

Updated JN0-232 Dumps | JN0-232 Test Discount

DOWNLOAD the newest VerifiedDumps JN0-232 PDF dumps from Cloud Storage for free: <https://drive.google.com/open?id=10wI0k3ikFxSPeSNRW6ratOU3xiUd28oP>

The objective of Juniper JN0-232 is to assist candidates in preparing for the Juniper JN0-232 certification test by equipping them with the actual JN0-232 questions PDF and JN0-232 practice exams to attempt the JN0-232 Exam successfully. The Juniper JN0-232 practice material comes in three formats, desktop JN0-232 practice test software, web-based JN0-232 practice exam, and JN0-232 Dumps PDF that cover all exam topics.

The JN0-232 examination certification, as other world-renowned certification, will get international recognition and acceptance. People around the world prefer JN0-232 exam certification to make their careers more strengthened and successful. In VerifiedDumps, you can choose the products which are suitable for your learning ability to learn.

JN0-232 Test Discount & JN0-232 Examcollection Dumps

You can conveniently test your performance by checking your score each time you use our Juniper JN0-232 practice exam software (desktop and web-based). It is heartening to announce that all VerifiedDumps users will be allowed to capitalize on a free Juniper JN0-232 Exam Questions demo of all three formats of the Juniper JN0-232 practice test.

Juniper Security, Associate (JNCIA-SEC) Sample Questions (Q45-Q50):

NEW QUESTION # 45

Click the Exhibit button.

Referring to the exhibit, which two statements are correct? (Choose two.)

- A. The SRX firewall does not have an SSL proxy configuration.
- B. This is a custom Web filtering block message.
- C. The URL matches a predefined Web filtering category.
- D. The NextGen Web Filtering type is being used.

Answer: C,D

Explanation:

From the exhibit:

* The user attempted to access <https://www.wikipedia.org>.

* The block page indicates:

* CATEGORY: NG_Reference

* REASON: BY_PRE_DEFINED

* The header states: "Juniper Web Filtering has been set to block this site." Analysis of options:

* Option A: Correct. The log shows "REASON: BY_PRE_DEFINED," which means the site was blocked because it matched a predefined category in the Web filtering database.

* Option B: Correct. The category "NG_Reference" indicates that the NextGen (Enhanced/Cloud-based) Web Filtering type is being used.

* Option C: Incorrect. The exhibit does not provide any information about SSL proxy configuration; it only shows that the HTTPS site was blocked.

* Option D: Incorrect. The block page shown is the standard Juniper default block page, not a custom message.

Correct Statements: The URL matches a predefined Web filtering category, and the NextGen Web Filtering type is being used.

Reference: Juniper Networks - Web Filtering (SurfControl, Enhanced, and NextGen Web Filtering), Junos OS Security Fundamentals.

NEW QUESTION # 46

You need to capture control plane traffic on a high-end SRX Series device.

How would you accomplish this task?

- A. Apply a port mirroring configuration under the edit forwarding options hierarchy.
- B. Configure a packet capture under the edit security datapath-debug capture hierarchy.
- C. Apply a firewall filter matching the desired traffic using the sample action.
- D. Start a shell then use the tcpdump tool.

Answer: C

Explanation:

On high-end SRX platforms, control-plane (Routing Engine-destined) traffic transits the loopback (lo0) and is best captured by applying a firewall filter on lo0 with the then sample action, together with traffic sampling under forwarding-options to write packets to a file.

* sample sends matched control-plane packets to the sampling process, which can record them for analysis.

* datapath-debug capture focuses on data-plane/SPC paths and is not the tool for generic control-plane packet capture.

* tcpdump from shell is not the supported workflow on SRX; the operational command is monitor traffic, but for high-end control-plane capture, the recommended and scalable method is lo0 filter + sampling.

* Port mirroring mirrors transit data-plane traffic, not RE-destined control-plane packets.

