## ISACA Certified in the Governance of Enterprise IT Exam Sample Questions (Q490-Q495):

### NEW QUESTION # 490

You are the business analyst for the YGT Organization. You have just completed a capabilities gap assessment and have determined

that your organization does not have the necessary resources and technology to seize a business opportunity. What is the most likely course of action for the organization?

- A. Launch a new project.
- B. Hire contractors to complete the project work.
- C. Move onto the next opportunity.
- D. Hire additional resources.

**Answer: A**

#### **NEW QUESTION # 491**

An enterprise is about to complete a major acquisition, and a decision has been made that both companies will be using the parent company's IT infrastructure. Which of the following should be done NEXT?

- A. Develop a communication plan to support the merger.
- B. Perform a business impact analysis (BIA).
- C. Conduct a gap analysis.
- D. Update the enterprise architecture (EA).

**Answer: C**

#### **NEW QUESTION # 492**

A small enterprise has just hired its first CIO, who has been tasked with making the IT department more efficient. What should be the CIO's NEXT step after identifying several new improvement initiatives?

- A. Mandate IT staff training.
- B. Request an IT balanced scorecard.
- C. Require a cost-benefit analysis.
- D. Allocate funding for the initiatives.

**Answer: C**

Explanation:

A cost-benefit analysis (CBA) is a process that's used to estimate the costs and benefits of projects or investments to determine their profitability for an organization. A CBA is a versatile method that's often used for business administration, project management and public policy decisions<sup>1</sup>. A CBA can help the CIO prioritize the improvement initiatives based on their expected value and feasibility, and justify the allocation of resources and funding for them. A CBA can also align the IT goals with the enterprise objectives and demonstrate the IT value delivery to the stakeholders<sup>2</sup>. References :=
