

# Verified and Updated Fortinet FCP\_FSA\_AD-5.0 Exam Questions & Answers

As promising learners in this area, every exam candidates need to prove self-ability to working environment to get higher chance and opportunities for self-fulfillment. Our FCP\_FSA\_AD-5.0 practice materials with excellent quality and attractive prices are your ideal choices which can represent all commodities in this field as exemplary roles. Even the fierce competition cannot stop demanding needs from exam candidates. To get more specific information about our FCP\_FSA\_AD-5.0 practice materials, we are here to satisfy your wish with following details.

In today's society, everyone wants to find a good job and gain a higher social status. As we all know, the internationally recognized FCP\_FSA\_AD-5.0 certification means that you have a good grasp of knowledge of certain areas and it can demonstrate your ability. This is a fair principle. But obtaining this FCP\_FSA\_AD-5.0 certificate is not an easy task, especially for those who are busy every day. We do not charge extra service fees, but the service quality is high. Your satisfaction is the greatest affirmation for us and we sincerely serve you. Our FCP\_FSA\_AD-5.0 Exam Guide deliver the most important information in a simple, easy-to-understand language that you can learn efficiently learn with high quality. Whether you are a student or an in-service person, our FCP\_FSA\_AD-5.0 exam torrent can adapt to your needs.

## Exam FCP\_FSA\_AD-5.0 Guide - FCP\_FSA\_AD-5.0 VCE Dumps

In order to provide the most effective FCP\_FSA\_AD-5.0 exam materials which cover all of the current events for our customers, a

group of experts in our company always keep an close eye on the changes of the FCP\_FSA\_AD-5.0 exam even the smallest one, and then will compile all of the new key points as well as the latest types of exam questions into the new version of our FCP\_FSA\_AD-5.0 Practice Test, and you can get the latest version of our FCP\_FSA\_AD-5.0 study materials for free during the whole year. Do not lose the wonderful chance to advance with times.

## Fortinet FCP - FortiSandbox 5.0 Administrator Sample Questions (Q34-Q39):

### NEW QUESTION # 34

A security analyst is reviewing a scan job report that indicates a true positive match. The job report displays that the malware attempts to replace vital system executables. Which type of malware is the analyst observing? (Choose one answer)

- A. Exploit
- **B. Rootkit**
- C. Dropper
- D. Trojan

**Answer: B**

Explanation:

The Results Analysis section gives direct malware-type definitions. It says: "A downloader attempts to download malicious content from a remote system", "A dropper installs malicious content", "A trojan appears to be a legitimate software application", and most importantly, "A rootkit attempts to hide its components by replacing valid system files." That exact wording matches the question statement about malware attempting to replace vital system executables. Replacing valid system files is classic rootkit behavior because the purpose is concealment and persistence by hiding malicious components behind trusted operating-system files. A dropper's main role is delivering payloads. A trojan is mainly deceptive software that appears legitimate. An exploit takes advantage of a vulnerability. None of those definitions match the described behavior as precisely as the rootkit definition in the Study Guide. Therefore, the malware type being observed is Rootkit.

### NEW QUESTION # 35

Which three actions does FortiSandbox perform when it is integrated with FortiMail for advanced threat protection (ATP)? (Choose three answers)

- **A. It analyzes file and URL objects.**
- B. It updates FortiGuard databases.
- **C. It queues email during analysis.**
- **D. It assigns and returns a rating for analyzed objects.**
- E. It submits objects for sandbox scanning.

