The Certified Agile Scrum Product Owner (CASPO) certification is a valuable certification for individuals who are responsible for the product development process in an Agile Scrum environment. The CASPO certification exam is designed to assess the candidate's knowledge and skills in various areas of Agile Scrum product ownership. CASPO-001 Exam is available online in multiple languages and is valid for three years.

## GAQM Certified Agile Scrum Product Owner (CASPO) Sample Questions (Q63-Q68):

### NEW QUESTION # 63

The Sprint Goal is a result of Sprint Planning, as is the Sprint Backlog. True or False?

- **A. True**
- B. False

**Answer: A**

Explanation:

The Sprint Goal and the Sprint Backlog are both outcomes of Sprint Planning, making this statement true.

According to the Scrum Guide, Sprint Planning is an event where the Scrum Team collaborates to define the work to be performed

during the Sprint. The Sprint Goal is a single objective set for the Sprint, providing focus and coherence to the work selected. It is crafted collaboratively by the Product Owner, Developers, and Scrum Master during Sprint Planning. Simultaneously, the Sprint Backlog is created, consisting of the Product Backlog items selected for the Sprint plus a plan to deliver them, aligned with the Sprint Goal. The Scrum Guide states: "Sprint Planning initiates the Sprint by laying out the work to be performed... This resulting plan is created by the collaborative work of the entire Scrum Team." Thus, both the Sprint Goal and Sprint Backlog emerge from this event, confirming option A as correct.

#### NEW QUESTION # 64

Which are NOT appropriate topics for discussion in a Sprint Retrospective? (Choose the best two answers)

- A. Sprint Backlog for the next Sprint
- B. How the team does its work
- C. Definition of "Done"
- D. The value of work currently represented in the Product Backlog
- E. Team relations

**Answer: A,D**

Explanation:

The Scrum Guide states: "The purpose of the Sprint Retrospective is to plan ways to increase quality and effectiveness" by inspecting the last Sprint's people, processes, and tools.

\* D: The next Sprint's Sprint Backlog is planned in Sprint Planning, not the Retrospective, making it inappropriate.

#### NEW QUESTION # 65

The Product Owner manages the Product Backlog. Who is accountable for estimating the effort to complete the Product Backlog items? (Choose the best answer)

- A. The Product Owner. The Product Owner is required to commit on delivery to the users and the stakeholders.
- B. The PMO. They have all the history on projects delivered, and this enables the IT department to make delivery commitments.
- C. The Developers. As a collective, they have a complete view of the work needed to transform Product Backlog items into Increments of product.

**Answer: C**

Explanation:

Effort estimation is a technical task owned by the Developers, who execute the work. The Scrum Guide notes:

"The Developers are responsible for... planning how to deliver the Increment." During Sprint Planning and refinement, they estimate effort based on their expertise.

\* A: Correct—the Developers collectively assess what's needed to meet the Definition of "Done."

\* B: PMO isn't a Scrum role; estimation stays within the team.

#### NEW QUESTION # 66

What are the purposes of the Definition of "Done"? (Choose the best two answers)

- A. Help ensure the Increment is releasable
- B. Provide transparency
- C. Ensure unit testing occurs
- D. Document the Sprint Goal

**Answer: A,B**

Explanation:

The Definition of "Done" ensures quality and clarity. The Scrum Guide states: "The Definition of Done is a formal description of the state of the Increment when it meets the quality measures required for the product."

\* A: It ensures the Increment is usable/releasable: "In order to provide value, the Increment must be usable."

\* B: It provides transparency by setting a shared standard: "The Definition of Done creates transparency by providing everyone a shared understanding of what work was completed."

\* C:The Sprint Goal is separate, defined in Sprint Planning.

### NEW QUESTION # 67

When a Developers determines that it has over-committed itself for a Sprint, who has to be present when reviewing and adjusting the Sprint work selected? (Choose the best answer)

- A. The Product Owner and the Developers.
- B. The Product Owner and all stakeholders.
- C. The Developers.
- D. The Scrum Master, project manager, and Developers.

**Answer: A**

Explanation:

The Scrum Guide states that the Sprint Backlog is owned by the Developers, who are responsible for planning and executing the work to achieve the Sprint Goal. If they realize they've over-committed, they must adjust the Sprint Backlog. However, since the Product Owner is accountable for maximizing value and managing the Product Backlog, their involvement is critical to ensure adjustments align with value delivery and the Sprint Goal. The Scrum Guide notes: "The Product Owner may influence the Developers by helping them understand and select trade-offs." Option A includes a non-existent "project manager" role in Scrum, making it incorrect.

Option C involves stakeholders, who are not part of mid-Sprint adjustments (they provide feedback at the Sprint Review). Option D excludes the Product Owner, which is insufficient given their role. Thus, B is correct.
