You will receive updates till 365 days after your purchase, and there is a 24/7 support system that assists you whenever you are stuck in any problem or issues.

Scrum SAFe Practitioner Exam (6.0) Sample Questions (Q262-Q267):

NEW QUESTION # 262
Which process guides the final approval for a release in SAFe?

- A. Continuous Delivery Pipeline
- B. Lean Portfolio Management
- C. Release Governance
- D. Product Management

Answer: C

Explanation:
Release Governance is the process that guides the final approval for a release in SAFe. It involves a set of roles and responsibilities that ensure the quality, compliance, and fitness for purpose of the solution before it is released to customers. Release Governance also coordinates the timing and frequency of releases based on market demand and business needs. Release Governance is part of the Release on Demand aspect of the Continuous Delivery Pipeline, which is the fourth and last element in the four-part pipeline of Continuous Exploration, Continuous Integration, Continuous Deployment, and Release on Demand. NEW QUESTION # 263
Which of the following statements describes the Release Train Engineer role?

- A. To ensure technical integrity of all development within the ART
- B. To serve as the ART Chief Coach
- C. To serve as the ART-level content authority
- D. To maintain Team Backlogs

Answer: B

Explanation:
The Release Train Engineer (RTE) is a servant leader and coach for the Agile Release Train (ART), which is a group of Agile teams that work together to deliver value. The RTE facilitates the ART events and processes, and supports the teams in delivering value. They communicate with stakeholders, escalate impediments, help manage risk, and drive relentless improvement. The RTE also serves as the ART Chief Coach, which means they help the teams apply and improve the SAFe principles and practices, such as PI planning, system demos, inspect and adapt, and innovation and planning1. The RTE is not the team backlog owner, the ART-level content authority, or the technical leader of the ART, but rather the facilitator and enabler of the ART's success. & Responsibilities - KnowledgeHut, Release Train Engineer - Scaled Agile Framework

NEW QUESTION # 264
Which statement describes a cadence-based PI Planning event?

- A. It is an all-hands, two-day event with the goal to create alignment
- B. It is not a required event but tasks move forward at higher velocity when the meeting occurs
- C. It is very important and should be postponed until all participants can attend
- D. As many team members as possible should attend remotely to reduce travel costs

Answer: A

Explanation:
A cadence-based PI Planning event is a face-to-face event that serves as the heartbeat of the Agile Release Train (ART), aligning all the teams on the ART to a shared mission and vision. It is essential to SAFe and should not be skipped or delayed. It is an opportunity for all team members and stakeholders to communicate, collaborate, and coordinate their work for the next Program Increment (PI), which is typically 8-12 weeks long. The PI Planning event has a standard agenda that includes a presentation of business context and vision, followed by team planning breakouts, where the teams create their Iteration plans and objectives for the upcoming PI. The event also includes a management review and problem-solving session, where the teams identify and resolve dependencies, risks, and impediments. The event concludes with a confidence vote and a final plan review, where the teams present their PI objectives and receive feedback from the business owners.
The PI Planning event is a key enabler of alignment, transparency, and collaboration across the ART. References: PI Planning, Planning Interval, PI Planning vs Sprint Planning: What Is the Ultimate Goal of the PI Planning Event?

NEW QUESTION # 265
Which pillar in the House of Lean focuses on the Customer being the consumer of the work?

- A. Value
- B. Innovation
- C. Respect for People & Culture
- D. Flow

Answer: A

Explanation:
Value is the first and most important pillar in the House of Lean, which is a model that guides the Lean-Agile transformation and culture. Value means delivering the maximum benefit to the customer in the shortest sustainable lead time, while providing the best quality and lowest cost possible1. Value is the ultimate goal of the House of Lean, and it is achieved by applying the other pillars: innovation, relentless improvement, leadership, and respect for people and culture2. Value is also the foundation of the Lean-Agile mindset, which is the way of thinking and acting that enables Business Agility3. Value focuses on the customer as the consumer of the work, and requires understanding and meeting their needs, expectations, and desires4. short and sweet - Echometer2; 3: Lean-Agile Mindset - Scaled Agile Framework3; 4: Exploring Which Pillar in the House of Lean Focuses on the Customer4

NEW QUESTION # 266
Restoring the speed and innovation of the entrepreneurial network while leveraging the stability of the hierarchical system is a benefit of what?

- A. Customer centricity
- B. Continuous learning culture
- C. Functional silos
- D. Dual operating system

Answer: D

Explanation:
A dual operating system is a model of business agility that combines the entrepreneurial network and the hierarchical system. The network is optimized for speed and innovation, while the hierarchy is optimized for efficiency and stability. The dual operating system allows the organization to balance the competing demands of exploration and exploitation, and to respond effectively to fast-changing environments. SAFe implements the network as a set of development value streams and provides the necessary interfaces to the hierarchy to restore the system's balance.
