Exam 1z0-1054-25 Revision Plan - Reliable 1z0-1054-25 Valid Dump and Authorized Practice Oracle Financials Cloud: General Ledger 2025 Implementation Professional Online

The exam outline will be changed according to the new policy every year, and the 1z0-1054-25 questions torrent and other teaching software, after the new exam outline, we will change according to the syllabus and the latest developments in theory and practice and revision of the corresponding changes, highly agree with outline. The 1z0-1054-25 Exam Questions are the perfect form of a complete set of teaching material, teaching outline will outline all the knowledge points covered, comprehensive and no dead angle for the 1z0-1054-25 candidates presents the proposition scope and trend of each year.

Oracle 1z0-1054-25 Exam Syllabus Topics:

Topic	Details
Topic 1	<ul style="list-style-type: none">Implementing and Managing Journals: This section targets Oracle General Ledger Consultants and covers the full cycle of journal processing—from creation through approval to management. It includes configuration of journal-related objects and understanding how journals are sourced, tracked, and approved using predefined rules and workflows.
Topic 2	<ul style="list-style-type: none">Processing Intercompany: This domain assesses the skills of Finance Integration Specialists in configuring and managing intercompany transactions. Candidates must understand balancing rules, clearing configurations, and transaction processing, as well as how to maintain intercompany reconciliations in multi-entity structures.
Topic 3	<ul style="list-style-type: none">Using AIMLMobile and Other Automation Features: This final section assesses Finance Transformation Architects and focuses on the business value derived from incorporating AI, machine learning, and mobile capabilities in Oracle Financials. Candidates are expected to understand automation use cases and the practical benefits these modern features offer in streamlining financial operations.
Topic 4	<ul style="list-style-type: none">Performing Period Close: Designed for Oracle Financial Application Managers, this section evaluates expertise in executing and managing the period close lifecycle. Topics include reconciliations, revaluation, translation, and consolidation. Candidates are required to configure the Period Close Monitor and associated setups like revaluation, allocations, and chart mappings for financial consolidation.
Topic 5	<ul style="list-style-type: none">Implementing Ledgers: This part evaluates the competencies of Financial Systems Analysts and focuses on defining and configuring ledgers within Oracle Financials. Candidates are expected to manage ledger-level security and understand how to utilize General Ledger Balances Cubes for better financial visibility and reporting accuracy.

Oracle Financials Cloud: General Ledger 2025 Implementation Professional Sample Questions (Q10-Q15):

NEW QUESTION # 10

You need to have invoices generated for certain intercompany transactions.
Where do you enable invoicing?

- A. Manage Intercompany Receivables Assignment
- B. Manage Intercompany Transaction Types
- C. Manage Intercompany Organizations
- D. Manage Intercompany System Options

Answer: B

NEW QUESTION # 11

The current implementation project covers Financials (with Fixed Assets and Expenses) with operations planned in three countries (USA, Italy, and India).

Which three labels are required when designing the chart of account structure for this project? (Choose three.)

- A. Natural Account
- B. Cost center
- C. Intercompany Segment
- D. Secondary Balancing
- E. Primary Balancing

Answer: A,B,E

Explanation:

The three labels that are required when designing the chart of account structure for this project are Primary Balancing, Cost center, and Natural Account. A chart of account structure is composed of segments that represent different dimensions of accounting information, such as company, department, account, or project.

Each segment has a label that indicates its function or purpose within the chart of accounts. The Primary Balancing label is required for the segment that identifies the legal entity or business unit for which financial statements are prepared and balanced. The Cost center label is required for the segment that identifies the organizational unit or function that incurs expenses or generates revenues. The Natural Account label is required for the segment that identifies the nature of an account, such as asset, liability, revenue, or expense.

The Intercompany Segment label is not required when designing the chart of account structure for this project, as this is an optional label for the segment that identifies intercompany transactions between different legal entities or business units within the same enterprise. The Secondary Balancing label is not required when designing the chart of account structure for this project, as this is an optional label for the segment that identifies an additional balancing dimension other than the primary balancing segment, such as fund or region. NEW QUESTION # 12

Your company wants to change the Cumulative Translation Adjustment (CTA) account to record gains/losses from varying currency rates.

What steps must you perform to achieve this objective without causing data corruption?

- A. Open the Ledgers page and update the CTA account and then rerun Translation for all periods required. The system will automatically update the translated balances.
- B. Query the Translation journals and delete all of them, then change the CTA account in the Ledger page, and rerun Translation for all periods required.
- **C. Purge all translated balances, change the CTA account in the Ledger page, and rerun Translation for all periods required.**
- D. Define a new ledger and accounting configuration. The CTA account cannot be updated after the ledger has been in use.

Answer: C

NEW QUESTION # 13

Which two allow access to the BI Catalog for creating an Oracle Transactional Business Intelligence analysis?

(Choose two.)

- **A. Enterprise Performance Management Workspace**
- **B. Reports and Analytics**
- C. Scheduled Processes
- D. Business Process Management Workspace
- E. Universal Content Management Workspace

Answer: A,B

Explanation:

The two options that allow access to the BI Catalog for creating an Oracle Transactional Business Intelligence analysis are Reports and Analytics and Enterprise Performance Management Workspace. Reports and Analytics is a tool that allows users to access, create, edit, and share reports and analyses using data from various sources, including Oracle Transactional Business Intelligence. Users can access Reports and Analytics from various pages in Oracle Fusion Applications or from Oracle Fusion Cloud Service Console. Enterprise Performance Management Workspace is a tool that allows users to access, create, edit, and share reports and analyses using data from various sources, including Oracle Transactional Business Intelligence. Users can access Enterprise Performance Management Workspace from Oracle Fusion Cloud Service Console or from a web browser. Universal Content Management Workspace is not an option that allows access to the BI Catalog for creating an Oracle Transactional Business Intelligence analysis, as this is a tool that allows users to manage documents and other digital content in Oracle Fusion Applications. Business Process Management Workspace is not an option that allows access to the BI Catalog for creating an Oracle Transactional Business Intelligence analysis, as this is a tool that allows users to monitor and manage business processes in Oracle Fusion Applications. Scheduled Processes is not an option that allows access to the BI Catalog for creating an Oracle Transactional Business Intelligence analysis, as this is a tool that allows users to submit, monitor, and manage scheduled processes in Oracle Fusion Applications. NEW QUESTION # 14

You notice that a lot of erroneous address data is being saved. How do you ensure that only valid addresses are entered in the system?

- **A. Define the Geography Validation for Country option to Error.**
- B. Define the Geography Validation for Country option to No Validation.
- C. Redefine the location structure.
- D. Redefine the geography hierarchy.

Answer: A

Explanation:

Geography validation is a feature that enables you to validate the address information entered for a location against the geography hierarchy defined for a country. You can set the Geography Validation for Country option to one of the following values:

No Validation: No validation is performed on the address information.

Warning: A warning message is displayed if the address information does not match the geography hierarchy, but the user can still save the address.

Error: An error message is displayed if the address information does not match the geography hierarchy, and the user cannot save the address until the error is corrected. To ensure that only valid addresses are entered in the system, you should set the Geography Validation for Country option to Error. This will prevent users from saving erroneous address data and enforce data quality and accuracy. References:
