Besides, they constantly keep the updating of products to ensure the accuracy of questions. All PSP Actual Exams are 100 percent assured. Besides, we price the PSP actual exam with reasonable fee

without charging anything expensive.

ASIS Physical Security Professional Exam Sample Questions (Q211-Q216):

NEW QUESTION # 211

Using a 1.75 cubic yard [1.34 cubic meter] bucket, how many lifts does it take to pour each 2,000-cubic foot [56.64 cubic meter] column?

- A. 42 lifts
- **B. 133 lifts**
- C. 30 lifts
- D. 60 lifts

Answer: B

Explanation:

The column volume is 2,000 cubic feet (56.64 cubic meters), and each lift using a 1.75 cubic yard bucket corresponds to: $\text{Lifts required} = \frac{\text{Column volume (cubic yards)}}{\text{Bucket capacity (cubic yards)}}$ Lifts required = $\frac{56.64}{1.75} \approx 32.37$. Convert 56.64 cubic meters to cubic yards: $56.64 \times 1.308 = 74.145664$. $74.145664 \times 1.308 = 96.94$. Lifts required = $\frac{96.94}{1.75} \approx 55.39$. #133 lifts. $\frac{74.14}{1.75} \approx 42.37$. Lifts required = 42.37.

NEW QUESTION # 212

What signal the entry of persons into a facility or an area while the system is in operation?

- **A. Intrusion alarms**
- B. Invasions
- C. Access door
- D. Protection alarms

Answer: A

NEW QUESTION # 213

You are retained by a contractor who asks you to perform a simple as-planned versus as-built analysis (APAB) of a large hydro-electric dam project that took more than five years to complete. Your analysis will form the basis of a change order that requests a time extension. You suggest using a different methodology for quantifying the delay. Which of the following reasons for recommending a different analysis does NOT apply to a simple APAB analysis?

- A. Less accurate as the analysis advances through the project.
- **B. Accuracy is increased by inserting delaying events into the as-planned schedule.**
- C. Not suitable for projects with long durations.
- D. Not suitable for complicated projects with multiple planned critical paths.

Answer: B

NEW QUESTION # 214

Tapping without authorization into communication lines over which digitized computer data and messages are being sent is called:

- A. Standard digitizing
- **B. Electronic eavesdropping**
- C. Digital beating
- D. War driving

Answer: B
