2026 Latest TroytecDumps 300-425 PDF Dumps and 300-425 Exam Engine Free Share: <https://drive.google.com/open?id=1HU9vLrMMSEIn6mF-azoIuyrIsSTL1ZU4>

The Cisco 300-425 online practice test engine that comes with the Designing Cisco Enterprise Wireless Networks (300-425) exam questions from TroytecDumps assists you in simulating the real Designing Cisco Enterprise Wireless Networks (300-425) exams. This is excellent for familiarizing yourself with the Designing Cisco Enterprise Wireless Networks and learning what to anticipate on test day. You can also use the Cisco Practice Test (Links to an external site.) engine to monitor your progress and review your answers to see where you need to improve for the Designing Cisco Enterprise Wireless Networks (300-425) exam.

To pass the Cisco 300-425 Exam, candidates are required to have a solid understanding of wireless networking concepts and technologies, as well as hands-on experience designing and implementing Cisco wireless solutions. They must also be familiar with the latest industry trends and best practices in wireless network design, security, and management. Successful candidates will be able to design and deploy scalable, secure, and reliable wireless networks that meet the needs of their organizations.

300-425 Test Collection Pdf | 300-425 100% Accuracy

According to the statistic about candidates, we find that some of them take part in the Cisco exam for the first time. Considering the inexperience of most candidates, we provide some free trial for our customers to have a basic knowledge of the 300-425 exam guide and get the hang of how to achieve the 300-425 Exam Certification in their first attempt. You can download a small part of PDF demo, which is in a form of questions and answers relevant to your coming 300-425 exam; and then you may have a decision about whether you are content with it. Our 300-425 exam questions are worthy to buy.

Cisco Designing Cisco Enterprise Wireless Networks Sample Questions (Q292-Q297):

NEW QUESTION # 292

An engineer must gather requirements for an upcoming wireless design in a manufacturing facility. Which requirement causes concerns for the customer?

- A. email connectivity
- B. lossless roaming capability
- C. intermittent web traffic
- D. high throughput multimedia applications

Answer: B

NEW QUESTION # 293

What is the purpose of Cisco Band Select?

- A. Push clients to use the 5 GHz band instead of 2.4 GHz
- B. Increase MIMO stream count
- C. Prioritize voice traffic over data
- D. Improve antenna gain for long corridors