**Answer: A,C,D**

### NEW QUESTION # 36

You are asked to configure FortiSandbox to use one VM instance for multiple sequential scan jobs without shutting down the instance between each scan job submission. Which scan profile setting must you enable to achieve this? (Choose one answer)

- A. VM scan ratio
- B. Adaptive VM scan
- **C. Pipeline mode**
- D. Parallel VM scan

**Answer: C**

Explanation:

From the Scanning and Rating Components lesson, the Study Guide explicitly states:

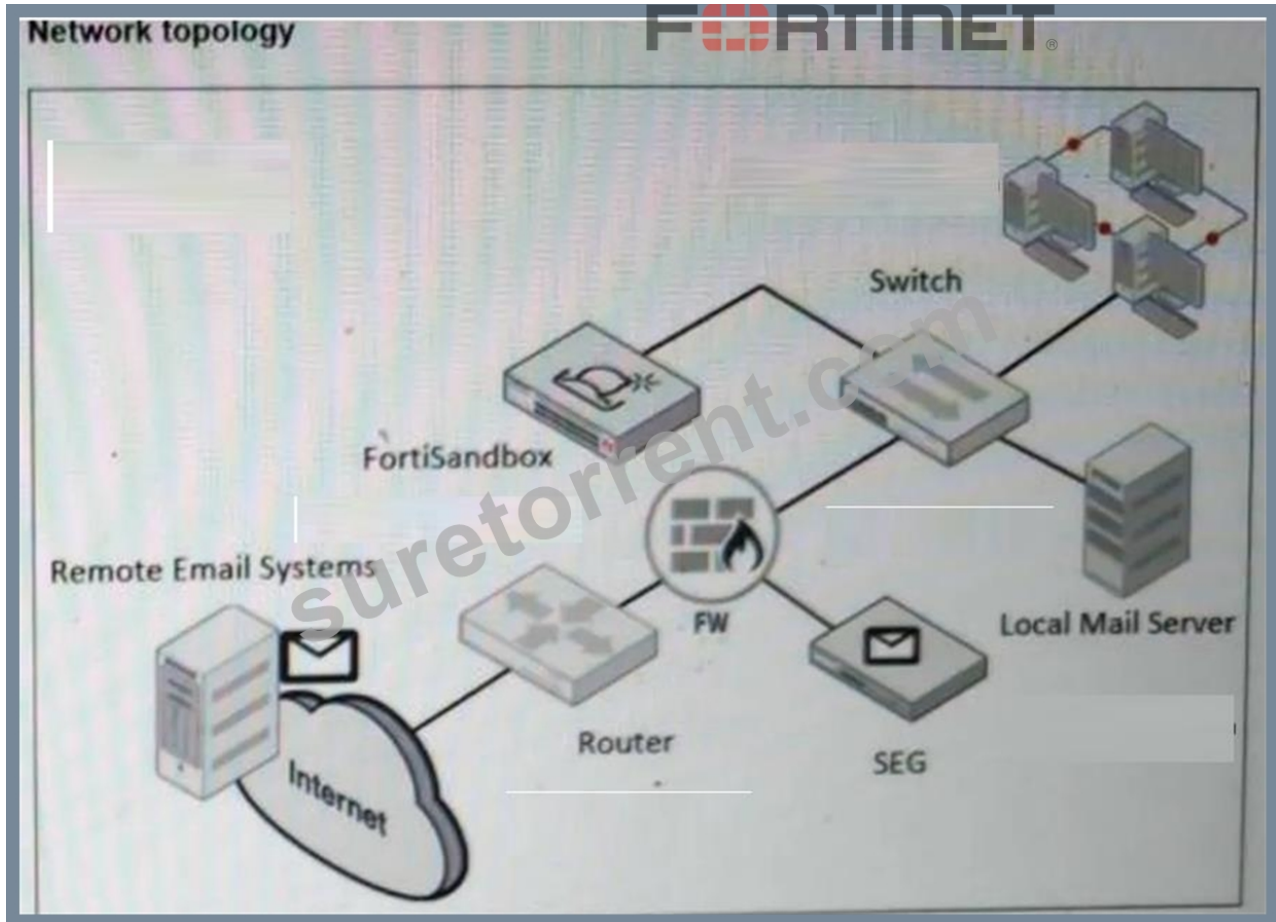

"The Pipeline Mode feature improves performance by allowing to scan multiple files, one at a time, without shutting down the VM instance after scanning each file."

