- A. During the planning phase
- B. Just prior to operationalization
- **C. Throughout the life cycle**

Answer: C

Explanation:

Explanation

IT governance implementation risk is best managed throughout the life cycle of the implementation. IT governance implementation risk is the possibility of negative consequences or outcomes that may arise from the design, execution, evaluation, or improvement of the IT governance system. The life cycle of IT governance implementation is a continuous process that involves four phases: what are the drivers, where are we now, where do we want to be, and how do we get there. IT governance implementation risk should be

managed throughout the life cycle by identifying, analyzing, evaluating, treating, monitoring, and communicating the risks that may affect the success of the implementation.¹² References: COBIT 2019 Framework: Introduction and Methodology, COBIT 2019 Implementation Guide: Implementing an Information and Technology Governance Solution