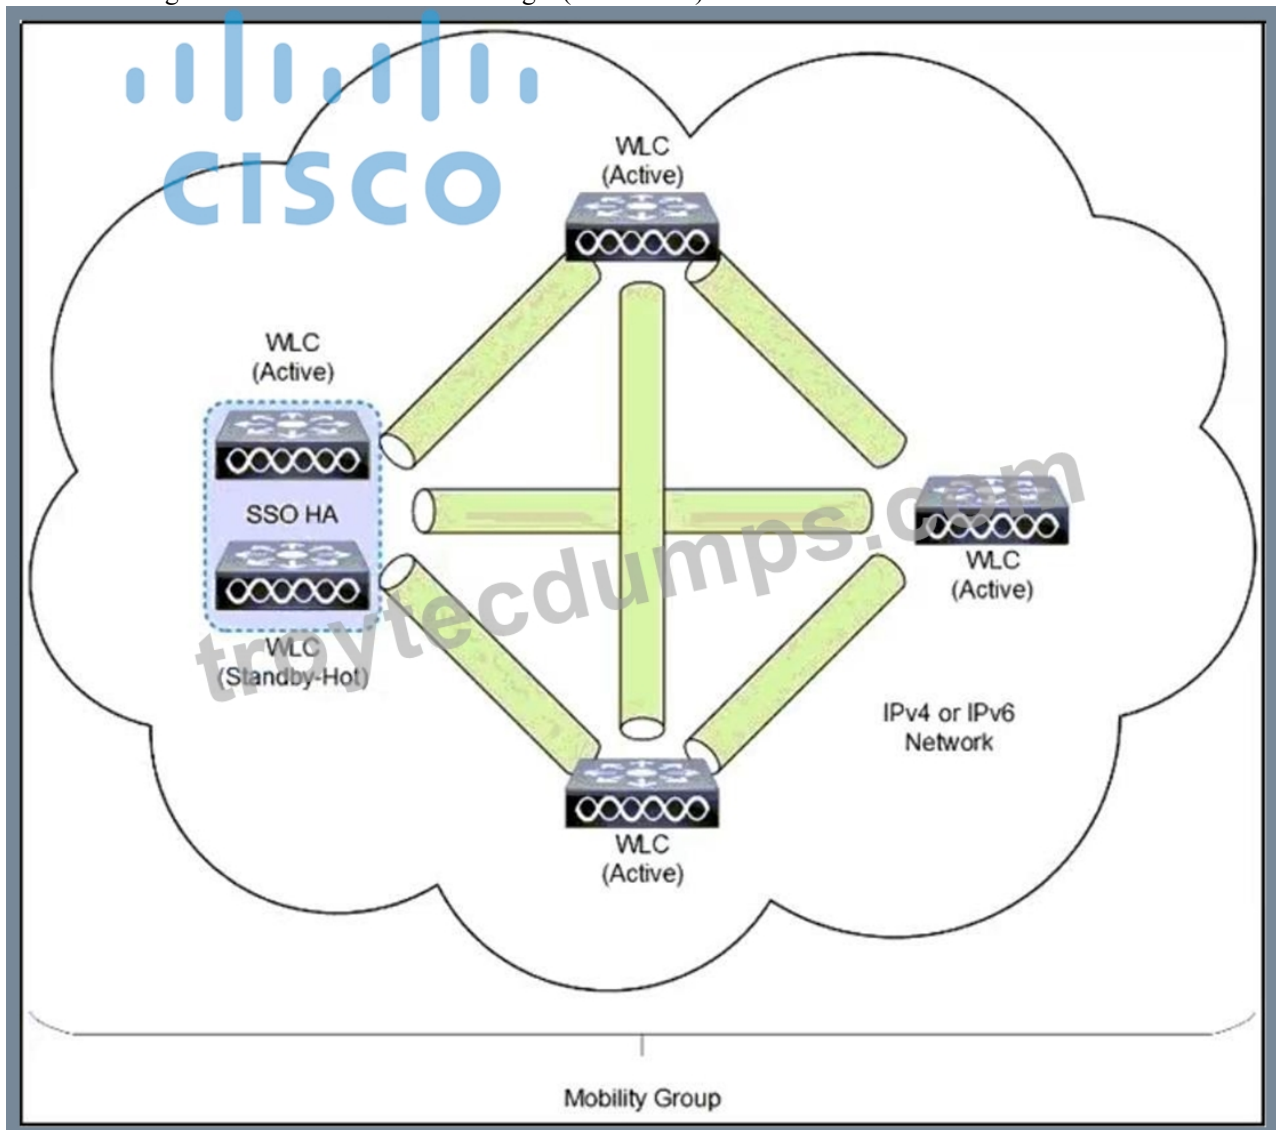

Answer: A

NEW QUESTION # 294

Refer to the exhibit. An engineer must design a mobility group that has these requirements:

- The mobility group must consist of five WLCs.
- All WLCs must run software version 8.0 or later.
- The WLCs must connect via an IPv4 network.
- Two of the WLCs must be in an SSO high availability pair.

Which two configurations must be included in the design? (Choose two.)

- A. All the WLCs must run the same software version.
- B. Each WLC must use the same mobility domain name.
- C. Only WLCs in an SSO high availability pair must use the same virtual IP address.
- D. The WLAN SSID must be consistent across all the WLCs.
- E. All the WLCs must be of the same model or type.

Answer: B,C

Explanation:

In a mobility group design, it is essential that all Wireless LAN Controllers (WLCs) share the same mobility domain name to ensure seamless client mobility and roaming between WLCs. This allows for clients to be recognized across the network and maintain their sessions as they roam.

Additionally, when WLCs are in a Stateful Switch Over (SSO) high availability pair, they must use the same virtual IP address to present a single network entity to the wireless clients, ensuring uninterrupted service in the event of a failover.

NEW QUESTION # 295

Refer to the exhibit. An engineer determined that during a recent controller failure, some APs did not failover to their secondary controller based on the network design, which has sufficient licenses for all APs. The controllers are not in a mobility group but have A records for their hostnames in DNS. Which setting needs to be addressed?

	Name	Management IP Address(Ipv4/Ipv6)
Primary Controller	WLC-PRIMARY	192.168.1.11
Secondary Controller	WLC-SECONDARY	10.42.98.11
Tertiary Controller		
AP Failover Priority	Low	

- A. The AP failover priority was not set high enough.
- B. DNS hostnames are required to be FQDN.
- **C. The secondary controller IP address is incorrect.**
- D. The controllers must be in the same mobility group.

Answer: C

Explanation:

The question stated ENOUGH LICENSES, priority does not kick in.

NEW QUESTION # 296

An engineer is designing a wireless network for a small airport and completes the initial walkthrough phase of the facility. Which step of the WLAN site survey should the engineer perform next?

- A. passive survey
- **B. predeployment survey**
- C. post-deployment survey
- D. active survey

Answer: B

Explanation:

After the walkthrough, you perform a predeployment (predictive) survey - using building plans and RF modeling tools - to validate AP placement and coverage before any hardware is installed.

NEW QUESTION # 297

.....

The customers don't need to download or install excessive plugins or software to get the full advantage from web-based Designing Cisco Enterprise Wireless Networks (300-425) practice tests. Additionally, all operating systems also support this format. The third format is the desktop 300-425 practice exam software. It is ideal for users who prefer offline Designing Cisco Enterprise Wireless Networks (300-425) exam practice. This format is supported by Windows computers and laptops. You can easily install this
