We treat your time as our own time, as precious as you see, so we never waste a minute or two in some useless process. Please rest assured that use, we believe that you will definitely pass the exam.

### SAP Certified Associate - Integration Developer Sample Questions (Q54-Q59):

#### NEW QUESTION # 54

Which messaging patterns does SAP Event Mesh support for asynchronous communication?

- **A. Publish/subscribe and point-to-point messaging**
- B. Point-to-point and multicast messaging
- C. Publish/subscribe and request/reply messaging
- D. Request/reply messaging and multicast messaging

**Answer: A**

Explanation:

SAP Event Mesh supports two key asynchronous messaging patterns:

Publish/Subscribe # Producers publish an event once, multiple subscribers consume independently.

Point-to-Point (Queue-based) # Messages sent from one producer to a single consumer via a queue.

Other options are incorrect:

Request/Reply # Synchronous pattern, not the focus of Event Mesh.

Multicast messaging # Not explicitly supported; handled through Pub-Sub.

Thus, Event Mesh supports Publish/Subscribe and Point-to-Point messaging patterns.

#### NEW QUESTION # 55

What is Representational State Transfer (REST)?

- **A. An architectural style**
- B. An application protocol
- C. A description language for APIs
- D. A message protocol

**Answer: A**

Explanation:

Representational State Transfer (REST) is an architectural style for designing web services that are based on the stateless exchange of resources. REST uses uniform and predefined methods, such as GET, POST, PUT, and DELETE, to manipulate resources identified by URIs. REST also supports different formats for data representation, such as XML, JSON, or plain text. ### NEW QUESTION # 56

You configured a content modifier as follows: Action Create. Name: ProductID. Source Type: XPath. Source Value: //ProductID. Data Type: java lang string. After testing the content modifier, you receive an error message that contains the following fragment: java.lang.ClassNotFoundException java lang string. What caused the error message?

- A. Incorrect source value
- B. Incorrect name
- C. Incorrect source type
- **D. Incorrect data type**

**Answer: D**

Explanation:

The error message is caused by an incorrect data type in the content modifier configuration. The data type should be java.lang.String instead of java lang string. The data type defines the type of the value that will be stored in the header or property of the message. It should match one of the supported Java classes, such as java.lang.String, java.lang.Integer, java.lang.Boolean, and so on. If the data type is not valid, a java.lang.ClassNotFoundException will be thrown. Reference: Content Modifier | SAP Help Portal, Getting clear with SAP Integration Suite Content Modifier | SAP Blogs

### NEW QUESTION # 57

In the Cloud Integration capability within SAP Integration Suite, which internal message format is used?

- A. XSLT
- **B. XML**
- C. JSON

**Answer: B**

Explanation:

In the Cloud Integration capability within SAP Integration Suite, XML is the internal message format that is used. XML stands for Extensible Markup Language and is a standard format for representing structured data. All messages that are processed by the Cloud Integration capability are converted to XML internally and then transformed to the desired format at the outbound channel. Reference: Modernize Integration with SAP Integration Suite | openSAP

### NEW QUESTION # 58

Which of the following capabilities within SAP Integration Suite are core for integration? Note: There are 3 correct answers to this question.

- **A. API Management**
- **B. Integration Assessment**
- C. Open Connectors
- **D. Cloud Integration**
- E. Integration Advisor

**Answer: A,B,D**

Explanation:

The following capabilities within SAP Integration Suite are core for integration: Integration Assessment, Cloud Integration, and API Management. Integration Assessment allows you to evaluate your integration landscape and strategy and identify the best-fit integration technologies and tools for your scenarios. Cloud Integration allows you to design, deploy, and monitor integration flows between cloud and on-premise systems using various adapters and protocols. API Management allows you to create, publish, secure, and monitor APIs across different environments and platforms. Reference: Integration Software | SAP Integration Suite, Modernize Integration with SAP Integration Suite | openSAP

### NEW QUESTION # 59

.....

So rest assured that you will get top-notch and easy-to-use SAP C-CPI-2506 practice questions. The SAP Certified Associate -

Integration Developer (C-CPI-2506) PDF dumps file is the PDF version of real SAP Certified Associate - Integration Developer (C-CPI-2506) exam questions that work with all devices and operating systems.
