## Valid Cloud Security Alliance CCSK Test Notes | CCSK PDF Guide

CCSK practice materials stand the test of time and harsh market, convey their sense of proficiency with passing rate up to 98 to 100 percent. They are 100 percent guaranteed CCSK learning quiz. And our content of the CCSK Exam Questions are based on real exam by whittling down superfluous knowledge without delinquent mistakes. At the same time, we always keep updating the CCSK training guide to the most accurate and the latest.

## Cloud Security Alliance Certificate of Cloud Security Knowledge v5 (CCSKv5.0) Sample Questions (Q127-Q132):

### NEW QUESTION # 127

Who is responsible for Application Security in Software as a Service(SaaS) service model?

- A. Cloud Service Provider
- B. Cloud Carrier
- C. Cloud Customer
- D. It's a shared responsibility between Cloud Service Provider and Cloud Customer

**Answer: D**

Explanation:

Its always a shared responsibility

#### **NEW QUESTION # 128**

Private cloud model can be managed by third party who may not be part of the organization served by that private cloud.

- **A. True**
- B. False

**Answer: A**

Explanation:

This is true

This is a tricky question that you should look into carefully. Main purpose of private cloud is usage by one organization (use) but it can be managed by third party as well.

Definition: Private cloud

According to NIST, "the cloud infrastructure is provisioned for exclusive use by a single organisation comprising multiple consumers (e.g. business units). It may be owned, managed, and operated by the organisation, a third party or some combination of them, and it may exist on or off premises. "

#### **NEW QUESTION # 129**

All assets require the same continuity in the cloud.

- **A. False**
- B. True

**Answer: A**

#### **NEW QUESTION # 130**

Who is responsible for the security of the physical infrastructure and virtualization platform?

- A. The responsibility is split equally
- B. The majority is covered by the consumer
- C. It depends on the agreement
- D. The cloud consumer
- **E. The cloud provider**

**Answer: E**

#### **NEW QUESTION # 131**

Which of the following is NOT one of the common networks underlying in Cloud Infrastructure?

- A. Service Network
- B. Management Network
- **C. Security Network**
- D. Storage Network

**Answer: C**

Explanation:

If you are a cloud provider (including managing a private cloud), physical segregation of networks composing your cloud is important for both operational and security reasons. We most commonly see at least three different networks which are isolated onto dedicated hardware since there is no functional or traffic overlap:

1. The service network for communications between virtual machines and the Internet. This builds the network resource pool for the cloud users.
