## SolarWinds SCP-NPM Latest Study Questions | Test SCP-NPM Tutorials

Considering all customers' sincere requirements, SCP-NPM test question persist in the principle of "Quality First and Clients Supreme" all along and promise to our candidates with plenty of high-quality products, considerate after-sale services as well as

progressive management ideas. To be out of the ordinary and seek an ideal life, we must master an extra skill to get high scores and win the match in the workplace. Our SCP-NPM Exam Question can help make your dream come true. What's more, you can have a visit of our website that provides you more detailed information about the SCP-NPM guide torrent.

SolarWinds SCP-NPM (SolarWinds Network Performance Monitor) Certification Exam is designed to test an individual's proficiency in using SolarWinds Network Performance Monitor software, which is a powerful tool for monitoring and managing network performance. SolarWinds Network Performance Monitor (NPM) Exam certification exam is ideal for IT professionals who specialize in network management and are looking to demonstrate their expertise in using SolarWinds NPM.

The SCP-NPM certification exam is an essential credential for network professionals who use SolarWinds Network Performance Monitor. It validates the practical skills and knowledge of network administrators in using the software to monitor, troubleshoot, and optimize network performance. SolarWinds Network Performance Monitor (NPM) Exam certification is widely recognized in the industry and can help professionals advance their careers by demonstrating their proficiency in using the SolarWinds NPM software.

# SolarWinds Network Performance Monitor (NPM) Exam Sample Questions (Q50-Q55):

**NEW QUESTION # 50**
How are Orion agents licensed?

- A. Agents requite the SolarWinds Agent Provisioning module SAP
- B. Only Windows agents need to be licensed, Linux is free
- C. No separate license is required
- D. Licenses are available in a set of one upon request

**Answer: C**

Explanation:
Orion agents are software components that you can install on nodes to collect and send data to the Orion server. Orion agents do not require a separate license, as they are included in the license of the Orion Platform product that you are using, such as NPM. You can install and use as many agents as you need, as long as you do not exceed the number of licensed nodes, interfaces, or volumes for your product. Orion agents can use either agent-initiated or server-initiated communication, depending on your network configuration and security requirements. References: NPM Administrator Guide, page 67; SCP Study Aid - NPM, page 15.

**NEW QUESTION # 51**
Which is the best way to monitor an SNMP metric that NPM is not monitoring out-of-the-box?

- A. Node Management utility
- B. Create a custom poller
- C. Update the SolarWinds MIB database
- D. Enable CLI polling

**Answer: B**

**NEW QUESTION # 52**
The finance department asks to view select reports from NPM. Because of compliance policies, you cannot create accounts in the Web Console for users outside of the IT department. How do you allow the finance department to view reports without a user account?

- A. Create a service account for Finance
- B. Enable the Guest account
- C. Create a DirectLink account in the Web Console
- D. Enable the Link only option on the report

**Answer: D**

Explanation:
To allow the finance department to view select reports from NPM without a user account, you can enable the Link only option on the report. This option allows you to generate a direct link to the report that can be shared with anyone who has access to the Orion

Web Console URL, even if they do not have a user account or login credentials. The Link only option also bypasses any report limitations or account restrictions that might apply to the report. To enable the Link only option on a report, you need to edit the report and select the Link only option in the Report Properties page. You can then copy the link and send it to the finance department via email or other methods. The finance department can then view the report by clicking the link and opening it in a web browser1. References: Share a web-based report with non-Orion Platform users

**NEW QUESTION # 53**
You can display Palo Alto firewalls on Orion Maps.

- A. False
- <span style="color:red">B. True</span>

**Answer: B**

**NEW QUESTION # 54**
You can import device-specific MIBs into the SolarWinds MIB Database, but you cannot import UnDP pollers based on OIDs from device-specific MIBs.

- A. True
- <span style="color:red">B. False</span>

**Answer: B**

Explanation:
You can import device-specific MIBs into the SolarWinds MIB Database, and you can also import UnDP pollers based on OIDs from device-specific MIBs. UnDP stands for Universal Device Poller, which is a tool that allows you to monitor custom statistics based on OIDs with NPM. You can create UnDP pollers by selecting OIDs from the MIB Browser, or by importing them from a file that contains OIDs and poller names. You can then assign UnDP pollers to devices monitored by NPM and view the results on the web console. Reference:
