintenance work center (A) and maintenance planner group (D). Let's dive deep.

Planning Plant Role:

The planning plant is the central organizational unit for maintenance and service planning, assigned in enterprise structure (SPRO # Enterprise Structure).

\* Maintenance work center (A): A work center (e.g., "Field Service Team") is assigned to a planning plant in its master data (IR01/IR02). It defines where work is executed and is critical for scheduling in advanced execution.

\* Maintenance planner group (D): A planner group (e.g., "PLG1") is assigned to a planning plant (via IP01 or customizing) to manage planning activities (e.g., who schedules orders).

Why Not the Others?

\* Company code (B): A company code is a financial entity assigned to plants, not a service-specific object.

\* Location (C): Locations are geographic data, not directly assigned to planning plants in this context.

Advanced Execution Context:

In advanced execution, these assignments enable resource-related billing and detailed scheduling.

"In Service with Advanced Execution, maintenance work centers and planner groups are assigned to a planning plant for organizational setup."

### 18. Frage

Which item categories can you use in service orders? Note: There are 3 correct answers to this question.

- A. Service items
- B. Solution items
- C. Sales items
- D. Expense items
- E. Delivery items

Antwort: A,C,D

Begründung:

In SAP S/4HANA Cloud Private Edition, Service, service orders support various item categories to represent different types of activities or materials. The correct answers are:

\* Service items (A): Used for billable services performed (e.g., repair or maintenance tasks).

\* Sales items (C): Used for selling products or spare parts within the service order.

\* Expense items (E): Used to record costs (e.g., travel or external services) that may or may not be billable.

\* Solution items (B): This is not a standard item category in service orders; it relates more to solution quotations or configurable products.

\* Delivery items (D): These are specific to sales processes (e.g., outbound deliveries), not service orders.

"Service orders support item categories such as service items for service activities, sales items for material sales, and expense items for cost recording."

### 19. Frage

.....

Die Schwierigkeiten können den Charakter eines Menschen testen. Eine schlechte Situation kann die Aufrichtigkeit eines Menschen zeigen. Wenn man einer schlechten Situation gegenüberstehen, können nur die mutigen es ganz leichtnehmen. Sind Sie ein mutiger Mensch? Wenn Sie sich nicht so gut auf Ihre Prüfung vorbereiten, können Sie es noch leichtnehmen. Weil Sie die Fragenkataloge zur SAP C-TS470-2412 Prüfung von ITZert haben. Und eine SAP C-TS470-2412 Prüfung wird Sie nicht niederschlagen.