"FortiSandbox will continue scanning files without shutting down the VM instance, as long as the VM status hasn't changed. If the VM status changes, then the VM instance will shut down and will be restored for the next job." This precisely matches the requirement - using one VM instance for multiple sequential scan jobs without shutting down between submissions. The other

options serve different purposes:  
 Adaptive Scan dynamically adjusts clone numbers  
 VM Scan Ratio controls the percentage of jobs scanned in a VM  
 Parallel VM Scan runs multiple VMs simultaneously for a single job

**NEW QUESTION # 37**

Refer to the exhibit.

A network topology is shown. Which two important steps must you take before you enable a BCC adapter on FortiSandbox?  
 (Choose two answers)

- A. Configure the sub-domain on the upstream SEG to BCC emails to FortiSandbox.
- B. Configure an A record on the DNS server for the FortiSandbox IP.
- C. Configure the upstream SEG to extract files and URLs from emails and send them to FortiSandbox for analysis.
- D. Add an MX record on the DNS server for the BCC email sub-domain to resolve to the FortiSandbox IP.

**Answer: A,D**

Explanation:

From the Deployment and System Settings lesson, the Study Guide states:

"You can submit emails from an upstream MTA server to FortiSandbox using a BCC adapter. FortiSandbox will extract attachment files and URLs in an email body." For a BCC adapter to function correctly, two critical prerequisites must be in place:

Option C - The upstream SEG must be configured to BCC emails to a FortiSandbox sub-domain so that email copies are routed to FortiSandbox for analysis  
 Option D - An MX record must be added to the DNS server for the BCC email sub-domain, so that the sub-domain resolves to the FortiSandbox IP address, allowing the SEG to properly deliver BCC email copies  
 Option A is incorrect because the BCC adapter handles full email inspection - FortiSandbox itself extracts files and URLs rather than the SEG doing this.  
 Option B is incorrect because an MX record (not just an A record) is the required DNS configuration for email routing.

**NEW QUESTION # 38**

An organization has an existing FortiGate provisioned as a data center firewall (DCFW) that submits inbound files to FortiSandbox

for inline scanning. As a result of a network redesign, traffic between the FortiSandbox and the DCFW now passes through an intermediate firewall. Inline scanning is no longer working. While examining the configuration of the intermediate firewall you notice that it is configured to allow traffic on ports TCP/3389, UDP/53, and TCP/443. What must you change for the integration to work? (Choose one answer)

- A. FortiGate must be able to access FortiSandbox on UDP/1344.
- B. FortiGate must be able to access FortiSandbox on TCP/8890.
- C. FortiGate must be able to access FortiSandbox on UDP/8888.
- **D. FortiGate must be able to access FortiSandbox on TCP/4443.**

**Answer: D**

Explanation:

The FortiSandbox 5.0 Administrator Lab Guide explicitly states during the inline scanning configuration: "FortiGate and FortiSandbox communicate through port 4443. Management or API ports grant access through port 4443." In the same exercise, the guide has you enable API access on port2 specifically so inline scanning can function, which confirms that the integration depends on FortiGate reaching FortiSandbox over TCP/4443.

In this scenario, the intermediate firewall currently allows TCP/3389, UDP/53, and TCP/443, but not TCP/4443. That is why inline scanning stopped working after the redesign. TCP/443 is not sufficient here because the documented FortiGate-to-FortiSandbox inline communication port is 4443, not standard HTTPS 443. The other ports in the options do not match the inline-scanning communication requirement described in the uploaded lab materials. Therefore, the required fix is to allow FortiGate access to FortiSandbox on TCP/4443.

## NEW QUESTION # 39

.....

We guarantee that you can enjoy the premier certificate learning experience under our help with our FCP\_FSA\_AD-5.0 prep guide. First of all we have fast delivery after your payment in 5-10 minutes, and we will transfer FCP\_FSA\_AD-5.0 guide torrent to you online, which mean that you are able to study soon to avoid a waste of time. Besides if you have any trouble coping with some technical and operational problems while using our FCP\_FSA\_AD-5.0 Exam Torrent, please contact us immediately and our 24 hours online services will spare no effort to help you solve the problem in no time.