Reference:Juniper Networks - Junos OS Security Fundamentals, "Capturing Control-Plane Traffic (lo0 filters and sampling)."

NEW QUESTION # 47

You want to verify the effectiveness of Web filtering on the SRX Series Firewall.

How would you accomplish this task?

- A. by examining the content filtering policies
- **B. by attempting to access permitted or blocked URLs**
- C. by installing a local NGWF server
- D. by checking the file extensions of blocked content

Answer: B

Explanation:

The simplest and most direct method of verifying Web filtering effectiveness is to attempt to access permitted and blocked URLs.

* Option A:Installing a local NGWF server is not required; NGWF queries Juniper's cloud.

* Option B:File extension checking applies to content filtering, not web filtering.

* Option C:Examining policies shows configuration but does not verify enforcement.

* Option D:Correct. Attempting to browse URLs that should be blocked or allowed confirms the Web filtering policy is effective.

Correct Method:Attempt to access permitted or blocked URLs

Reference:Juniper Networks -Verifying Web Filtering Configuration, Junos OS Security Fundamentals.

NEW QUESTION # 48

What is a purpose for creating multiple routing instances on an SRX Series Firewall device?

- A. to simplify the configuration of network interfaces
- B. to enable network monitoring through SNMP
- **C. to maintain separation of routing information for security purposes**
- D. to manage routing protocols and updates

Answer: C

Explanation:

Multiple routing instances (such as virtual routers or VRFs) can be configured on an SRX to provide separation of routing tables. This enables:

* Maintaining separation of routing information (Option B):Different departments, tenants, or customers can have their own independent routing domains for security and isolation.

* SNMP monitoring (Option A) is unrelated to routing instances.

* Routing protocols (Option C) can be run inside each instance, but the purpose of multiple instances is separation, not general routing protocol management.

* Simplifying interface configuration (Option D) is not a function of routing instances.

Correct Purpose:To maintain separation of routing information for security purposes.

Reference:Juniper Networks -Routing Instances and Virtual Routers, Junos OS Security Fundamentals.

NEW QUESTION # 49

Which zone configuration is required to permit transit traffic?

- **A. a user-defined security zone**
- B. a user-defined functional zone
- C. a system-defined Junos-host zone
- D. a system-defined null zone

Answer: A

Explanation:

Transit traffic is defined as traffic passing through the SRX firewall (from one interface/zone to another). To allow transit traffic:

* Interfaces must be placed into a user-defined security zone (Option C).

- * Policies between zones are then applied to control traffic.
 - * The null zone (Option A) discards all traffic.
 - * The Junos-host zone (Option B) is used for traffic destined to the SRX itself, not transit.
 - * Functional zones (Option D) are predefined and used for special purposes (like management), not for transit traffic.
- Correct Configuration: User-defined security zone
Reference: Juniper Networks - Security Zones and Transit Traffic, Junos OS Security Fundamentals.

NEW QUESTION # 50

.....

People around you are improving their competitiveness in various ways. Haven't you started to move? You must be more efficient than others before you can do more and get more pay! Our JN0-232 study materials will tell you that in a limited time, you can really do a lot of things. Of course, the quality of our JN0-232 Exam Questions is also very high. As you can say that with the help of our JN0-232 practice guide, the pass rate for our loyal customers is high as 98% to 100%. It is unique in the market.

JN0-232 Test Discount: <https://www.verifieddumps.com/JN0-232-valid-exam-braindumps.html>

Due to any reason, if you did not succeed in the final JN0-232 exam despite using VerifiedDumps JN0-232 pdf questions and practice tests, we will return your whole payment without any deduction, Considering the quality of our JN0-232 actual questions, it is undeniable that our products are the best, Juniper Updated JN0-232 Dumps But it is hard to ensure the quality and validity.

Identifies individuals with technician-level experience supporting JN0-232 and troubleshooting systems that run Red Hat Linux, Shortly after launching the Mac, however, Steve Jobs was forced to leave Apple.
