

Valid 712-50 Study Guide & 712-50 Positive Feedback

BONUS!!! Download part of PDFVCE 712-50 dumps for free: https://drive.google.com/open?id=1VSF-pzCY0fOLvA8dDk2rr6Us0Y7_7110

The software version is one of the three versions of our 712-50 actual exam, which is designed by the experts from our company. The functions of the software version are very special. For example, the software version can simulate the real exam environment. If you buy our 712-50 study questions, you can enjoy the similar real exam environment. So do not hesitate and buy our 712-50 preparation exam, you will benefit a lot from our products.

The EC-Council 712-50 exam leads to the CCISO certification. It covers different cognitive levels, which include the ability to recall facts such as the definitions and standards associated with the domains of the test. It also measures the individuals' capability to understand different applications of various concepts. Thirdly, this qualifying exam evaluates their ability to identify and provide solutions to problems when provided with a series of contexts and variables. You must develop the competence in answering these questions.

The CCISO certification exam is specifically designed for information security professionals who are responsible for the strategic planning, implementation, and management of an organization's information security program. 712-50 Exam Tests candidates on their knowledge of various domains, including governance and risk management, security program management, security operations and incident response, and information security core concepts.

EC-COUNCIL EC-Council Certified CISO (CCISO) Sample Questions (Q129-Q134):

NEW QUESTION # 129

SCENARIO: A Chief Information Security Officer (CISO) recently had a third party conduct an audit of the security program. Internal policies and international standards were used as audit baselines. The audit report was presented to the CISO and a variety of high, medium and low rated gaps were identified.

After determining the audit findings are accurate, which of the following is the MOST logical next activity?

- A. Validate gaps with the Information Technology team
- B. Create a briefing of the findings for executive management
- C. Review the security organization's charter
- D. Begin initial gap remediation analyses

Answer: D

Explanation:

Logical Next Activity After Validating Findings

* Once gaps are validated, the logical next step is to perform remediation analyses to prioritize actions based on the severity of the gaps and available resources.

* This step lays the groundwork for creating detailed remediation plans.

Why Not Other Options?

* B. Review the security organization's charter: Not directly relevant to addressing audit findings.

* C. Validate gaps with IT team: Validation is already complete at this stage.

* D. Create a briefing for management: Comes after understanding the scope and potential impact of the gaps.

EC-Council References

* Highlights gap remediation planning as a critical step post-validation to effectively address identified issues.

NEW QUESTION # 130

The ability to hold intruders accountable in a court of law is important. Which of the following activities are needed to ensure the highest possibility for successful prosecution?

- A. Collaboration with law enforcement
- B. Be able to retaliate under the framework of Active Defense
- C. Establishing Enterprise-owned Botnets for preemptive attacks
- **D. Well established and defined digital forensics process**

Answer: D

NEW QUESTION # 131

Which of the following is the MOST important reason for performing assessments of the security portfolio?

- A. To create executive support of the portfolio
- B. To discover new technologies and processes for implementation within the portfolio
- **C. To assure that the portfolio is aligned to the needs of the broader organization**
- D. To provide independent 3rd party reviews of security effectiveness

Answer: C

Explanation:

Assessing the security portfolio ensures alignment with the broader organizational goals and objectives. By regularly evaluating the portfolio, organizations can identify gaps, redundancies, and areas needing improvement, ensuring resources are allocated effectively. While executive support (B), discovering new technologies (C), and 3rd-party reviews (D) are beneficial, the primary goal of portfolio assessments is to align security efforts with organizational needs.

NEW QUESTION # 132

Scenario: An organization has made a decision to address Information Security formally and consistently by adopting established best practices and industry standards. The organization is a small retail merchant but it is expected to grow to a global customer base of many millions of customers in just a few years.

The organization has already been subject to a significant amount of credit card fraud. Which of the following is the MOST likely reason for this fraud?

- A. Security practices not in alignment with ISO 27000 frameworks
- B. Ineffective security awareness program
- C. Lack of technical controls when dealing with credit card data
- **D. Lack of compliance to the Payment Card Industry (PCI) standards**

Answer: D

Explanation:

Scenario3

As the Chief Information Security Officer, you are performing an assessment of security posture to understand what your Defense-in-Depth capabilities are. Which network security technology examines network traffic flows to detect and actively stop vulnerability exploits and attacks?

- Answer: A**
